Czech tradition and world design is what makes us Alcadrain

COMPANY FOUNDATION

Alcadrain company was founded in 1998 under a name Alcaplast by wife and husband Radka Prokopová and František Fabičovic. Since they have started manufacturing of the first inlet and outlet valves in Břeclav, they expanded and upgraded its portfolio of products significantly. In 2022, Alcaplast changed its name to Alcadrain and became part of the Alca Group. Currently Alcadrain with its wide range of products fits into the role of market leader indicating trends on the field of sanitary systems in Central and Eastern Europe, with expansion into many other countries.

ALCADRAIN INTERNATIONAL

We design our products so that they can simplify life across many countries. Thanks to the fact that they are universal and meet demanding international standards, this is not a problem. Alcadrain distribution warehouses and sales teams in countries outside of the Czech Republic provide flexible communication and service to our customers.

CZECH PRODUCTS FROM CZECH ENGINEERS

Quality, technical solutions, innovation, design – these are the primary characteristics of Alcadrain products. High level of professionalism and skill of our Czech technicians is based on the historical tradition of Czech industry, which is over 100 years old, and renowned worldwide for its top quality products that are modern and extremely reliable.

ALCA – A PREMIUM BRAND

The premium brand ALCA incorporates a range of design products with high utility value. Alcadrain is the creator of the new trends in sanitary technology. Our cooperation with leading Czech designers in creating new product lines has won us several prestigious awards.

ECOLOGICAL PRODUCTION

Alcadrain company is a long-term investor into ecologically friendly production. The reduction of the negative impact of its production on the environment is one of the company's top priorities. That is why the production processes are designed in ways that prevent waste creation and any waste that may be produced can be re-used in production. The residual production heat is also recycled and used to heat buildings or, once it is transformed into cooling through the process of trigeneration, is used to cool machinery. The continual modernisation of the production process reduces the company's demands on electrical energy consumption. Furthermore, part of this electrical energy consumption is produced from renewable resources emanating from the production process.

FLUSH PLATES NIGHT LIGHT AND FLAT – WORLD DESIGN

Alcadrain indicates trends in the world of design. This is confirmed by two awards, which the company received in recent years. Prestigious iF Design Award 2018 evaluated the novelty – touch-free flush plate NIGHT LIGHT – the winner in the Product category of the Bathrooms section. Their predecessor, the collection of flush plates FLAT, was rewarded by the jury at the Red Dot Award product design competition in 2014.

faster

Alcasystem

is one solution for technical wiring in the construction of bathrooms, toilets and kitchens.

Above all, it opens up completely new possibilities for self-help construction as well as for large projects. Significant acceleration, sophisticated technology and cost savings.

A wall up to 6 meters high and arbitrarily wide can be built from three basic elements

Even a less qualified worker without extensive construction experience can handle it. We can also assemble the pre-wall for you and deliver it to the construction site.

Innovation in the pre-wall installation systems ALCA

INNOVATION IN ATTACHMENT OF AN ANGLE VALVE TO THE CISTERN

Easier and faster installation to the water supply

Innovated cistern with a new all-in-one angle valve Shell.

INSTALLATION HOLES

Universal installation options

Thanks to the holes in the mounting frames, the installation system can be easily mounted in to plasterboard constructions, portable cabins or wooden constructions.

THREADED ROD WITH GROOVES

More convenient installation of WC bowl

The threaded rods newly include a groove for a speedier installation.

NEW RELIABLE FILL VALVE

Silent, fast, exceptionally durable

Specially developed for the pressure range of 0.05–1.6 MPa (0.5–16 bar). Exceptionally resistant to impurities in water.

EASY LOCK – A SET FOR WALL MOUNTING

Faster and easier installation

New construction solution allows an easy mount of the frame to a wall in half the time.

Exact setting

Optional additional adjustment to an optimal position using an allen key accessed via the front of the frame.

NEW CISTERN HANGING CLIPS WITH TWO-COMPONENT INSULATION

Anti-noise solution/insulation

Thanks to the two-component material, the transmission of vibrations from the attachment between the cistern and the frame is isolated.

Convenient installation

The tilting of the cistern forward allows the installation in to a plasterboard construction, portable cabins and wooden constructions.

WC TABLETS DISPENSER

Perfect hygiene of the WC bowl

Discreet hygienic solution for all types of ceramic WC bowls. Also ideal for rimless WC bowls.

