## READY FOR THE FUTURE- WITH THE SMART GUARDS

While water already has to be rationalized more and more often in the summer, rising prices for gas and electricity put a financial strain on private households in particular in the winter. Conscious and efficient use of our resources will play an increasingly important role in the near future.

Saving energy is the order of the day, but how do I know whether the measures taken are working or whether resources are being consumed unintentionally?

### YOUR GUARDS ARE HELPING YOU!

The iQ energyGuard family gives you an overview. As guardians for private households, they monitor water, gas, and electricity consumption, analyze it, and uncover potential for optimization. This gives you complete transparency over consumption and costs.

### Easier than ever before

- Easy installation within minutes
- No additional apps or programs required
- All data available via PC, tablet or smartphone
- Works locally even without internet
- Usable without registration and anonymously

### Water consumption at a glance

- Water consumption and costs can be checked at any time
- Prevention of unintentional water consumption
- Possibility of leakage detection
- Individually adjustable water consumption limits
- Alarm when consumption limits are exceeded, e.g. in case of unintentional water consumption
- Recognize optimization potential

iQ waterGuard

### Cost control of gas consumption

- Overview of costs and consumption
- Individually adjustable values for consumption and cost alerts
- Alarm when limits are exceeded
- Display of the calculated annual consumption
