Texture Repair Kit

Part no 00.307

Fabric and velour system A

This system for fabric and velour enables the repair of upholstery with a finish and quality sure to attract attention.

As standard we deliver 40 different fibres, which can be mutually mixed to match the primary color perfectly. Subsequently, the pattern is painted on, and finally the task is impregnated to gain water and dirt resistance.

Includes
Fabric Protection Shield
Part no. 575

Part no. 00.525

Plastic, Leather, and Vinyl System B1

Finding the right kind of adhesive for each job can often be difficult to the user. HBC system B1 is a system for the repair of Plastic, Leather and Vinyl. It makes it possible to repair hard and flexible plastic, both interior and exterior parts, bumpers, dashboards, as well as leather and vinyl components.

The system contains all the required tools and adhesive materials to complete the repair from start to finish. The adhesive types contained in the system include among others specially developed hot-melt adhesive, chemically activated adhesives for hard plastics, flexible and rigid adhesive.

Plastic, Leather, and Vinyl System B1 is complete with cleaners, primers, and reinforcement material and the tools, which make it possible to repair plastic, vinyl and leather parts. Copy the structure to top off the repair for a perfect finish!

Part no. 00.816

Texture coat kit System B2

Excellent for repairs of surface damages in all types of structures. The world's most complete texture system beats everything on the market.

Including HBC System Mouldmaker - developed to copy all types of structures.

System B2 includes:
5 different spray textures; coarse, medium, fine, fine flat, and coarse flat. 2 types of primers; one clear thin and one with "sanding" that fills in the small scratches and glueholes that often appear in the repair.

System B3 Aqua- Color mixing system

Base colors for mixing of plastic-, leather and vinyl colors. The complete dye-to-match system for all kinds of soft, hard, and flexible materials such as leather, fabric, vinyl, plastic, and glass fiber. The standard system includes color swatch, gloss system, mixing book (formulas), primers, additives etc.

Available as both solvent based and water based. All dyes and glosses gain a permanency that makes this system indispensable for service mechanics working with the repair of plastics or with maintenance jobs on furniture, cars, lorries, etc.

Handheld Color Matching Tool provides a powerful, versatile way to find an exact match for any interior sample.

Spot/Paint Repair System

FULL COLOR RANGE / + ALL ANCILLARY PRODUCTS

The compact paint system from Syrox has everything you want, and nothing you don't. A complete range of ancillary products, activators and thinners support the undercoats, basecoat and clearcoats. Everything has been designed to work together perfectly to produce great results with no compromise on colour or on quality.

SYROX IS A NEW
EASY-TO-USE
BRAND FOR

APPLICATIONS / NEXT LEVEL VERSATILITY

Application techniques are familiar so you'll be able to put Syrox to work right away on small to large surface paint refinish jobs or alloy wheel refinishing. No fuss, no drama, just great results.

* Interior restoration is also an option when adding the B3 Interior Upgrade from HBC System.

COMPLETE SYSTEM / NO LIMITATIONS

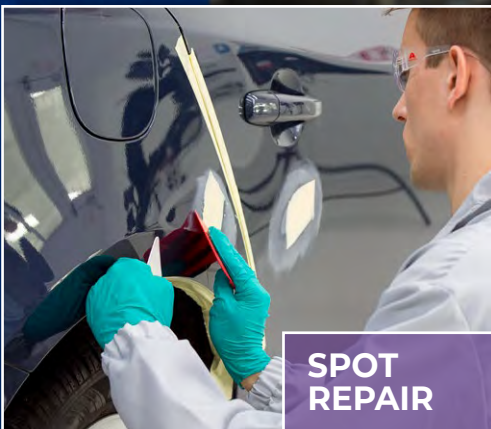

The products - formulated using European technology and manufactured in Europe - have been developed with simplicity in mind so you can get your job done quickly and accurately.

The full system is practically laid out in a tailor-made rack with convenient storage indentations in which the bottles sit, snugly, safely and securely. For added user-convenience, the rack comes with a full set of magnets that detail the mixing tint codes for the bottles.

