ARCHITECTS AND PRESTO, EXPERIENCE DESIGN

Experience design is a design method focussed on the user. A wide range of criteria are taken into account to make optimum use of an object, a service, a space: it might be the style of a product, a process or a type of user, an operating environment or an impact on the environment, for example.

Architects, you create public spaces where you can live, walk around, play, look after yourself, have fun, learn...

PRESTO creates equipment that can help you make places functional where tapware is not merely a triviality for the user, installer or the technician who services it.

Creating a building designed to accommodate everyone, whether frail or in large numbers, requires a very high level of quality: combining reliability, durability, repairability, practicality and aesthetic appeal.

In its fight against wasting water and energy, PRESTO has established itself as a trusted partner who shares the same concerns and commitments with architects.

Welcome to PRESTO®.

THE PRESTO COMPANY

PRESTO started its business 100 years ago with an environmental and societal awareness that was ahead of its time. Its obsession? To preserve natural resources by making it possible for locations open to the public that use large volumes of water to keep their spending under control and their users safe.

In 1927, PRESTO had a brainwave: timing the tap flow rate prevents water from being wasted and damaging supply networks. This is how the economical, hygienic and sustainable PRESTO timed-flow tapware was created. By modifying the way shared tapware is used, the French manufacturer has since been able to fit public places out around the world.

Today, as a genuine technology influencer concerned about public health issues, PRESTO continues to adapt to the reality of uses, to all user profiles, including the most frail and to the very specific needs of each kind of establishment (to be built or renovated).

Today, PRESTO can be found in all public and commercial buildings: schools and nurseries, outdoor and leisure, business, places of worship, sport, high security, culture, hotels & gastronomy, healthcare, transport, offices and industry.

AN INDEPENDENT, FAMILY-RUN FRENCH GROUP

2 BRANDS

PRESTO® for public places
SANIFIRST® for healthcare

7 PRODUCT CATEGORIES

Washbasins, showers, professional kitchens, flush valves, urinals, laboratories and accessories

2 MARKETS

Construction and renovation

2 in France and 1 in Portugal

7 COMMERCIAL SUBSIDIARIES INTERNATIONALLY

IN 80 COUNTRIES

INDUSTRIAL COMMITMENT

All our products and solutions are designed and developed with our values in mind: quality, design, technology, responsibility.

QUALITY

- 10-year* warranty
- ISO 9001 certification since 1995
- Certified high quality: ACS, NF and SECURITAS

DESIGN AND INNOVATION

- Unique and patented technology
- Integrated R&D
- Innovation unit

SERVICES

- Supporting projects over the long term
- A gateway to obtaining eco-labels and credentials of high environmental quality

SOCIETAL AND ENVIRONMENTAL RESPONSIBILITY

- Saving natural resources
- Remarkable durability of materials
- All models are repairable

* Varies between 3 and 10 years depending on the type of product.

OUR EXPERTISE

Architects, the public spaces you create are designed to provide an optimum user experience. Tapware is a major hygiene and safety issue!

Each public or commercial building has its own constraints, but we can overcome these together:

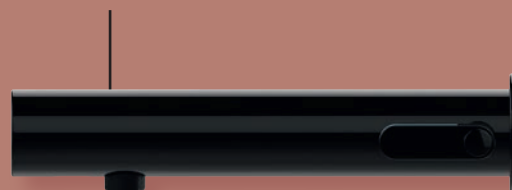

- **high level** of hygiene and safety;
- **a wide range of sizes** and compatibility without limits;
- **aesthetic appeal** combining different finishes and customisation options;
- proven **reliability and durability**;
- **innovative**, intelligent and touchless **technology**;
- **compliant** with sector **standards**;
- high quality **warranty and certification...**

EXPERIENCE IN
TECHNOLOGY

PRESTO NOVA®

is an intelligent and elegant range of washbasin sensor taps. The new-generation detection cell prevents inadvertent activation caused by reflections in mirrors and some types of lights.

With its instant analysis capability and self-learning technology, this range makes it possible for all users, including children and persons with reduced mobility, to easily wash their hands while guaranteeing their safety.

With its slender style and modern finish, this range of taps has a contemporary design that blends seamlessly into any environment: chrome-plated, matt black with copper edging, or chrome-plated with a chrome-plated black cover.

5 settings are analysed by the cell via its self-learning technology: brightness, lighting variation, reflections, bowl depth and water flow in the bowl.

ABOUT THE
PRESTO NOVA®
RANGE

PRESTO LINEA®

is an attractive and durable range of washbasin sensor taps. Its modern, pure and classic design makes it timeless. Matching touchless soap dispensers are available as a finishing touch.

PRESTO LINEA® can be customised down to the very last detail. Therefore, it is compatible with all the needs and constraints of any premises and respective users.

7 finishes are available for this range: chrome, brushed stainless steel, brushed gold, brushed copper, black chrome, matt black, rainbow.

EXPERIENCE IN AESTHETICS

PRESTO SO'O®

is a range of washbasin sensor taps which, with its alternating curved and flat design, enhances any space.

With its various finishes, this fully customisable range can be monochrome, two-colour or you can create a unique product of your choice: matching or mismatched body and cover, sophisticated matt black exterior and pink gold cover with the same colour mixer lever, customised marking with laser scribing or pad printing...

**3 items can be customised:
the body, cover and mixer
lever to blend seamlessly into
any type of environment.**

PRESTO SO'O®
RANGE

PRESTO BOX TOUCH®

is a range of shower touch-sensitive taps designed as a genuine safe and secure box for its users: 100% waterproof, non-accessible system locked with an invisible screw, periodic automatic flush, thermostatic tapware fitted with an anti-scalding system to maintain a consistent and comfortable temperature.

Its flush-mounted, smooth and laser-customisable front panel houses stylish touch-sensitive tapware. With timed-flow, this range prevents any unnecessary water consumption.

0 means zero surprises!
With PRESTO BOX TOUCH,
everything is secure and under
control: installation, using
the shower, water and energy
consumption.

PRESTO
BOX TOUCH®
RANGE

PRESTO 7100 XL N / 7200 XL N

are concealed direct flush valves for public places, providing hygiene and cleanliness that is significantly greater than a cistern flush.

With electronic and automatic detection, the direct flush activates even if you forget to.

Result: toilets that stay clean and are always available.

This paints the rest of the establishment in a good light!

2, is the number of flush options available to users:
***manual* to maintain flush control**
or touchless *electronic* for
guaranteed hygiene between
each use.

EXPERIENCE IN
EFFICIENCY

PRESTO SENSAO 8100 N / 8300 N

are two concealed sensor urinal flush valves that prevent the spread of bacteria.

The automatic and touchless flush prevents the accumulation of uric acid and reduces unpleasant odours. The ceramic surface remains clean between each flush which means that users benefit from spotless hygiene in public toilets.

**24 % of public toilet users
cannot stand unpleasant
odours.**

*Result of a survey on the perceived
cleanliness of public toilets.*

PRESTO SENSÃO®
RANGE

PRESTO C-DRY

is a range of stylish and eco-friendly automatic hand dryers. Its matt black, stainless steel or white finishes can be seamlessly combined with chrome-plated or customised tapware, but also with a ceramic, coloured-resin or stainless steel environment.

Ultra compact, PRESTO C-DRY is ideal for small spaces. Its power consumption is particularly low and its smooth one-piece cover is easy to maintain.

**15, is the maximum
number of seconds
to dry your hands.**
