ALL ABOUT WATER TRAPS

Prevex® Showerloc™

An eco-friendly and easy-to-clean water trap for shower cabins.

Showerloc is a modern, sustainable water trap solution. It is made of 50 % recycled plastic. Despite its unique material, Showerloc is as durable as a water trap made entirely of virgin plastic. You can clean Showerloc easily in just a few simple steps!

Showerloc has a high and a low model for different types of shower cabins. Both models are partly pre-assembled for easy installation.

Easy to clean

Cleaning Showerloc is quick and effortless— just lift the different parts from above and rinse them.

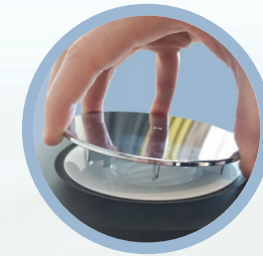

Recycled plastic

Showerloc is made of durable 50 % recycled plastic, making it an environmentally friendly choice.

Clean the Showerloc water trap in a few simple steps

This is how easy it is to use Showerloc.

1 Lift the cover.

2 Lift the hair strainer.

3 Lift the inner part.

4 Lift the cup. Rinse all parts under running water.

Technical specifications

Showerloc High

Showerloc High is 85 mm in height. It is suitable for shower cabins with \varnothing 90 mm drain. The water trap outlet is \varnothing 40/50 mm.

The waste valve is optimized for high hydrodynamic flow – 0,4 l per second. This model meets the European EN 274 standard.

You can choose between a chromed and a black ABS cover. The black cover has a black flange and the chromed version has a white flange.

Showerloc Low

Showerloc Low is only 60 mm in height, making it a suitable option for low shower cabins. Despite its low height, this model has a good water flow rate.

Like the high model, this low model is suitable for shower cabins with \varnothing 90 mm drain. The water trap outlet is \varnothing 40/50 mm.

Showerloc Low has two ABS covers to choose from: chromed and black. The black cover has a black flange, whereas the chromed version has a white flange.

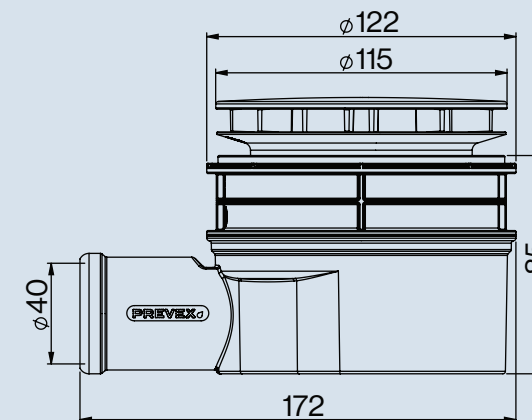

Alternatives

Showerloc is also available with or without the design cover.