100% compatibility

It is compatible with all standard ALCA modules (with the exception of Slim and WOOD), inclusive of older WC systems.

Dispenser for inserting of WC tablets

- Included with each innovated WC system ALCA *
- Discreet toilet freshener
- Hygienic cleanliness of WC bowl – the ideal solution for rimflow WC bowls

Flush plates INDIVIDUAL

The individuality of each person brings with it individual demands from interior design. That is why we are introducing to the market flush plates that combine attractive colours with extremely resistant surfaces. Thus creating a luxury product in the highest possible quality, resistant to any abrasion or scratching. The flush plates design can be matched not only to the premium water taps of leading manufactures, but also to other bathroom accessories available in the INDIVIDUAL range.

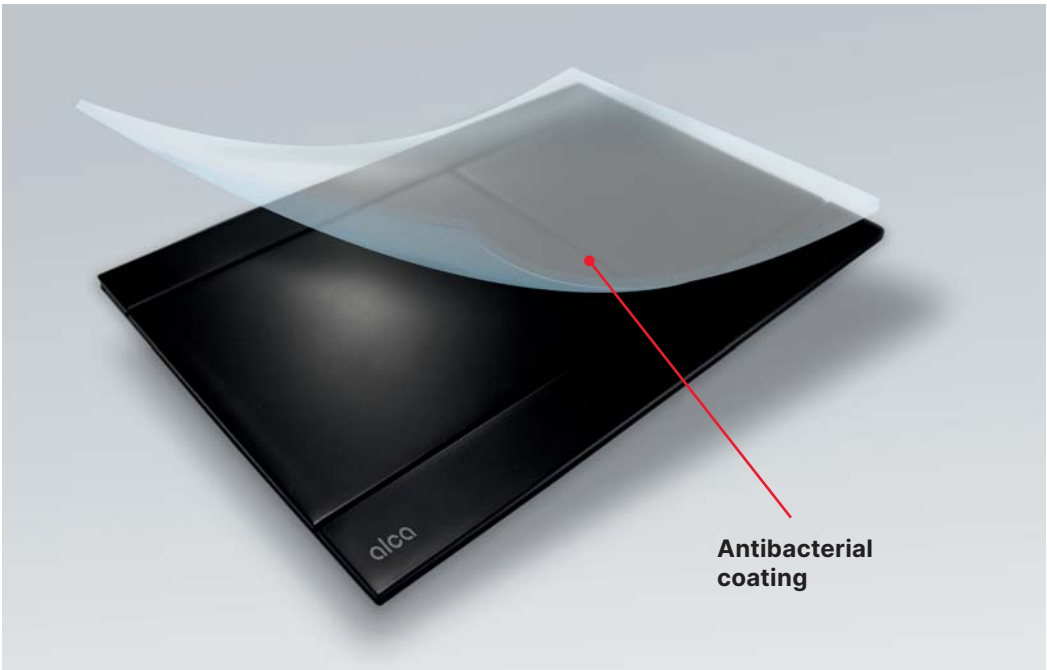

Four colours in two finishes

The best-selling flush plate FLAT FUN, the holder of the Red Dot 2014 design award, is newly offered in GOLD, RED GOLD, NICKEL and GUN METAL colours in either polished or brushed stainless steel finish. Whether you opt for the elegant finish in red gold, the dazzling gold, the subtle nickel or the modern gun metal colour, all surface finishes of the FLAT INDIVIDUAL flush plates guarantee the ultimate colour fastness and an extreme scratch resistance.

The complete INDIVIDUAL range can be found on page 200.

