About

GoMechanic SPARES

GoMechanic Spares is **world's fastest-growing network** of genuine car spare parts. For a long time, the spare parts sector was unorganised & multiple small retailers sold spare parts. The non-reliability of spares, notoriously high prices and non-availability of parts made spare parts procurement a hassle for the customers.

As a customer centric brand, GoMechanic saw a huge opportunity to cater to a vast audience. After careful research of market demand, supply chain networks, procurement functionalities, logistics essentials, and legal formalities, GoMechanic launched GoMechanic Spares, with dedicated focus on the spare parts business.

Launched in 2018 with only one warehouse in Delhi, GoMechanic Spares has flourished as a successful venture with **5 warehouses, 500+ distributors and a presence across 100+ cities in India** & have enabled worldwide shipment with successful dispatches to **South America, Europe, the Middle East, Africa and South Asia**.

We offer a wide range of OEM/OES spare parts to our customers, via a robust network of **1000+ GoMechanic Spares Retailers**. We utilise our vast network to bulk procure spare parts that we store in our central inventories and deliver at our customer's doorsteps.

Our competent and proficient technology caters to all your auto spares needs by bridging the physical-digital gap. It also minimises the efforts required to deal with multiple suppliers for different brands or products.

We promise robust inventory and parts availability, on-time delivery, better serviceability & all global brand product supplies.

Our central inventories and warehouses keep stock of frequently required spare parts using an advanced **Warehouse Management System (WMS)** supported by astute demand forecasting, data analytics and a **Just-In-Time (JIT)** supply chain. The concept addresses the concern of non-timely spares availability and dead stock obsolescence by adopting a dynamic supply approach to fulfil a wide array of customer demands and requirements.

We also launched our wide range of Private Label products in 2020 with Car and Bike Engine Oils. Today we have 200+ SKUs ranging from a wide variety of spare parts and lubricants such as Brake Oil, Coolant, Gear Oil, Wiper Blades and Horns.

TECH - FIRST ALWAYS

Technology has always been the strong point at GoMechanic Spares. And we are not shy to put it to good use. Using bleeding-edge techs like **Artificial Intelligence** and **Machine Learning**, we have enhanced the complete experience from procurement, shipping to management.

Our indigeneous GoMechanic Spares App and website are one-stop shop for **6 Mn+ genuine spare** parts that are delivered directly to the doorsteps of our customers.
