

FILTERS

ABOUT COMPANY

PZL FILTERS

– effective protection of engines

PZL FILTERS specializes in manufacturing all types of filters which are designed for automotive, industrial and agricultural sectors. A wide product line includes the following filters: air, oil, fuel, cabin mounted, hydraulic and air driers.

The products of PZL FILTERS have the following features:

- the highest filtering effectiveness
- very high absorptivity, frequently exceeding required standards
- excellent quality

The factory has its own R & D Centre where numerous tests and inspections are carried out. The quality of our products is in conformity with international standards and IATF 16949:2016.

Thanks to the improvement of production processes PZL FILTERS introduces innovative filtering solutions into the market. Rich experience and co-operation with aviation, military, building, automotive and industrial sectors allow the company to develop continuously its offer and adjust it to the changing Customer demands.

Certified Efficiency
IATF 16949:2016

THE NEW QUALITY DUE TO THE USE OF HIGH-PERFORMANCE FILTERING MATERIALS AND SPECIAL PLEATING TECHNIQUE.

OIL FILTER

Filtering partitions made of high quality filtering absorbent paper, impregnated with special resins, are resistant to high temperatures and aggressive agents contained in oil. Filtering accuracy 10 to 25 μm .

AIR FILTER

The latest multilayer filtering materials, impregnated with special resins and thermally treated, protect filter against humidity, oil and fuel vapours.

High filtering accuracy reaching 99.95%. High absorptivity due to the use of special type of pleating of 0.3kg/m².

HYDRAULIC FILTER

Filtering partitions made of high quality filtering papers, glass fibres and filtering mesh made of stainless steel. Filtering accuracy from 3 to 150 μm .

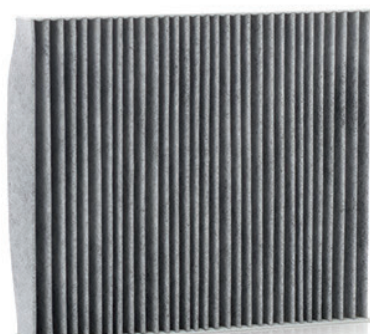

At customer's request, the filters are fitted with visual indicator of filter contamination. Operating pressure up to 40 MPa.

FUEL FILTER

Multilayer filtering materials, resistant to the influence of fuels. Filtering accuracy from 3 to 30 μm .

High effectiveness of water separation from fuel and removal of contamination guarantee perfect protection of the engine fuel supply systems.

CABIN MOUNTED FILTER

High quality unwoven polyester and polypropylene fabric.

Absorptivity of contaminations and humidity. Due to active carbon particles, these filters absorb smells, harmful gases and bacteria.