Flush plates ANTIBACTERIAL

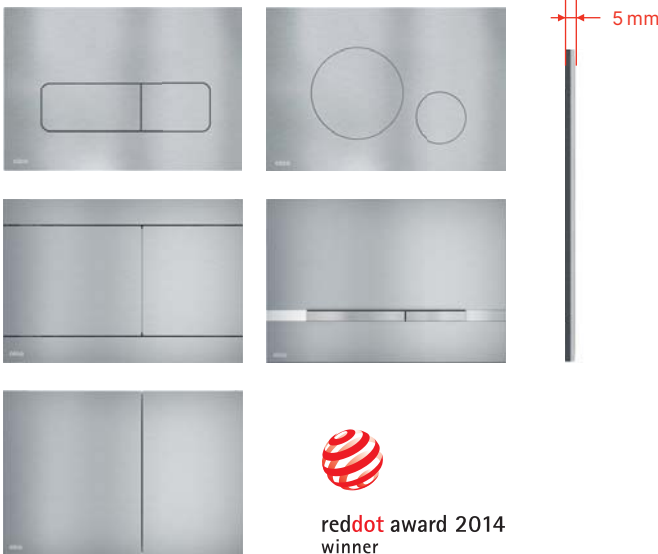

Selected flush plates in black-matt and white-matt finishes come with a new antibacterial surface treatment. The upper transparent varnish contains silver nanoparticles which have antibacterial properties and prevent the spread of unwanted micro-organisms on the surface of the flush plate. When you combine them with antibacterial toilet seats you can prevent the spread of bacteria in your bathroom more efficiently.

Safe environment without bacteria

The cleanliness of the toilet area is still a very important criteria when judging how people feel within it. Our unique technology in the surface treatment of selected flush plates ALCA creates an impeccable film which prevents the spread of bacteria. Because of their easy maintenance, they are ideal for the use in public areas where these specially treated surfaces are desirable (hospitals, restaurants, schools).

Flush plates FLAT

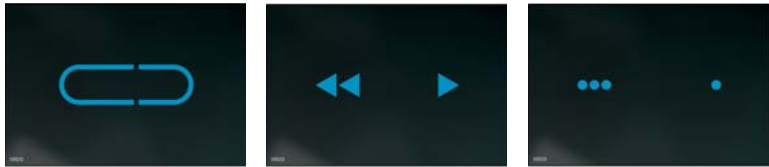

New flush plate MOON
We have refreshed a range of popular metal flush plates FLAT – let us introduce the new flush plate MOON. We offer this timeless minimalist flush plate design with pleasantly rounded edges in various material versions: standard brushed aluminum alunox-matt, elegant white-polished, extravagant black-matt or brass in line with actual trends.

Flush plates touch-free

Touch-free flush plates NIGHT LIGHT, the winner of the international competition iF Design Award 2018 in the Product category of the Bathrooms section. Three design variants and sophisticated system of backlight settings and other parameters enables a unique look to any bathroom or toilet.

Barbora Škorpilová
Architect, designer and the creator of the FLAT flush plates, NIGHT LIGHT and M370 for Alcadrain, Barbora is today known for her association with the MIMOLIMIT studio which she founded in 2001.

Flush plates THIN

Flush plates and sensors

The flush plates THIN thanks to its flat profile stand out only five millimeters out from the tiling. They are available in 3 designs and six surface finishes – white-polished, white-matt, chrome-polished, chrome-matt, black-matt and gold-polished. All THIN flush plates will be with tilting for easy insertion of toilet tablets.

Antibacterial surface treatment of matt flush plates

The popular flush plates THIN in white-matt and black-matt finish have a new antibacterial treatment. The upper transparent varnish contains silver nanoparticles, which have antibacterial properties and prevent the spread of unwanted micro-organisms on the surface of the flush plate.

New side fill valves

We have designed the brand new range of fill valves primarily to be fast, exceptionally resistant to impurities contained in water and to perfectly withstand a wide range of pressures 0.05–1.6 MPa (0.5–16 bar) in various countries around the world.

EASY MAINTENANCE AND FAST SERVICE
Cleaning the filter using **CLICK system** without a need of dismantling the tube

INCREASED DURABILITY AGAINST IMPURITIES
Secured by a **conical shape of the filter**

EXTRA FAST FILLING
Twice as fast filling without the use of a water flow regulator

