TURBOCHARGER

As an approved supplier to the world's leading vehicle & engine manufacturers, including Jaguar Land Rover, Isuzu, Mitsubishi, CAT, Perkins, plus the Ministry of Defence, our remanufactured turbochargers are designed, engineered & tested to perform just like the OE - sometimes better.

We bring those very same parts to the after-market, with a range of more than 1,000 new OE & OE-approved reman turbos & all-new ancillary parts. Fitted to all makes & models of vehicle, & covering the leading OEMs, you can be confident that we'll have the right part for your next job.

Better still, because every turbo comes with a full fitting kit, & access to our technical hotline, it can be installed right-1st-time too. So, you can offer your customer the same OE quality boost. Just at a fraction of the price. Turbocharging your sales, profitability &, of course, customer satisfaction.

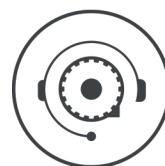

Environmentally & cost-friendly solutions

QUALITY ASSURED PROCESSES: to ensure even the tiniest traces of carbon build-up & other contaminants are removed, we thoroughly clean all housings & non-wearing parts in a high-temperature wash tank & ultrasonic cleaner, using the latest eco-friendly solvents. An additional blast treatment ensures the product looks & feels as good as new.

100% BALANCED & TESTED: to ensure accurate weight distribution across the rotating axis, we balance the turbine & compressor wheels as an assembly, using specialist high-speed equipment. Variable geometry turbos are then flow calibrated to OEM specifications on either a Turbo Technics VTR or G3 Power rig.

95% of our turbos are fitted with a new CHRA. Others have new journal & thrust bearing(s), piston, retaining & O-rings & shaft nuts, replaced as standard.

For a best-practice vehicle repair, every Carwood turbo comes with a full fitting kit, including gaskets, mounting studs, copper washers & a priming syringe.
