SOS LIGHT is our **LED warning lamp** providing instant warning of the vehicle in case of failure or accident, in combination with the warning triangle.

SOS LIGHT ensures **greater visibility** than the traditional warning triangle, **increasing the safety of road users**. Thanks to the powerful flashing light, **SOS LIGHT attracts attention** much more than the simple reflection of the emergency triangle.

SOS LIGHT provides an **effective signaling both day and night**, showing the presence of a broken down or crashed vehicle even at **long distance**.

LED warning light with rechargeable battery

SOS LIGHT with its **compact design** makes it close at hand in emergency, fitting for example in every glove compartment.

In case of vehicle breakdown or accident, the instant warning of the breakdown site from a distance it's very important, even before placing the emergency triangle.

SOS LIGHT **magnetic base** allows quick and easy mounting directly on the highest part of the vehicle allowing an all-round warning signal.

The button placed on the back of the device allows its **quick activation** and shutdown.

Battery	Li-ion 2000 mAh 3,6V
Recharge voltage	5VDC
Charging Current	0,5 Amp
Recharge Time	5 hours
Autonomy	5 hours

Designed with nine high-performance LEDs **SOS LIGHT** generates **a very effective flashing light both day and night.**

Ready-to-use thanks to the **rechargeable battery**, **SOS LIGHT** provides **5 hours of autonomy** (battery status LEDs integrated in the device). Charging cable for USB power supply completes the product.
