

SM Motorenteile

Engine Parts in Original Equipment Quality.

www.sm-original-germany.com

An engine is always only as good as its components.

Successful engine construction and reliable engine maintenance, to a great extent, depend on the quality of its components which are employed. This is why the standard of SM engine parts is always the OE specification – out of conviction, for more than 25 years!

Experience

Since the foundation of the company in 1978, we have concentrated solely on the manufacture and marketing of engine parts. Over this period of time, our know-how has taken on international dimensions – with the result that specialist dealers and workshops in over 70 countries appreciate SM Motorenteile as a competent partner and key supplier.

Quality

Modern high-precision production methods guarantee a manufacture of components in a consistent and repeatable quality. Thorough inspections during the production process ensure products of the highest standard. Our production sites are certified in accordance with ISO 9001 and TS 16949.

Variety

The breadth of our product range ensures that you will receive all parts from us that you need for many work steps – in other words from a single source.

Reliability

A well-founded expertise and a powerful, modern distribution are providing for the high quality and delivery capacity of SM Motorenteile.

Material

SM engine parts are made from materials that are the equivalent of the Original Equipment Material. By the way of complex checks and uncompromising selection, we ensure that only perfect materials are used in production.

Price

A highly rationalized, automated large series production is the reason for the excellent price / performance ratio of SM Motorenteile.

SM Motorenteile.

Partners in engine construction for over 25 years.

Complete systems in OE quality for the Aftermarket, high-precision components for Original Equipment, engine parts of the highest quality – this is SM Motorenteile! As an international system provider for high-precision components, we are the partner of many industrial enterprises in the automotive sector, in the metalworking

industry and in the Aftermarket. Our products are globally applied to all kinds of engines, air compressors, transmission systems, pumps and attachment parts. Due to our customer-oriented logistics which is centrally controlled by our warehouse in Asperg, we guarantee a just-in-time delivery.

A global distribution network for an area-wide supply.

For the international distribution of our products, we have established a global distribution system. This network of representatives and warehouses in the whole world is always ensuring a perfect supply to our customers.
