

French manufacturer of compressors

constructor of en[air]gy

Léo Guernet, 4th generation.

Guernet Compresseurs
your partner for more
than 100 years.

www.**Guernet**.com

A history company in the field of compressed air

Discover our history and our products. From compressors to on-board powers including layouts for mobile service and garage equipment, we have been providing the best products for over one century.

1911

The beginning of an adventure

Jean Guernet created **Guernet Compresseurs** in **Paris** in **1911**. The company specialized in the construction of **electric motors** for the industry. Then **Guernet Compresseurs** settled in **Nanterre** and invented the **rotary battery charger**. The company then turned to the **booming world of cars**. In **1928**, it developed the **first range of compressors designed for garages**.

1954

Development

Michel Guernet, 2nd generation, expanded the range by developing the **V-belt drive compressor**. The company experienced a boom. **Guernet compresseurs** therefore moved to larger premises in **Villeneuve-Sur-Yonne** in order to develop around the **field of compressed air**.

1991

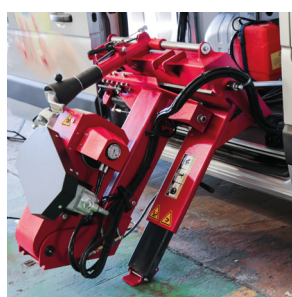

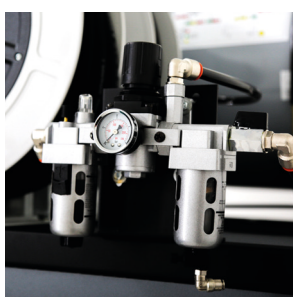

New horizons

Hervé Guernet, 3rd generation, directed the development of the company on the manufacture of **moto-compressors** for various trades. **Guernet Compresseurs** moved to larger premises in the town of **Joigny**. In **2008**, **Guernet Compresseurs** expanded its range and opened to the **manufacture of garage equipment**, which gave it a place among the leaders of the **business sector**.

2013

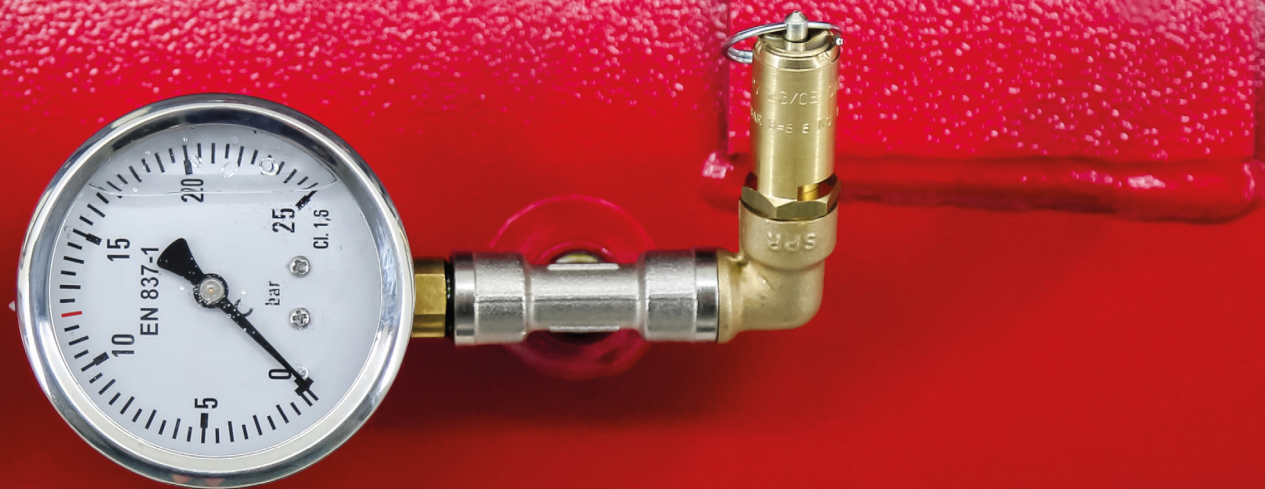

Sustainable innovations

Guernet Compresseurs committed to the service of the environment and developed **greener solutions**. The **Power Drive System**, the **Power Motor System** and the **Power Charge System** allowed a change in working conditions. The **Power Motor System** won the **Silver Trophy at the International innovation Grand Prix at the Equip'auto Fair** in 2015 in the category of **Services / Services Bays / Service networks**.

French manufacturer of compressors for the entire world

Electric and diesel or petrol compressors, our various ranges of compressors dedicated to all types of applications, or our custom-made compressors adapted to your needs. Discover below the services we offer.
