# Expert knowledge for you.

The Koch-Chemie CompetenceCenter in Unna is our center for training and knowledge transfer. Equipped with a wet and dry area as well as a polishing center, our Research & Development department uses the different zones for internal product tests to put innovations and further developments to the test. The CompetenceCenter is professionally equipped for our regular training courses on professional vehicle preparation, individual customer-specific training courses and also online training courses for distributors and customers worldwide. Our aim is not only to share our expertise with you, but also to directly exchange information about the latest trends, findings and needs. Thus, our training approach is another piece of the puzzle in Koch-Chemie system and service thinking.

## Professional detailing

You have just started your own business as a car detailer? You want to set up your car detailing more professionally? Or you are a new Koch-Chemie customer and want to get to know our products in detail? Our training courses will help you to optimize your car detailing business, both practically and theoretically. Our training managers have years of experience in professional car detailing and will pass this knowledge on to you and your employees. Koch-Chemie training courses focus on your needs and questions. Our training courses are compact and precisely tailored to your requirements. As a member of the Federal Association of Vehicle Preparation (BFA), we have therefore developed a unique training system based on the building blocks of the BFA.
