Package Selection

Laundry pods VS laundry detergent

laundry detergent

Active substance $< 15\%$

85% of ordinary laundry detergent
is basically water

laundry pods

Active substance $\geq 65\%$

The water content of laundry pod
is less than 5%

One pod = 8 times clean power

How to use

Step 01

Take out the laundry detergent pod with dry hands & put it into the washing machine.

Step 02

Put the clothes in it.

Step 03

Start the washing program.

A Nature Choice

phosphate-free, enzymax
formula, gentle for babies
and sensitive skin

A top-down view of several laundry pods on a white, textured surface. Some pods are pink and some are gold, some are whole and some are broken open, showing the gel beads inside. The pods are scattered across the frame, with a concentration in the top and bottom areas.

PS: How to store laundry pods

1. Laundry gel beads can be stored at room temperature.
2. Avoid contact with wet hands and pay attention to moisture.
