

Advantage

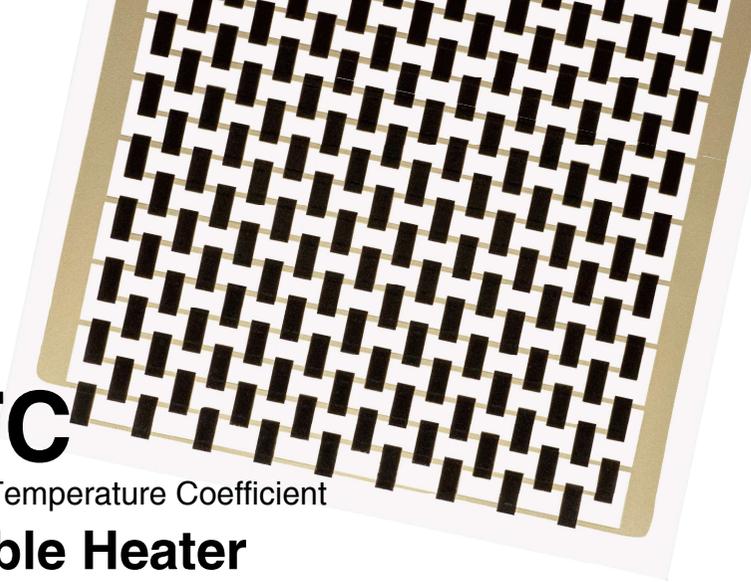

- Wide range of printed sensors to accommodate different project needs.
- Custom sampling including pattern, dimensions, and output specifications.
- Flexible project developing solution, requires minimal initial investment.

PTC

Positive Temperature Coefficient

Flexible Heater

Self-regulate | prevent overheating
 | No need control module

Fluid

LEVEL SENSOR

Immersed level sensing

Force Sensitive Resistor

FORCE SENSOR

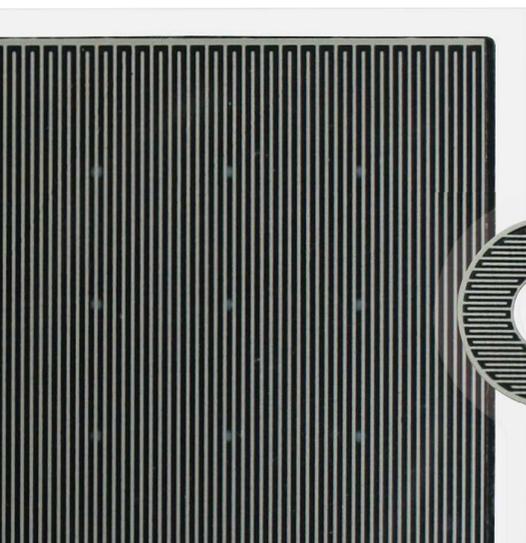

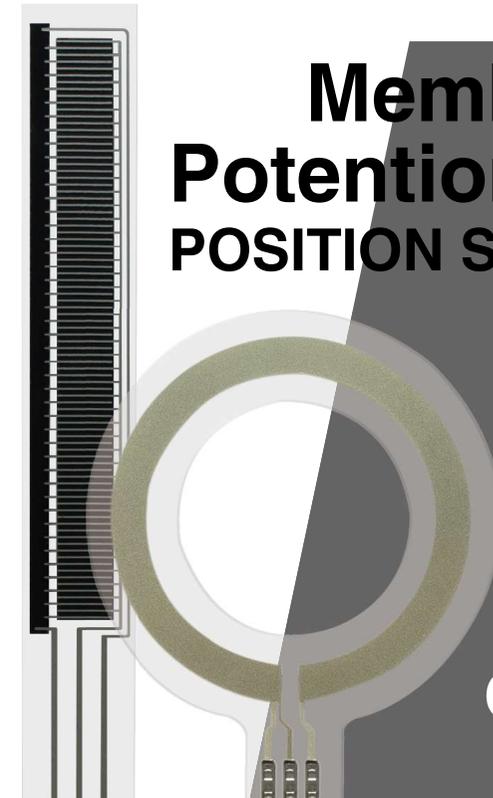

- Ultra-thin & robust
- Flexible & lightweight
- Low power consumption
- Easy to integrate

Membrane Potentiometer

POSITION SENSOR

Stylus Finger Gloves

25 Years Professional Sensors Manufacturer

CERADEX specializes in multilayer screen-printing manufacturing since 1995 and has become one of the leading manufacturers with design capability in its field. With this know-how, CERADEX released its printed electronic sensors and heaters product line in 2019. Putting forth our footprint into the field of printed electronics and provide custom solutions for various applications and projects in different industries.

With two ISO-9001 certified design and manufacturing facilities, CERADEX integrates quality control measures to ensure every sensor manufactured undergoes comprehensive diagnosis that meet customer's requirements.
