# WEAR SENSOR

## Innovation as a form of production

**SADECA** is an international benchmark manufacturer of a wide range of brake wear sensors. Our key strength is the focus on innovation and continuous improvement when developing new products to meet the specific requirements of our customers.

Global brake pad and brake system manufacturers place their trust in Sadeca. One level of quality guarantees the best for all our customers.

## Fully focused on customer satisfaction

Our range of wear sensors supply the OE, OES and the Independent Aftermarket. Our product offering is available in our general products catalog, or in our on-line catalog. Sadeca's goal is first to market, innovation, and customer solutions. Our engineering team is available to develop parts that best meet your needs, whether it is a new wear sensor, or an improvement to your existing product.

- Based on our customer's design or with our collaboration
- Innovative solutions and international patents
- Wide range of products with varied references
- Product guaranteed by global quality standards
- Full focus on customer satisfaction

Whether Automotive, Heavy Duty, or Industrial, the SADECA team is your best partner for your Electronic Wear Sensor solutions; creative innovation adapted to your final product.