COLOUR READER / ALWAYS A PRECISE MATCH

Easy-to-use digital spectro photometer that comes with a no-nonsense instruction manual, a calibration set and a dedicated cable for connecting to the Syrox Colour Search software. Its simple plug-and-play set-up makes easy work of colour retrieval. And with full access to the global colour database, Colour Reader turns its accurate colour readings into the best, most accurate match.

COLOUR SEARCH / 70,000+ FORMULAS

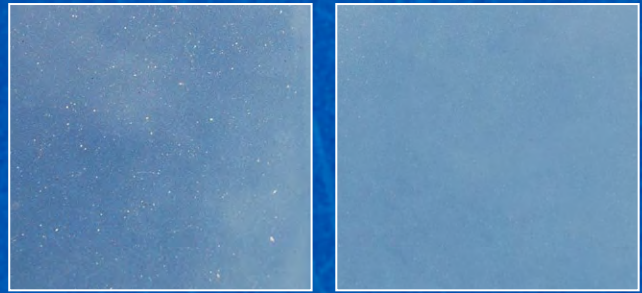

Powerful and comprehensive cloud-based colour retrieval software from Syrox. Colour Search can be used on PCs, tablets or smart phones. You can share formulas with users from other sites, and access their formulas, no matter where they are. Updates are regular and immediate, once online, so formulas always stay up to date.

INNOVATIVE DOSING LID AND LEVEL INDICATOR / YOU WON'T WASTE A DROP

The specially designed product packaging turns the mixing room on its head. The easy-to-handle, comfortable-to-hold bottles come in a variety of smaller sizes and they have a level indicator window, so you can easily see when you need to reorder while also reducing waste.

Spot/Paint Repair Systems

*Chipfix produces a deep fill,
quick shine, fast dry repair
and refinish within minutes.*

Chipfix System

For the repair of scratches and or
stonechips on all types of vehicles

Chipfix from HBC system provides for the first time a stand-alone system and fast, low cost option for the repair of stone-chips and minor paint damage, scuffs and scratches on motor vehicles.

Combining unique new technology with specialist training Chipfix produces a deep fill, quick shine, fast dry repair and refinish within minutes.

The system allows deeper stone chip damage to be built upon to achieve the desired level of fill and make the repair optically almost undetectable.

**Currently 16 1K colour range available
Including silver tinters.**

**Chip Fix system is a 1K system with huge
benefits over existing systems available.**

Part no. 1100
Chipfix System

- » Super durable
- » High build for quicker results
- » High gloss levels
- » Very fast drying
- » Polish-able system
- » High opacity
- » Can be sprayed or touched in with a brush
- » UV Durable
- » No shrinkage
- » Easy to match colours
- » No fillers or primers required
- » Does not contain isocyanates

Spot/Paint Repair Systems

33 MINUTES
SPOT REPAIR!

UV-A1 Spot Repair

A Spot repair from start till finish within 33 minutes including curing time, even if the repair needs filler! It sounds too good to be true, but this is now achievable with the NEW and unique HBC UV-A1 Spot repair system.

- Extremely fast curing times for improved repair times
- Tried and tested new system delivers improved efficiency and profitability
- Can be used on all types of materials in and outside the vehicle
- Fewer preparation steps
- Less waste product
- Low material usage
- Increased productivity and profitability
- No mixing required
- Safe UVA curing with no health & safety risk
- Also available for the first time in Aerosol format

Fast, clean, easy to use and safe for either aerosol or spraygun.

Traditional Spot repairs can take between 45-60 minutes, excluding curing time. Larger repairs which need filling can take even longer!

