

Radiator

THE RADIATOR PROFESSIONALS

HIGH QUALITY RADIATOR PRODUCTS WITH **HIGH PERFORMANCE**

- Exported to More Than 35 Countries Worldwide.
- More Than 45 Years Manufacturing Experiences.
- Wide Range for Automotive & Heavy Equipment Radiators.
- Technical Assistance Agreement with Japanese Leading Manufacturer.

DO YOU KNOW?

SAKURA RADIATOR IS MADE BY HIGH GRADE MATERIAL & WITH HIGH CRAFTSMANSHIP WHICH CREATE ROBUST RADIATOR WITH GREAT HEAT TRANSFER

ROBUST TUBE

With high grade material and strong construction, our tube able to withstand high pressure in the radiator and have good corrosion resistance (with water clad layer) to prevent internal corrosion from coolant flow inside and external corrosion from outside

SMOOTH RADIATOR TANK

Sakura Radiator tank is manufactured with high quality material and high standard manufacturing resulting in smooth and neat appearance.

MAXIMUM CRIMPING STRENGTH

Sakura Radiator crimping tab is designed so it can close more surface area to the tank. With this, the crimp will be stronger and decrease the possibility of leaking.

PERFECT SEALING RUBBER GASKET

Rubber gaskets used in Sakura Radiator is free from flashing and have smooth edge to produce perfect sealing and leak free radiator.

HIGH GRADE MATERIAL

Every single piece of Sakura Radiator use the right specification and high quality aluminium to achieve high performance and durability.

OIL COOLER

With good internal corrosion resistance material and high cooling performance.

MAXIMUM COOLING PERFORMANCE

To enhance cooling performance, not only Sakura Radiator fin made from high quality material that transfer heat efficiently, but also have optimum louver angle for maximum heat transfer.
