

## About WESEM Company

### Introduction

Since 1977 the WESEM company has provided lighting for agricultural machinery and vehicles. The high quality of WESEM's lamps is guaranteed by a qualified staff of specialists, a modern machinery park, the R&D department and a fully equipped measurement and testing laboratory.

WESEM's products, designed and produced in Poland, successfully combine modern design trends with the latest technical solutions. That is why the products have been present on European, Asian and American markets for years. Moreover, an excellent proportion between quality and price causes that WESEM's lamps are used by numerous OEM manufacturers as well as by wholesalers of spare parts from many corners of the world.

### About us and our products

WESEM manufactures lamps for:

- heavy goods vehicles,
- all-terrain vehicles,
- public service vehicles and emergency vehicles,
- trailers and semi-trailers,
- tractors and agricultural machines,
- construction equipment,
- forest machines,
- low-speed vehicles.

The company has its manufacturing facilities in Wieliczka and Niepołomice, and manufactures its products in Poland. It supplies its products to OEM and aftermarket customers.

Factories and assembly facilities across Europe account for a large proportion of the Company's customers. WESEM works with leading agricultural and construction equipment manufacturers.

WESEM's dedicated solutions and capability to manufacture short runs of products allow the company to adapt its lamps to customers' requirements, to smoothly cooperate with engineers, and to quickly deliver products once the terms and conditions are agreed.

WESEM's aftermarket customers include large retailers and distributors in multiple countries. When buying a WESEM lamp or a headlight, the customer can rest reassured that they are buying a good quality European product at a reasonable price. Customers can really select lamps that are optimum for their needs, because WESEM offers a wide selection of options and uses customer support tools. Our products can be purchased or ordered from automotive or agricultural lighting traders in many different countries.

Our product range includes:

- work lamps,
- headlights,
- rally car lights,
- special lamps,
- rear lights,
- accessories.

LED lamps form the core of our product offering. European manufacturing standard guarantees the high quality of our products whose distinguishing features include modern technology, robust design, fine-tuned details and ability to operate in difficult conditions. Our lamps feature very good characteristics, and at each production stage inspections are conducted in accordance with the company's ISO 9001:2015 quality system. Our in-house laboratory and extensive test programmes guarantee that our lamps can operate for years. Our product range is constantly expanded and new products are regularly launched. WESEM is open to new business relationships and is continuously looking for new markets.