UV-A1 Spot Repair System
Part no. 19000

Complete System includes

- 1K UV-A1 Clearcoat cures within 3-4 minutes
- 1K UV-A1 Thinner for blending
- 1K UV-A1 Filler cures within 3-4 minutes
- 1K UV-A1 Filler- Primer cures within 3-4 minutes
- UV-A1 Ultraviolet refinishing lamp

Windscreen

Repair / Removal

Part no. 617G6
Windscreen repair system D Pro G6

» *the fastest most efficient glass repair system available in the windscreen repair business.*

Windscreen Repair System

The HBC system D has been developed to carry out quality repairs on laminated car windows. The technology allows you to seal the window, restore the original strength of the window, make the windscreen optically clear all over, and to prevent the fracture point from becoming a weak spot. This revolutionary system is specially designed for professionals and is your guarantee for top quality windscreen repairs with a minimum of time consumption.

- » No heating required
- » Higher vacuum
- » Simple repair process
- » Lower risk of breaking the windscreen
- » Even faster repair time

NEW

**FASTEST
LED UV LAMP
AVAILABLE**

Part no. 714-LED
UV LED lamp w/ rechargeable battery

Curing time
30 seconds

- » Curing time 30 seconds or less
- » Rechargeable Li-ion battery
- » Battery indicator for recharge
- » Safety UV control; Turns off when removed
- » USB recharging cable included
- » CE approved
- » Strong suction cups
- » Automatic countdown for curing time
- » Light weight (Only 278 grams)
- » Does not generate heat

Part no. 622
Windscreen Cutting System

Windscreen Cutting System

The windscreen cutting system from HBC system is used to remove glued-in windscreens from vehicles without using cutting blades or metal wire. As the tool is powered using a rechargeable electric screwdriver (not included as part of the kit), it does not require much expenditure of force.

In order to cut through the adhesive bead around the windscreen, the kit makes use of the specially designed high-tensile cutting wire (Part no. 623). This removal wire has a cutting performance that is similar to standard metal cutting cords, but is so soft and flexible that it avoids any damage to the paintwork of the vehicle.

» *The tool is constructed in such a way that the tool only needs to be repositioned four times to remove the windscreen and the tool does not need to be modified during the process.*

- » Time-saving
- » Can be operated by one person
- » Powered by electric screwdriver
- » Simple and quick operation
- » Where permissible the interior fittings can remain in place
- » Avoids any damage to the paint and body work of the vehicle
- » No re-spray necessary
- » Clean, even cut
- » Reduced risk of injury to the installer

Headlight Restoration System

2 component formula

Headlight Repair System

Many vehicles on the road today have yellowed and cloudy headlights due to UV light damage as well as wear and tear from weather and road debris. The results is not only poor vehicle appearance and reduced reselling value but it also compromises safety.

The headlight repair system from HBC Smart Repairs offers a fast and easy way to restore the clarity to headlight lenses that have become dull over time, at a fraction of the cost of replacement.

Consisting of a special two-component finish with excellent characteristics of resistance and adherence to polycarbonate-base plastic materials. The raw materials used do not prejudice the polycarbonate's mechanical resistance (cracking), but protect it from the otherwise inevitable yellowing.

the perfect start
to an excellent finish

★

* HBC System guarantees that headlights restored with our Headlight Repair System maintain clarity for at least five years. Provided all instructions have been followed

HBC^{system}

UV Protective Headlight coating

in a ready-to-use Aerosol, no mixing required

The aerosol contains 400 ml. of UV coating suitable for all types of headlights made of polycarbonate, incl. halogen, LED and Xenon lights.

- » Ready to use aerosol, no mixing required
- » Suitable for all types of polycarbonate headlights; Halogen, LED, Xenon
- » Fast drying time; 15 min. at 20 degrees Celsius

Part no. 621 UV-Protective Coating Aerosol

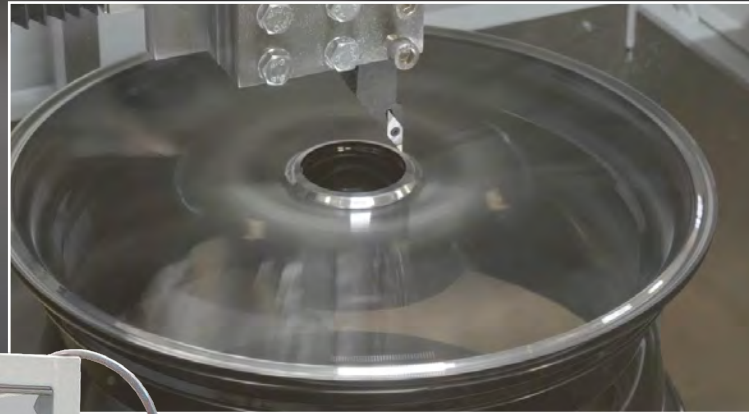

the perfect start
to an excellent finish

* HBC System guarantees that headlights restored with the UV-Protective Coating remain clear for one year. Provided all instructions have been followed.

