## WOLF DELIVERS MAXIMUM PERFORMANCE WITH NEW RACING LINE RANGE

- **New range of race-to-road formulas for absolute peak performance**
- **Includes two new motorsport-engine oils and two gear / transmission oils**
- **Innovations born from fierce Junior World Rally Championship (Junior WRC) racing**

Wolf Lubricants has harnessed its partnerships in one of the automotive industry's greatest drivers of innovation, motorsport, to launch its new **RACING LINE range**. These exceptional new products have been developed specifically for the tremendously harsh and extreme performance requirements of motorsport and **high-performance automotive applications**.

While Wolf has long been at the forefront of automotive innovation and cutting-edge products that meet the latest standards and official OEM approvals, this is the first time they have brought their **exclusive race technologies to the wider market**.

Since 2019, Wolf has been the Official Lubricant Partner of the **FIA World Rally Championship**. This partnership builds on Wolf's continued drive for **exceptional engineering** and led it to also become the **Official Technical Partner of the Junior World Rally Championship**. Through the Junior WRC, Wolf has developed and tested numerous exciting race solutions, working on and off-track to test and **develop race-winning formulations**.

Now, following extensive field testing for performance and protection, these innovations have been translated from race to road. Wolf's RACING LINE products have been engineered with two objectives. Firstly, to **maximize power output** by minimizing friction losses and through mechanical energy recovery and, secondly, to **increase race reliability** through the use of strong Ester base stock with high oxidation stability and low volatility.

At launch, the range includes two motorsport-derived engine oils for maximum performance as well as two race-ready transmission oils.

- **WOLF RACING 0W-40 ESTER**: high performance Ester based engine oil suitable for race prepared engines operating over a wide range of rpm and temperatures.
- **WOLF RACING 10W-60 ESTER**: high performance Ester based engine oil suitable for race prepared engines operating over a wide range of rpm and temperatures . Recommended when dilution of the oil by the fuel is high.
- **WOLF RACING TRANS 75W-90 ESTER**: High performance Ester based transmission oil API GL-5
- **WOLF RACING TRANS 75W-140 ESTER** : High performance Ester based transmission oil. Recommended for heavy loaded applications API GL-5.

RACING LINE will be available as from October.

## THE COMPANY BEHIND THE BRAND

Wolf Oil Corporation is a leading, independent producer of performance lubricants with over 60 years of expertise. We pride ourselves on being a pure player in our industry.

All Wolf products are on-site blended in Belgium, because we attach as much importance to the quality of our products as we do to the quality of our service. Moreover, thanks to our dedicated R&D team, our on-site laboratory and our ISO certification, we guarantee the highest quality in every step of our production process. This approach gives us a unique edge within our competitive industry. We welcome the many challenges of producing lubricants of the highest quality, because no one blends technology with service like we do.
