

WOLF LUBRICANTS ANNOUNCES NEW ELECTRUM RANGE FOR ELECTRIC VEHICLES

- **Wolf Lubricants embraces shift toward sustainable e-mobility with new product range**
- **ELECTRUM will address the lubricant and fluid needs of electric vehicles (EVs)**
- **Range will include transmission fluids, greases, brake fluids and coolants for current and future EVs**

Wolf Lubricants has announced the development of **ELECTRUM**, a new product range specifically tailored to **e-mobility solutions**, particularly **electric vehicles (EVs)**. Driven by tightening emissions legislation and growing consumer demand, electrification of the global car parc is accelerating rapidly. With more than 65 years of experience and expertise at the forefront of fluid innovation, Wolf is perfectly suited to provide pioneering new solutions.

While, today, more ICE cars are sold than EVs, the ratio is progressively shifting. In Europe, by 2035 and beyond, it is expected that 100 % of new cars sold will be electric. These EVs require new lubricant and fluid types, with products that have been tailored to their specifications and service requirements.

ELECTRUM will enable aftermarket professionals to effectively service state-of-the-art EVs. The range will include transmission fluids, greases, brake fluids, and coolants dedicated to meeting the present and future needs of electric vehicles.

Initially, the ELECTRUM range will include:

WOLF ELECTRUM MULTI E-ATF FLUID: Dedicated Hybrid Transmission & Electric motor contact fluid.

WOLF ELECTRUM E-DCT FLUID: Fluid for E-DCT on hybrid vehicles and reduction gears (planetary/helical gears) in both hybrids and EVs.

WOLF ELECTRUM TRANS FLUID: Automatic transmission fluid for hybrid and electric vehicles.

WOLF ELECTRUM E-COOLANT: Battery coolant for cell performance and longevity.

WOLF ELECTRUM HUB GREASE: Grease developed for EV wheel bearings

WOLF ELECTRUM E-MOTOR GREASE: Grease developed for e-motor bearings

WOLF ELECTRUM E-BRAKE FLUID: Low-viscosity high-performance brake fluid.

As one of Europe's largest independent lubricant manufacturers with a dedicated in-house R&D capability, Wolf is prepared for whatever the future of mobility may bring. Its engineers are continuously developing new solutions that meet market challenges, providing technologically enhanced fluids and lubricants for the mobility of tomorrow.

THE COMPANY BEHIND THE BRAND

Wolf Oil Corporation is a leading, independent producer of performance lubricants with over 60 years of expertise. We pride ourselves on being a pure player in our industry.

All Wolf products are on-site blended in Belgium, because we attach as much importance to the quality of our products as we do to the quality of our service. Moreover, thanks to our dedicated R&D team, our on-site laboratory and our ISO certification, we guarantee the highest quality in every step of our production process. This approach gives us a unique edge within our competitive industry. We welcome the many challenges of producing lubricants of the highest quality, because no one blends technology with service like we do.