SILENT FILLING
With a regulator of the water flow

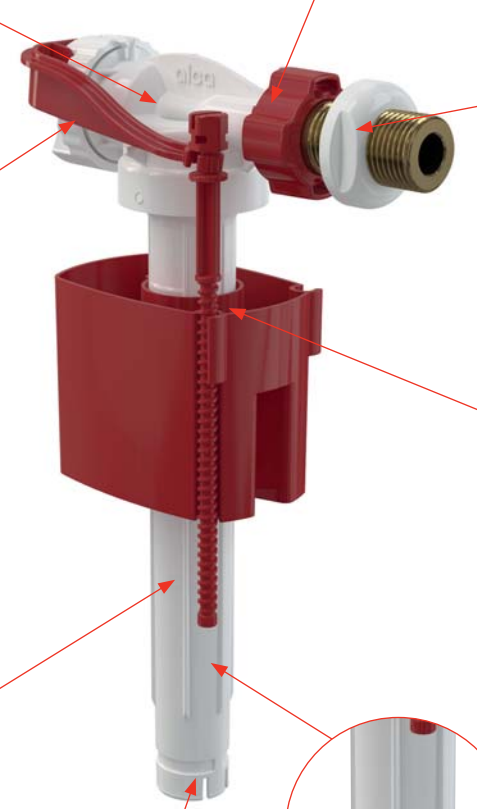

MAXIMUM RELIABILITY
The new membrane works even within the water pressure fluctuations of **0.05–1.6 MPa (0.5–16 bar)**

NO RECOIL
Thanks to the smooth closing of the valve

LONGER LIFETIME
The fill valve is made of a material which is **more resistant against limescale**

UNIVERSAL
Designed for plastic and ceramic **WC cisterns and pre-wall installation systems**

ALWAYS THE SAME WATER LEVEL
Regardless of the water pressure in the pipes

WC seats

SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterised by its slow seat closing action. The mechanism within the hinges of the WC seat ensure a smooth and quiet closure onto the ceramics. A big advantage of this system is to protect the WC pan from damage caused by accidental dropping of the seat. It also ensures greater safety and comfort for the user when handling the seat. It is particularly suitable for public areas and for families with children.

Antibacterial

The majority of ALCA toilet seats have antibacterial properties. The Antibacterial properties are achieved by the Silver compounds within the material. Testing has proven that the bacterial density on the WC seat surface is reduced.

Duroplast

Toilet seats made of high-quality Duroplast material will satisfy even the most demanding Customers. Duroplast material greatly reduces discomfort of sitting on a cold surface of a WC seat.

CLICK system for easy cleaning

CLICK system on WC seat hinges allows for easier and faster cleaning of the WC pan and seat itself. The seat is released from the pan by pressing the two buttons on the inner side of the seat hinges, allowing it to be lifted clear for cleaning. The seat is easily and quickly returned to its original position by pressing it back onto the hinges.

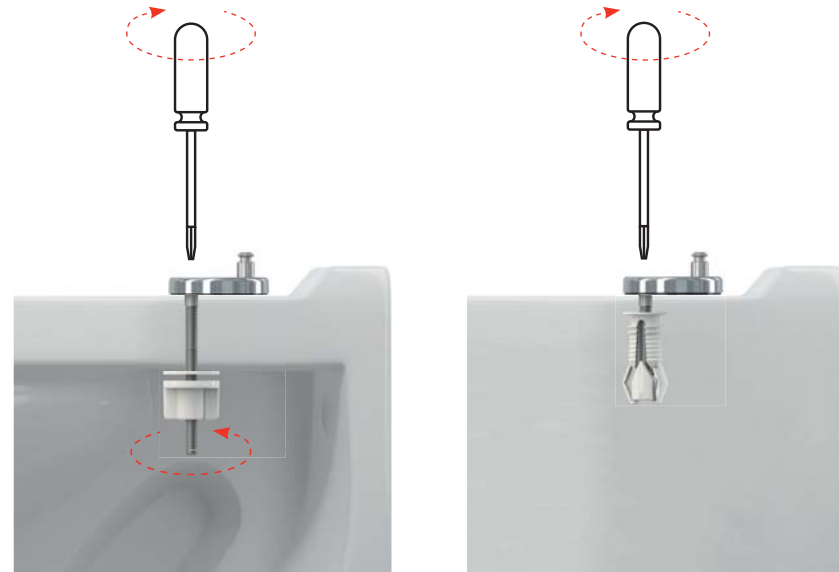

Setting of hinges for perfect compatibility

Easy mounting of ALCA seats onto the WC pan is guaranteed thanks to the large range of possible adjustment of the seat hinges. This together with the shape of the WC seats enable them to be fitted to many types of ceramics. The hinges are made of stainless steel and are white powder paint coated to blend them into the ceramic surface, this also ensures long life and durability.

Comfortable top mounting

For Duroplast seats with CLICK system we offer an alternative to the classic bottom mounting hinges. Designed for toilet bowls with limited access the hinge system can be mounted and tightened from the top surface only, eliminating the need to gain access from below.

