A Polish company with global ambitions

OXIMO is a company with Polish roots, a leader in the automotive industry and a leading brand among manufacturers of windshield wipers. Our story began in 2009, when we offered the first solutions to our clients. Thanks to good knowledge of the industry, rich offer and high standards of customer service, within a few years we have become a professionally managed business organization. OXIMO is also a young, ambitious team of professionals, enthusiastic people, automotive experts.

Today, we are consistently building our position on the market and belong to one of the most recognizable and trustworthy brands in Poland. We are constantly looking for new areas of expansion, we set trends in the automotive industry, and we promote the strategy of sustainable development.

OXIMO's goal and ambition is to become the No. 1 company among windshield wiper manufacturers in the world.

From the very beginning, OXIMO focuses on a rich and transparent offer. We currently have over 400 references of windshield wipers, so we can meet the expectations of even the most demanding customers. As a leader in the industry, we cooperate with the largest automotive wholesalers in Poland and abroad. We provide our business partners with high standards of service through access to the online ordering panel and fast deliveries. We are also consistently developing a distribution network outside the country with the ambition to create a recognizable Polish brand with a global reach.

We have our own research and development facilities, we improve our products and introduce new innovative solutions to the market.

For years we have supported, promoted and participated in activities related to motorsport. We are a partner in the largest automotive events, rallycross events, we also have our own team participating in time attack races.

We have all the required certificates, such as the German TÜV, international REACH and the Polish National Institute of Hygiene, which mean that our wipers do not contain any substances harmful to health.

Flat wiper blades U type holder

Frameless wiper blades, lengths 300 - 700 mm. Fixing type-U 9 mm and U-type 8 mm in one. Wipers of this type are characterized by fastenings on so-called U shaped „hook“. The metal parts are made of durable, high-carbon steel, completely galvanized, for long-term and effective protection against corrosion.

Flat wiper blades U type holder 12 mm

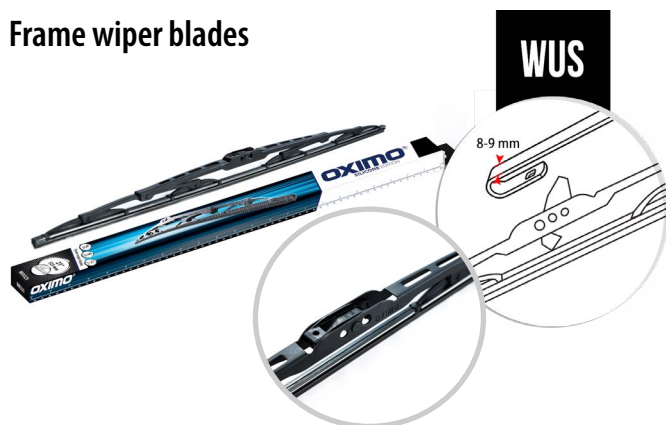

Frameless wiper blades, lengths 650 - 700 mm. Fixing type-U 12 mm. Wipers of this type are characterized by fastenings on so-called U shaped „hook“. The metal parts are made of durable, high-carbon steel, completely galvanized, for long-term and effective protection against corrosion.

Hybrid wiper blades U type holder

U-type Hybrid wipers, U-9mm fixing. Innovative combination of frameless and frame wiper thanks to which the wiper pressure is evenly distributed even when the windscreen is bent. The metal parts are made of durable, high-carbon steel, completely galvanized, for long and effective protection against corrosion.

Frame wiper blades

U-type wipers with frame construction, lengths 275 - 700 mm. Included U-Type 9 mm and U-Type 8 mm adapters, which enable mounting on: a side spindle (older cars from the USA) and a rail with a screw (older Japanese cars). The metal parts are made of durable, high-carbon steel, completely galvanized, for long-term and effective protection against corrosion.

Frame wiper blades with spoiler U-type holder

U-type wipers with frame construction with spoiler, lengths 475 - 700 mm. Included U-Type 9 mm and U-Type 8 mm adapters, which enable mounting on: a side spindle (older cars from the USA) and a rail with a screw (older Japanese cars). The metal parts are made of durable, high-carbon steel, completely galvanized, for long-term and effective protection against corrosion.

Frame wiper blades with sprayer U-type holder

U-type wipers with frame construction with integrated sprayer, lengths 550 - 650 mm. Included U-Type 9 mm and U-Type 8 mm adapters, which enable mounting on: a side spindle (older cars from the USA) and a rail with a screw (older Japanese cars). The metal parts are made of durable, high-carbon steel, completely galvanized, for long-term and effective protection against corrosion.
