

COMPANY PROFILE

WATER TREATMENT MADE IN ITALY SINCE 1978

www.euroacque.it

2 WATER TREATMENT MADE IN ITALY SINCE 1978.

Euroacque is an Italian company, manufacturer of components for primary water treatment and the maintenance of thermal/ heating systems, for both residential and industrial application.

Today, it is a leader in Italy and well represented abroad, thanks to a widespread commercial network and an advanced after-sales service.

The structure and the products are constantly evolving: the many Italian and European patents are the proof of the desire to respond in the best possible way to the needs of its partners.

Euroacque has its operational headquarters in Niviano di Rivergaro, in the province of Piacenza: a city in northern Italy that has become of great importance from a logistical point of view due to its position; a hub of important highways and closed to important Italian airports and seaports.

SALES/ AFTERSALES NETWORK

50 Commercial agencies

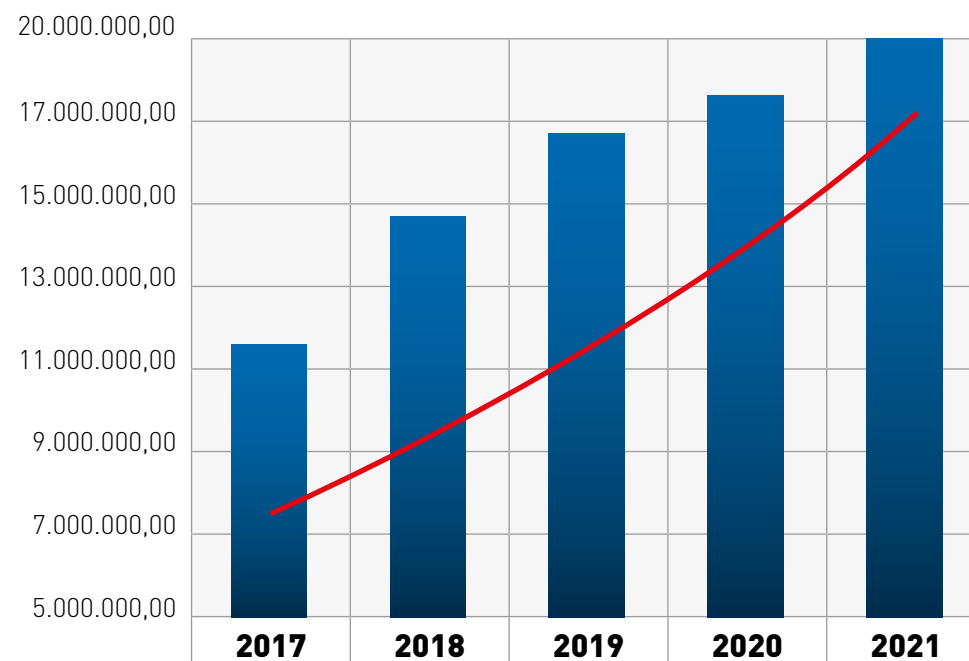

200 After sales services

40 Countries

TURNOVER TREND

OVER 40 YEARS OF HISTORY

3

EUROACQUE by Ubaldo Bordi was born in Piacenza as one of the first companies to start water treatment in Italy, by assembling softeners and filters.

1978

2002

The company moves to its current location in Niviano di Rivergaro.

Paolo and Eugenio Bordi join the company who changes its name to EUROACQUE SRL.

2007

2009

Obtains ISO 9001 certification for "Design, production, servicing and repair of components and systems for the treatment of primary water".

The warehouse area is doubled, allowing greater storage of components and products.

2015

2018

The company enters an important international corporate structure. However, it maintains the historical commercial direction and all the characteristics of the market, sector, products and services.

To cope with the increase in turnover and production needs, all the assembly lines are reviewed and implemented. Warehouse management is automated and an agreement is formalized with an external logistics company in order to speed up deliveries and reorganize the workspaces of the headquarters.

2019

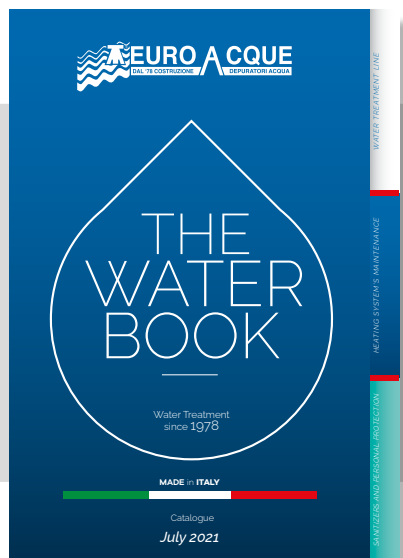

2020

To meet the needs arising from the Covid emergency, Euroacque has created sanitizing products based on alcohol, hydrogen peroxide and sodium hypochlorite, as well as a new line of washing equipment.

4 WHY EUROACQUE

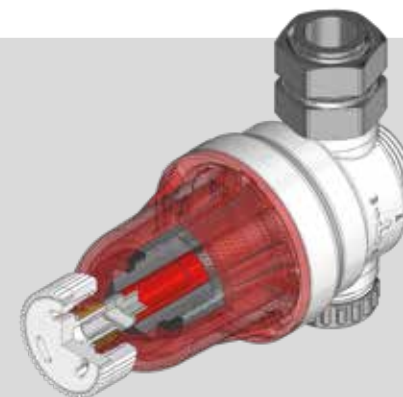

> RANGE

Wide range of products to meet the needs of customers in several sectors: from the small filter for heating circuits to the large water purification system for waterworks.

> KNOW HOW

Ability and experience acquired in over 40 years

> FLEXIBILITY AND CUSTOMIZATIONS

Private labels, OEM

> INNOVATION

Research and development of new products, patented in Italy and Europe. Quality and uniqueness in a constantly evolving market.

WHY EUROACQUE

5

> QUALITY MADE IN ITALY

Internal production and subcontractors on the territory to manufacture all our components

> PRICE LIST

Quality / price ratio at the highest levels to grant the necessary competitiveness to its partners.

> PRE AND AFTER SALES SERVICES

Technical and commercial courses for updating and ongoing assistance

> INDUSTRIAL PLANTS

Standard or customized products for the treatment of large volumes of water: osmosis, multi-treatment filters, sterilisers, dosing stations.
