

With more than 1,300 air bellows and its components, we have established a broad position through our quality, consistency, high market coverage and strong availability.

One air spring bellows is produced every 6 seconds!

More than 50 years of experience in rubber compounds and in the metal

industry, combined with scientific achievements from our world-class research and development center, have enabled us to develop materials, processes and technologies that set air springs apart from the competition..
