CONVENTIONAL SHIMS

 Wide range
leading the industry

E-Shims

Conventional Shims

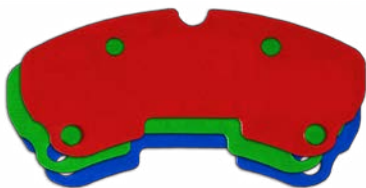

NUADI[®] is a world leading manufacturer of shims for any brake application in the world, combining the widest offer of shim materials available on the market with a wide range of fitting methods: with tabs, Nu-Lok, MST, stake-on and adhesives.

NUADI[®] technology leads the manufacturing of conventional shims

The manufacturing of shims is carried out in accordance with NUADI[®] standards as well as the highest standards in the industry, combining the widest range of high quality materials from the best suppliers in the sector.

Wide range of shims:

NUADI[®] is not only the leader in the conventional shim manufacturing sector, it also incorporates innovations and applications that are different from that offered by their competitors, which increases the offering as well as the possibility of differentiating their shims in a highly competitive market.

Different colour shims:

To differentiate the brand in a competitive market, allowing to match the Pantone of the colour of your logo or brand following your corporate line. An anti-adherent finish is added, which allows for a natural movement of the brake pad.

Nu-Lok[™] shims:

The Nu-Lok[™] floating shims provide a drastic reduction in noise and vibration, are easy to manufacture and provide cost savings in assembling and materials.

Shims with a logo:

Add your company logo so your brand can be easily recognised by your clients.

Conventional shims:

In accordance with market standards reinforced by the optimum level of quality that is guaranteed by NUADI[®] products.

NUADI[®] offers the possibility of customising their entire range of shims for their clients through stamping and etching of logos, names, etc.
