# SENSORS®

ENGINE MANAGEMENT SYSTEM COMPONENTS

All of our Mass Air Flow Sensors are tested, approved and packed in the UK

Our comprehensive range of engine management sensors covers more than 40,000 vehicle applications and contains over 500 references. The complete SENSORS programme consists of: ABS Sensors, Camshaft Position Sensors, Crankshaft Position Sensors, EGR Valves, Lambda Sensors, Mass Air Flow Sensors, Manifold Pressure Sensors and Throttle Position Sensors.

The SENSORS brand is supported by in-depth cataloguing, with up-to-date vehicle applications and cross reference data available via the SENSORS online technical portal. Both you and your customers can use the concise application guide to identify the correct part that you require.

SENSORS packaging, Online Technical Portal and promotional material contains no reference to CCL.

**An extensive range backed by comprehensive data makes the SENSORS range an ideal choice of engine management components for distributors, factors & garages worldwide.**