The integrated seat insert with magnetic holder

Duroplast seats A603 and A606 are equipped with a fully integrated infant potty seat insert. It is attached to the hinge pins and can be easily removed. The insert is made of lightweight polypropylene material so that a child can safely and simply manipulate the seat. When not use the potty seat insert is retained magnetically by the seat cover allowing normal adult use.

WC Seats with print

We also offer WC seats with color printing with three themes – flower, shell and zen.

STAINLESS STEEL

These grids have the following codes:
DESIGN – the basis is a stainless steel U-profile, with rounded edges. Two different finishes are available: polished and brushed matt.
POSH – a solid stainless steel plate is attached to the standard U-profile, with clean lines and well-defined edges. Surface finish is brushed matt.
Load class – K3.

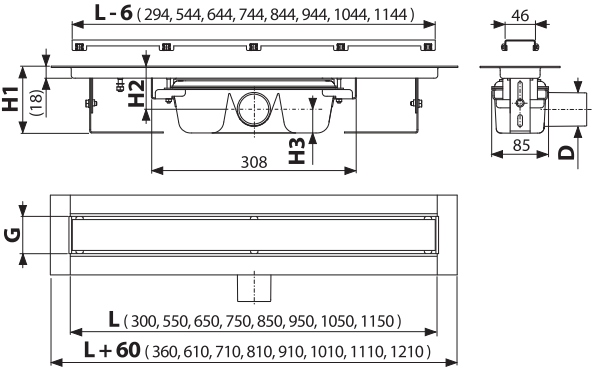

GLASS

These grids have the following codes:
GL line – tempered glass
The grids are based on stainless steel U-profiles to which a solid piece of tempered glass is attached, available in a range of colours and with a high gloss finish. The special, toughened glass conforms to the relevant safety regulations EN 12150-2.
Load class – H15.

Shower drain APZ15 Marble

The new generation of stainless steel shower drains APZ15 is aimed especially for design fans. The water is drained by two slots in the pavement of the bathroom that hides the stainless steel shower drain without edges. The view is not optically disturbed by the stainless steel edge neither on the grid nor on the shower drain. Naturally functioning secondary drainage will ensure outflow of moisture under the pavement back into the shower drain body.

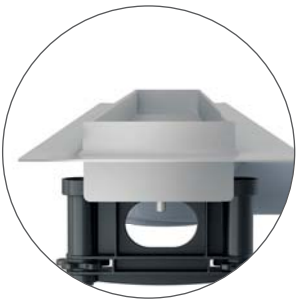

Advantages of the shower drain:

- Design shower drain is suitable for any paving thickness and for large format natural stone boards
- Water drainage is ensured by the slot in the pavement
- Uniform floor surface in the bathroom is achieved by the innovative shower drain and grid construction without edge
- The upper side of grid is covered with a special rough surface to ensure a safe bonding with the embedded tiles

APZ13 Fit and Go

All in one package. Shower drain APZ13 with two-sided grid DOUBLE
Set APZ13 Fit and Go includes shower drain, low odour trap APZ-S9 (81 mm) and two-sided grid DOUBLE. Fit and Go provides solutions for fast and easy installation.

APZ13-DOUBLE9 Fit and Go
Shower drain
(550, 650, 750, 850, 950 mm)

Package content

- Shower drain APZ2012-OPTION6
- Two-sided grid OPTION (full grid or grid for tile embedding)
- Waterproof tape at the length of the linear drain
- Low odour trap P142
- Anchoring kit (screws, dowels)
- Installation legs
- Dismantling hook

Two-sided grid OPTION

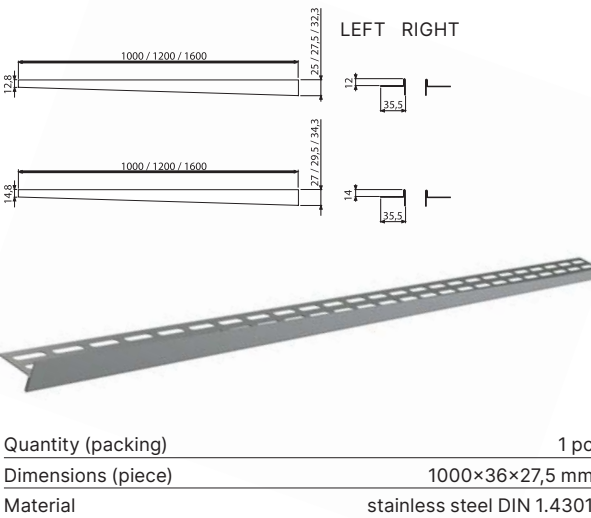

The grid OPTION provides a choice – either a full stainless steel grid or simply by turning the grid for embedding tiles. The final decision can be made even after installation of the shower drain without any construction modifications. Two-sided grid OPTION offers both grid versions in one.

