

**Spare parts and
aftermarket kits for
Diesel injection.**

Company Profile.

**Born in
Motor Valley.
Grew up in the
world.**

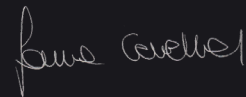

Two generations, forty years of work, millions of diesel motors equipped.

The way in which Star Diesel has become an internationally known and recognized brand is a story we like to tell.

Nico Salomoni
President

Laura Cervellati
Vice President

Marzia Maccari
CEO

Our initiatives. **Thinking differently enriches.**

A company's role is to work in the interests of the community as well as its own. By community, we mean the combination of those who surround us and come into contact with our organization.

For some of them, we help to improve the quality of their lives and encourage their inclusion in the world of labour. We do this by supporting two no-profit organizations that operate in the territory of our city, Bologna:

- Fondazione ricerca fibrosi cistica
- OPIMM

Beyond the **product**. What we **believe in**.

Purpose.

Our goal has always been to make available the broadest and most reliable range of aftermarket spare parts for diesel injection. But it is the way we do it that represents the truly distinctive value of our organization.

In our work, every spare part is essential to the others. It is the same with people. We pay great attention to every one of them to fuel their potential and to enrich the community of which we are all a part.

With one kit after another, we have built up relationships of trust with our customers. In every corner of the world, we have responded to a multitude of needs in the most widely differing sectors. This is our way to generate value and to be an active part of the social and economic progress of the community to which we belong.

Ours is an evolving path, made of promises kept and new goals to be achieved, towards development models that are ever more inclusive and relevant for people. Those who choose a Star Diesel spare part are doing far more than just repairing an injection pump.

Values.

Customer satisfaction and respect for personal values.

Strategic planning and daily work have the same inspiring principles.

Ongoing improvement, reactive capacity.

Governing changes, responding to the market needs, never letting anyone fall behind*.

Honesty and correctness.

Transparency in all our deeds and words. Including those written on our labels.

*During the Covid period, the DTM Ricambi management, with a dedicated shift management policy, saved its staff from job losses.

Our pillars. Listening, history and a bond called trust.

✓ **Every solution starts with listening.**

This is the rule on which we base every form of growth, professional and human.

✓ **Our history is the treasure on which we draw.**

The experience of the company's founders is the path along which we walk every day. Our task is to enrich it with new concepts.

✓ **Earlier, a handshake was enough. Now it takes even less.**

The customer's trust is a goal to be sought over time. Achieving it took us years of promises kept and spare parts that work.

Star Diesel, **today**. The highest standard, **ours**.

The “**revolutions**” of our motor.

We are specialists in diesel injection, common-rail and conventional. During a history lasting almost half a century, we have created an international company, diversified and vertical, that distributes over 365,000 kits every year.

6 sectors dealt with

- ✓ Automotive
- ✓ Transport
- ✓ Agriculture
- ✓ Industrial
- ✓ Excavation
- ✓ Marine

3 product lines

- ✓ Repair kits
- ✓ Spare parts for injectors
- ✓ Spare parts for injector pumps

1 constantly enlarging catalogue

- ✓ 10.000 items available to online order

Our **history**. Precursors of the **single-use kit**.

Market milestones.

The mechanical workshop was transformed into a commercial organization for the distribution of spare parts for diesel injection. Franco Salomoni and Silva Bernardoni were joined by Fabiana Bombardi and Sandro Cervellati.

Opening of the first international market: Argentina.

The STAR Diesel offer, divided into three catalogues, was enriched and rationalized by the publication of a single catalogue.

STAR Diesel renewed its management. The first generation was succeeded at the head of the company by the second: Laura Cervellati, Marzia Maccari and Nico Salomoni.

We began in Via Zanardi, Bologna, as a mechanical workshop founded by Silva Bernardoni and Franco Salomoni.

The spare parts sector was suffering from an excess of unused warehouse stocks. Franco Salomoni launched the single-use kit that solved the problem: customers could just order what they needed.

First attendance at an international trade fair, the Automechanika of Frankfurt. Expansion abroad called for a new look. Thus was born the STAR Diesel brand.

The catalogue became an online B2B portal containing over 15,000 items, from repair kits to injection pumps and conventional spare parts.

An important anniversary. 40 years had passed since the opening of the mechanical workshop in Via Zanardi.

The Team. Ready for the future.

It is natural and fundamental to think for tomorrow. It is part of our inheritance as a family company. When the time came, those who had piloted the company, making it what it is, entrusted it to a new management able to ensure vision, growth and compliance with its guiding principles.

The value of skills. Thousands of spare parts, one certainty.

We are organized to support the distributor in Buenos Aires no less than the Diesel Center in Munich and the spare parts dealer in Pesaro. With the same quality of service. We invest in people's skills to ensure efficiency and in-depth responses.

Global vocation. We export our kits to over 64 countries.

Distributors, resellers, spare parts dealers and diesel centers in a world that relies on the brand with the star.

Revenue by geographical area.

Our products.

Quality, certification and traceability.

The aftermarket universe offers an indescribable quantity of options, the origin of which is often unknown. We avoid this risk of anonymity by stamping the STAR Diesel trademark on all our spare parts. A guarantee for our customers, for the end user, and of solidity towards the market on the part of our organization.

A range without bounds.

If we do not have it, we will develop it.

The breadth of our product range renders us unique in the diesel injection sector. We satisfy the needs of national and international customers active in various sectors, including strategic ones, always ensuring compliance with the highest qualitative standards.

Macro product – families.

- ✓ Workshop equipment
- ✓ Fuel filters
- ✓ Bolts, screws, valves
- ✓ Repair kits and toolbox sets
- ✓ Spare parts for common rail injection
- ✓ Spare parts for conventional injection
- ✓ Spare parts for petrol injection
- ✓ Spare parts for pump/heavy duty injectors
- ✓ Fuel tubes and accessories
- ✓ Fixing elements
- ✓ Feeder and complete pumps
- ✓ Pulverizers, pumping elements and valves

Added value.

The Research & Development department.

Every day we improve our existing products and add new ones to the catalogue. We develop customizations and adaptations when the market has no solutions to offer. We test each component and we answer without intermediaries for any defects or anomalies. We innovate our processes and equipment constantly.