Alloy wheel Restoration Systems

Painted Alloy wheel Repair System

Part no. 532

The E3 Alloy Wheel Repair System effectively repairs kerbed, scratched or corroded alloy wheels at a very low cost per repair.

The system is complete with fillers and aerosol colours for the repair of most common wheel types. After the application of colour, a thick layer of clearcoat is added to attain the perfect finish.

PAINTED ALLOY WHEELS – The most common finish is a painted wheel which comes in a wide variety of designs. Painted wheels are sprayed or powder coated. The process of painting a wheel consists of prepping the wheel, priming, painting and applying a clear coat, which seals the finish against corrosion.

Alloy wheel Paint System

INTRODUCING THE 4TH GENERATION AND MOST ADVANCED, EASY TO USE ALLOY WHEEL PAINT SYSTEM ON THE MARKET!

The HBC alloy wheel paint System is a must for anyone looking to produce a factory finish repair - first time!

Part no. 998 Wheel paint system

Polished Alloy wheel Repair System

Part no. 551

With the E3 Alloy wheel repair system, for polished alloy wheels you can effectively repair kerbed, scratched or corroded alloy wheels at a very low cost per repair.

The system is complete with sanding equipment, polishing compounds, cleaner and clear coat for the perfect finish.

POLISHED ALLOY WHEELS are the most difficult of all wheel styles to identify. They are generally very expensive and are constructed of the highest quality material. Some polished finishes resemble painted finishes while others resemble chrome. Polished wheels have a lighter look and may not be clear-coated. Polished wheels that are not clear-coated have a much higher luster but they require a great deal of maintenance. You will never see a metallic sparkle on polished wheels when viewed in bright sunlight. A polished wheel closely resembles silverware.

HBC system is introducing the latest water-based paint system for refinishing alloy wheels. Packaged in a mobile trolley solution. The most advanced, easy to use wheel paint system on the market! Designed in conjunction with vehicle manufacturers the system provides: **Original factory matched colours including all leading manufacturers such as Ford , VW/AUDI, Mercedes, Honda, Porsche etc.**

With the system you can repair many kinds of smaller scratches, parking damaged and other kind of damaged on polished high gloss aluminum wheels, aluminum frames on motorbikes, and other aluminum parts.

- » **4th Gen. Water Borne technology.** Using the latest world wide available pigments and resins of the highest quality.
- » **Excellent technology.** Shake and pour technology with no need for stirring, saving time for the operator.
- » **Fast drying.** Offers increased in productivity and greater material durability, saving time and increasing profitability.
- » **Fully compliant.** Meets the needs & requirements of the latest environmental legislation.
- » **Superb opacity.** Less coats required to achieve full colour reproduction, due to high quality and concentration of pigments.
- » **Aerosols are Toulene Free** which is a major advantage in terms of Health & Safety as Toulene is carcinogenic.

CLEAN, POLISH, PROTECT

PROFESSIONAL CAR CARE SYSTEMS FOR PAINT, WHEELS, GLASS, INTERIOR ...

PROFESSIONAL POLISH AND PADS

Created for max performance and outstanding results while keeping the work process intuitive, simple and fast. Perfect result after 2 stages. The HBC Coating polish line contain abrasive agents (powder) that removes the dirt from the worn paintwork and polishes out micro-imperfections without causing new ones. The polish pads combine the advantages of foam and natural lambswool pads! 3D Diamond design increases the surface area of the polishing pad significantly.