LOCK

- The lock prevents unintentional opening of the lid, overflow of water during heavy rains
- Prevents the access of children at play
- If necessary, it is possible to remove the lock from the rain drum

BASKET FOR LEAVES AND DIRT

- Captures coarse material (mainly leaves) and prevents clogging of sewer pipes
- The narrow bottom with ribs allows a gradual fall through of rotting leaves into sewerage
- Basket can be easily removed for cleaning

MATERIAL

- PP enriched with glass fiber
- Resistant to mechanical and thermal damage
- UV stable – resistant to plastic degradation and fading
- In black or grey colours

INLET RINGS

- They are part of each package
- Diameters 80, 90, 100, 110, 125 mm
- They allow the connection of all types of roof gutters and downspouts

FLAP

- Frost-free odour trap – limits the transmission of gas from canalization
- Prevents the passage of rodents from the waste
- Closes under its own weight and is secured against flooding
- Restrict splashing water from the rain drum when removing the lock case

CONSTRUCTION

- Resistant to deformation during assembly and to the load (class K3 – bearing capacity of 300kg)
- Ribbing ensures stability on the spot
- Steeper gradient of the rain drum body enables a faster and bigger water flow towards the sewer
- Flow rate 390 l/min.
- Diameter of 110 mm, 125 or 125/110 mm

Determining the lenght of ALCA bath wastes

Determining the necessary length of the bath waste for different bathtub models is very easy. The waste hole in the bottom of the tub and an the overflow opening in the wall of the tub are combined perpendiculars (Hmax and H2). By adding the perpendicular lines, then we get the desired waste length (L).

Hmax + H2 = L

Complete assortment sanitary technology and piping systems

alcadrain

Sanitary systems

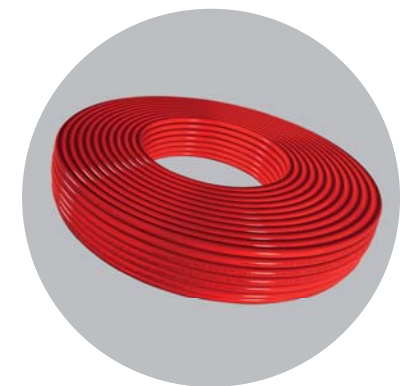

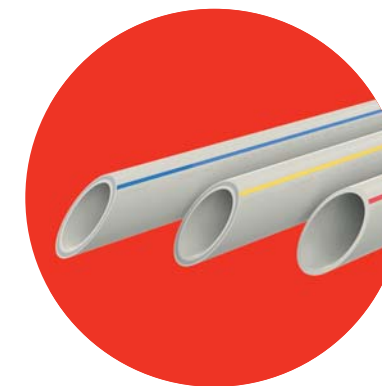

Alcadrain was founded in 1998 as a family-owned Czech company under the name Alcaplast, and in 2022 it changed its name as part of the Alca Group. It is the largest manufacturer of sanitary ware in Central and Eastern Europe, producing more than 600 sanitary ware products on the area of over 60,000 m² – valves, traps, WC systems, shower drains, floor drains, toilet seats and other products.

alcapipe

Piping systems

The company FV - Plast was founded in 1990 with the aim of producing quality plastic piping systems for water distribution and heating. In 2021, it became part of the Alca Group. After more than 30 years of production, development and innovation, it now processes polyethylenes, polypropylenes and polybutylenes into many types of pipes, fittings and accessories. It is the largest manufacturer of PP-RCT pipes and fittings in Central and Eastern Europe.

alcafix

System Walls

Alcafix was established in 2022 within the Alca Group. It deals with the production of modular systems for the construction and reconstruction of bathrooms and toilets. These prefabricated walls integrate Alca's sanitary technology and piping systems and are used both in larger development projects and in the construction of family houses or reconstructions.
