## Quality assurance

Our quality system has one goal  
- customer satisfaction.

Thanks to our strict quality control  
we believe that our products could pass strongest  
test and evaluation conditions, many years of  
experience exploitation in different climatic zones  
from south to north give us assurance to give  
strongest warranty in the branch.

## Production program

### EXHAUST SILENCERS

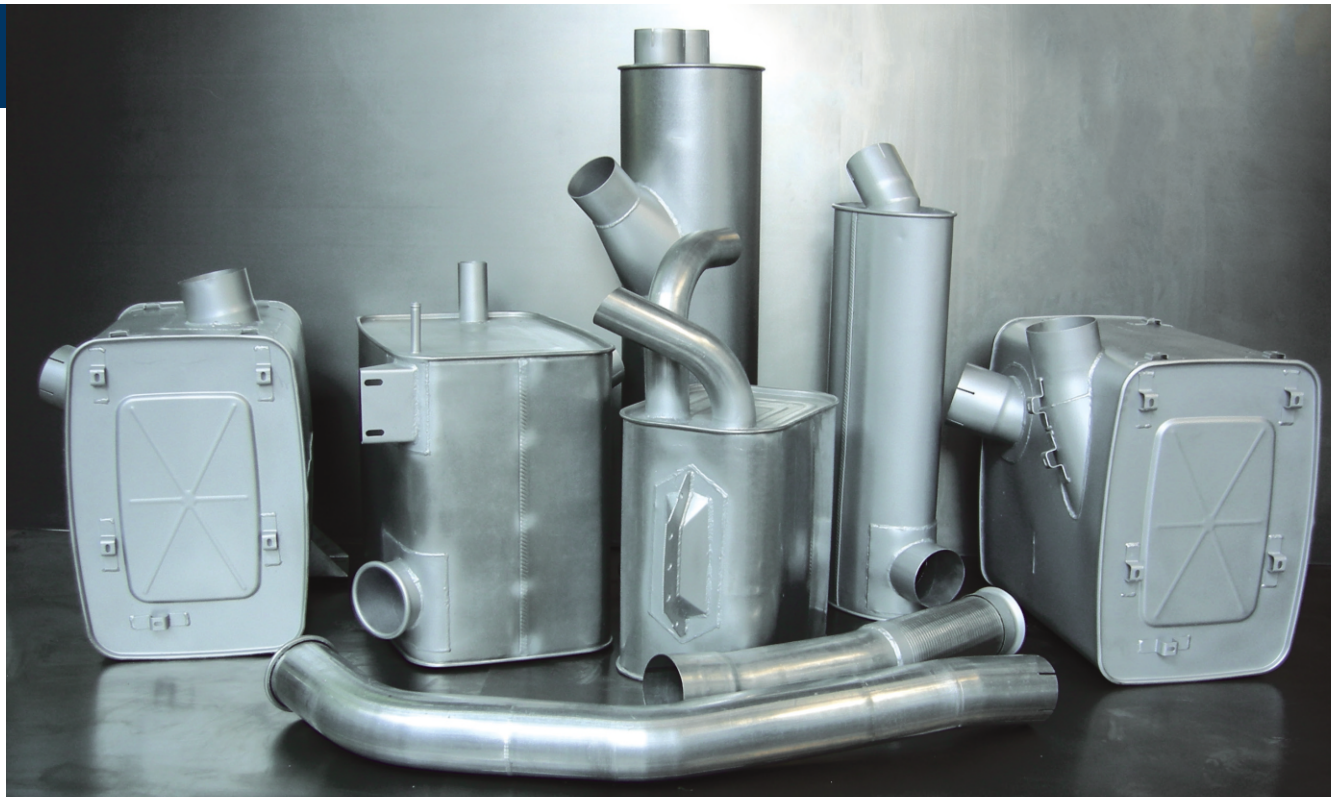

We produce a wide range of silencers in more than five  
hundred different models. Silencers are made accordingly  
to original product specifications. In our production we use  
aluminized and corrosion free metal sheets and tubes. Precise  
geometry of sheet shapes is achieved by using of CNC  
machines. Welding operation is set to the minimum because of  
durability and quality of our silencers.

### EXHAUST PIPES AND FLEXIBLE PIPES

In our production program we have more than thousand  
different models of exhaust, producing pipes in all diameters  
and bending up to 4,5m tubes. Next, we manufacture pipes in  
our proved mold for multi-part-assembled pipes.

We manufacture flexible pipes in all standard diameters and  
in any desired length. We can offer you exhaust pipes and  
flexible pipes made of aluminized and corrosion resistant  
material (INOX).

### CLAMPS

We offer all diameters of  
connection parts, conical and  
regular clamps in order to meet  
customer requirements.

Range of clamps we produce  
covers all types of vehicles  
of all well-known European  
manufacturers.
