

LIGHTS UP **YOUR** WAY

DOWNLIGHT

Life-saving lighting system downlight.

See clearly now - BE SEEN!

Light around the vehicle.

The lamps have a special authorisation from the Department For Transport to be used on all UK roads.

0501

Dual Voltage

Bracket 1

The downlight defines an 'area of high risk' along the entire side of the vehicle, projecting light to the ground.

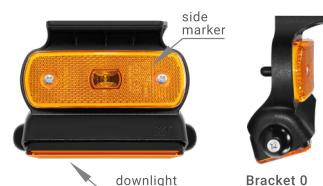

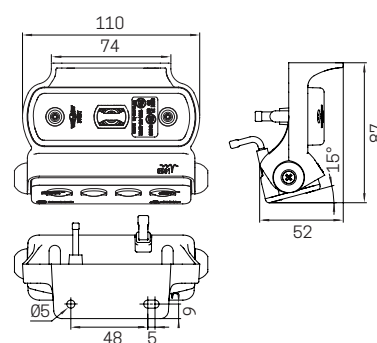

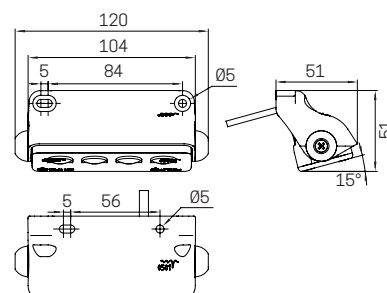

The illuminated area allows the driver to have an exact notion of the space and safeguards the safety of other road users.

High intensity LEDs with low power consumption.

"When operating local council vehicles they are often amidst vulnerable road users in streets or towns etc. All work vehicles and their operatives have a duty of care to the surrounding public and themselves with regards to public and personal safety. The Vehicle Avoidance Lights (VALs) can project an 'area of high risk' around the vehicle which should be kept unobstructed. By doing so this helps to ensure the safety of those in close proximity to the vehicle."
