Talosa initiated its activity of manufacturing and distributing automotive aftermarket components more than 63 years ago. Ever since then, its essential commitment has been adapting and integrating to the manufacturing process the methods and improvements which enabled us to offer first-quality products and an optimum service which is adapted to the necessities and demands of the market.

At the beginning, in 1957, Talosa used to manufacture sheet metal wishbones for 5 models including Dauphine, Renault 4.4, Citroen 2CV, Fiat/Seat 600 and 850 which are considered as classic vehicles. At present, we manufacture control arms, ball joints, tie rods and rubber-metal parts for more than 3.000 car models. Moreover, we develop around 1.200 new references each year as a result of which we keep offering a fully updated catalogue.

Our future will keep being based on the same ideas which accompanied us since the beginning of our project; expanding our catalogue, employing productive methods of the highest standart which will surely allow us to maintain a high level of quality and to optimize the staff and logistics solutions in order to ensure an optimum service.

Talosa, with its staff of 2.400 people at your disposal.

2.750 items

 **BALL JOINT, TIE ROD, TIE ROD END and AXIAL**  
3.050 items

 **STABILIZER LINKS**  
1.400 items

 **RUBBER METAL PARTS**  
4.500 items

## INTEGRATED IN-HOUSE PRODUCTION

Our in-house production give us the capacity to control and to check all different manufacturing processes.

### R&D

Talosa products are developed by following **OE Standards**.

### MOULD PRODUCTION and MAINTENANCE IN HOUSE

- Steel
- Aluminium
- Rubber-Metal Injection Moulds
- Sheet Metal

### ALUMINIUM FORGING

### STEEL FORGING

### SHEET METAL STAMPING

### RUBBER VULCANIZING PROCESS

### CNC MACHINING PROCESS

Automated machining capability  
3.000.000 units per month.

We invest in continuous improvement.

## INTEGRATED IN-HOUSE PRODUCTION

### BALL PIN CONTROLS and WELDING ROBOTS

**100%** crack control by eddy current and optical dimensional control.

Talosa is also investing in welding robots controlling constant welding penetration.

### E-COATING PROCESS

Talosa is the only aftermarket company with integrated e-coating process.

### AUTOMATIC ASSEMBLY LINES

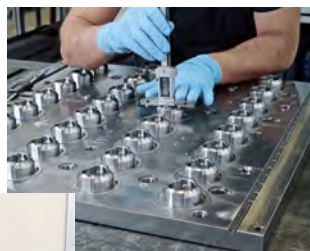

Talosa products are assembled in last generation automatic lines which ensure an standardized production.

### QUALITY CONTROL

Quality control, with dimensional and life test's are made constantly to ensure the quality of our products.

**10.000** tons Steel/Year.

**3.000** tons Aluminium/Year.

## Integrated R&D Department

One of most important Talosa's values is the capacity to integrate all developing and manufacturing processes in house. Our R&D department works with the most advanced technology to develop, analyse and manufacture by monitoring all the manufacturing processes with the objective of obtaining a product with design and quality equivalent to original equipment.

### Car park diversification.

One of Talosa's strong sides is to "give solutions" to our customers-partners on this continuous park diversification.

Thanks to continuous investments, we develop **1.200 New References/Year** for multi brands.

## Quality Control in All Manufacturing Process

R&D department is integrated into the company structure, formed by 90 engineers that take part and lead the whole process including design, development, material analysis and monitoring of the production with the aim of obtaining a product which is equivalent to the original equipment in terms of design and quality.

- Dual channel spectrometer
- 500x optical microscope
- Structure analyzing visualization
- Solidity measurement
- Pull & press testing

- Life time test
- Fatigue test
- Durability test
- Tough climate test (-40 c)
- Wishbone 3 axes test

Whole process is carried out with the most advanced methods and technologies which let us achieving that with design, material analysis and product quality tests we can offer a high standart of quality and warranty for the items we manufacture.

ISO 9001 - TS 16949 - ISO 14001 - OHSAS 18001

# TALOSA RUBBER-METAL

**Experience, Quality and Service,**  
direct references in all Talosa product ranges.

The continuous development of new references has allowed us to configure for 2021 a wide and versatile catalog with multiple solutions and references in **RUBBER-METAL** components for all types of European, American and Asian vehicles.

Talosa, leader in components and aftermarket solutions.

## Rubber-Metal

 Talosa is continuously investing to increase chassis parts availability. Rubber-metal parts are one of TALOSA company's targets as we offer our partners the most extensive product range for European, Asian and American cars.

 Considering the demands and feedback of our customers, Talosa rubber-metal catalogue is composed of silentblocks, engine mountings, hub carrier bushes, transmission mountings, knuckle bushes and anti-roll bar bushes.

Worn supports have an adverse effect on driving control and security. Talosa products are tested to ensure softness and comfort.

 **500** New references per year endorse our ability to give to our customers the most updated market catalogue.

## **RUBBER-METAL**

- **98%** OF THE PRODUCTS FULLY MANUFACTURED IN TALOSA.
- INTEGRATED IN-HOUSE PRODUCTION ADDS AN EXTRA VALUE TO THE QUALITY OF OUR PRODUCTS AS IT FACILITATES THE CONTROL AND TRACEABILITY OF THE ENTIRE PROCESS.
- **12.500** REFERENCES AND MORE THAN **3.000** DIFFERENT CAR MODELS.
- FULLY UPDATED COMPLETE CATALOGUE.
- **97%** OF EUROPEAN CARS IN RANGE.
- TALOSA NEW DEVELOPMENTS COVER A WIDE RANGE INCLUDING **2018** CAR MODELS.
- MORE THAN **2.500** REFERENCES FOR ASIAN CAR MODELS.
- CONTINUOUS PRODUCT DEVELOPMENT FOR ASIAN MODELS.
- **1.200** NEW REFERENCES PER YEAR.
- NEW ITEMS ARE DEVELOPED BY CONSIDERING THE DEMAND AND FEEDBACK WE RECEIVE FROM OUR PARTNERS.
- TECDOC PRESENCE.

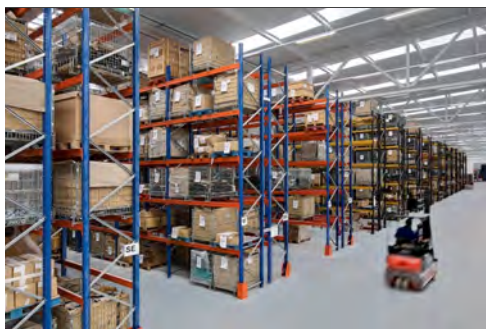

## International logistics distribution

Talosa is present in more than **70** countries.

## High stock level

Our automated warehouse management enables us to give a fast and effective service to our partners.

**talosa**  
The Power of the Leader

FUTURE

*New future project,  
introducing new ranges of components  
to be the integral aftermarket solution.*

*We advance for you, advance with us!!*
