

361-2T

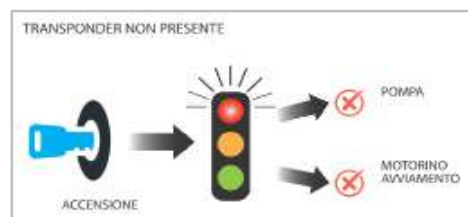

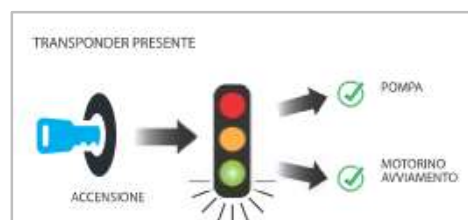

IMMOBILIZER

with two active transponders, rolling code, frequency **868 MHz**

The control unit is always on alert to receive the signal from the transponder, if the distance is such as not to allow dialogue between transmitter and receiver, **activate the lock on the petrol pump and the starter** by immobilizing the vehicle.

It is a system of maximum security, it always leads to the beginning of its task.

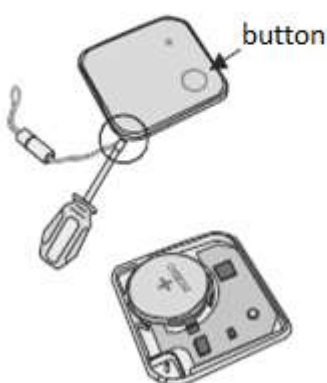

It is simply necessary **to remember to take with you the transponder**, stored in your wallet, in the case of your mobile phone, in a pocket, **NOT** with the keys of the car and **security is always by your side**

361-2T

Replacement battery
type CR2032