WARRANTY APP CUSTOMER MANAGEMENT MADE SIMPLER

The polish range is powered by our Warranty App. With the app you can issue warranties, once the coating or polish has been applied. The customer is notified when a warranty is about to expire and reminds them to get a new treatment. Simple process; Apply treatment, scan license plate, confirm warranty. Simple as that!

GlassCoat

Paint Protection

Easy to apply paint protection which protects paint finishes against damage from machine car washes, acid rain and bird lyme for up to a 7 year period!

HBC Coating presents a revolutionary new paint protection; GlassCoat. A ceramic glass resin, that when applied to your paint provides a permanent bond that protects and guarantees your vehicle's finish from environmental conditions not covered by the manufacturer's warranty.

GlassCoat is a clear liquid that is applied to the clearcoat of your vehicle. Unlike traditional waxes and sealants that simply "coat the surface", GlassCoat polymerizes and crosslinks onto the surface of the clear-coat. The end result is a clear and extremely durable ceramic film that adheres so strongly to the surface that not even organic solvents can remove it.

Part no. 570
GlassCoat
60 ml

Paint, wheels, interior, accessories

Designed to sanitize enclosed areas for mold, bacteria, viruses and will eliminate all odours without the use of chemicals

OZONE

Portable Air Cleaner

PROFESSIONAL

Part no. 109
OZONE Air Cleaner

It has never been more important to ensure clean air in all areas where people are present and especially where the risk of disease spreading is high, such as vehicles with several users and passengers.

Utilizing the patented combination of UV-C & OZONE Technology you can now permanently eliminate and remove any unpleasant odours- without the use of chemicals. The odour does not return, unless the pollutant is still present.

Easy to operate - simply place the unit, plug it in, set the automatic timer and exit the area.

Most air cleaners today use a filter. When you use a filter, you retain the hazardous particles in the filter allowing the bacteria, fungi, mould and virus to grow inside the filter. Making it unsafe, less convenient and costly to replace.

The OZONE Air Cleaner destroy the particles with UV-C light. Eliminating the cost and time of replacing filters.

Lamp	UV-C 16W
Voltage	220 / 110 VAC 50 Hz
Temp	-5/ +25 C
Output	140 mg/h. 0.01944 ppm/sec/m3.
Weight	4,1 kg.
Dimensions (LxWxH)	430 x 130 x 130 mm

APPLICATIONS

Car dealerships,
Car rental agencies,
Leasing companies,
Fleet owners,
Taxi/ride-sharing,
Caravans, Mobile,
Busses, Trucks,
Boats, Planes,
Homes, Hotels,
Hospitals

When the OZONE unit cleans the air for odours, micro-organisms such as airborne bacteria, viruses, and fungal spores are also removed. Reducing the risk of transmitting infectious diseases.

Electro-Magnetic Dent Removal System

the cleanest and fastest way
for fixing hail dents, door dings
and other minor soft dents.

The new Electro-Magnetic Dent Removal System with a custom designed Dent pulling inductor is ideal for repairing small soft dents on the car body without retouching the paint.

Unlike traditional PDR tools, there is no need to meticulously massage dents from the back of vehicle panels, in hard-to-reach areas, or areas difficult to get behind.

Induction heating is the highest tech method for removing soft dents. The result is a clean dent repair in a fraction of the time compared to a conventional PDR tool. The system can be used in all mechanical repair and auto body repair facilities.

Caravan & Mobile home

Repair Systems

Caravan Repair System

With the HBC Caravan Repair System for the first time panels on caravans, motorhomes and trailers can be restored to their original condition, quickly and cost-effectively. HBC system has successfully designed & developed a specialist repair system which has been rigorously tested and now features a world-wide patent.

Traditionally damaged panels (normally the whole side of the vehicle), would have to be replaced which is hugely expensive and very time consuming for the insurer, repairer and owner. Now specially designed vacuum equipment, templates and unique mouldmaker provide a perfect match to original smooth or contoured surfaces. This system is capable of repairing major damage on aluminium panels.
