# Auxiliary drive kit

Industrias Dolz introduces its new range of products: Auxiliary drive kits.

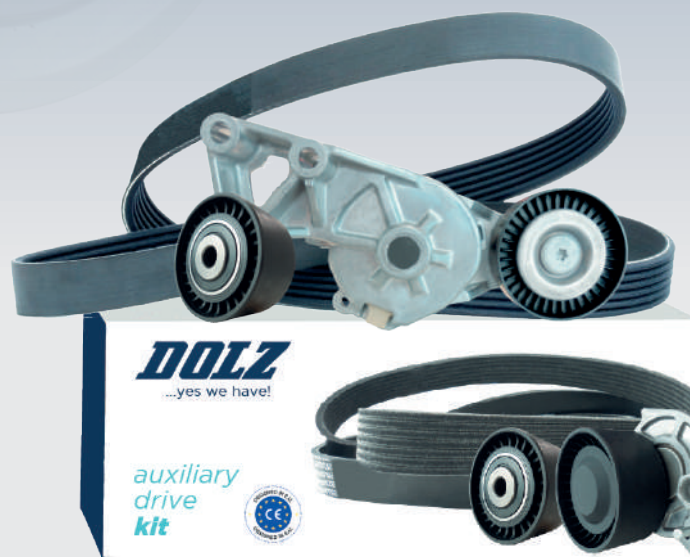

Modern applications evolve offering greater vehicle comfort and safety, resulting in increasingly complex vehicle systems. Today's vehicles have become more sophisticated than ever, incorporating more and more accessories that are activated through the auxiliary system.

All DOLZ kits meet existing OE quality and adaptability standards. They include all the necessary components for a professional repair, that is all components are delivered in one package:

**V-ribbed belt or auxiliary belt, pulleys and idlers, drive tensioners** and all the necessary accessories depending on the vehicle application.

With almost 90 years of history in the sector, our experience allows us to offer a complete range of Auxiliary Drive Kits, expanding our range of transmission products.
