

HBA40TOUCH

Electronic Headlight Tester suitable also for LED/Xenon lights.

CODE: T03.009.01 - HBA40Touch
(With mirror visor and rotating column)

Standard equipment:

- Mirror visor
- Advanced internal high precision luxmeter
- Internal electronic level
- Rotating column
- Laser pointing system

Optional equipment:

- Green Laser visor
- Cover in stainless steel
- Base on rails
- Dust cover
- Status Lights
- Printer
- Kit for roof scrolling

Once again our research and development department has been able to combine the sturdy and elegant steel structure of the standard models with a very advanced technology that allows this model, unique in the range, to automatically recognize the type of light on which you are operating.

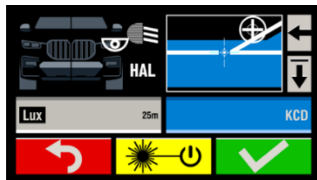

In addition, the standard equipment of HBA 40 Touch includes the laser pointing system, an advanced high precision internal lux meter to measure the light intensity, the rotating column, a 4.3 "touch screen. And to make everything even easier and optimize every operation you can use our "FaroControl " management software.

Technical information

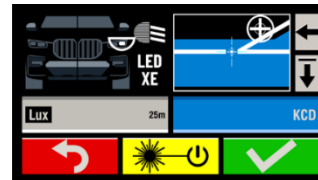

Technical features

Suitable for LED/Xenon and Halogen headlights	Yes
AUTOMATIC RECOGNITION OF THE LIGHT TYPE	Yes
Minimum operating height	23 cm
Maximum operating height	146 cm
Type of lens	Optical glass lens
Luxmeter	Internal high precision luxmeter
Precision	± 0.01
Display	4,3" colour Touch Screen
Laser pointing system	Yes
Internal movable checking panel	Yes from +2% to -8%
Mirror visor	Yes
Electronic Level	Yes
Languages	10
Ethernet connection for data storage and print	Yes
Usb Interface	Yes
WIFI Connection	Optional
Printer on board	Optional
Status light	Optional
Green laser visor	Optional
Rail system	Optional
Power Supply	2 x 12V batteries
Weight	35 kg

Automatic recognition of the light type

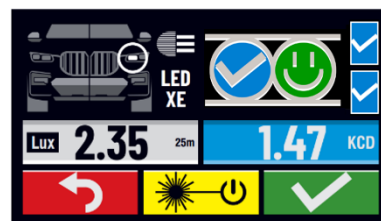

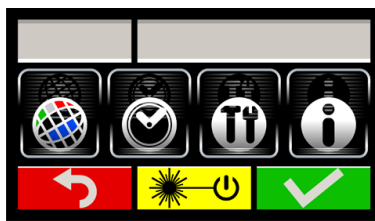

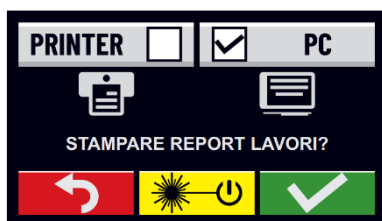

Thanks to latest generation technology, the device is able to recognize automatically the type of the light that is testing ensuring maximum accuracy of the result. The operator no longer has to choose the type of headlight to be tested

Intuitive SW

We have created a user-friendly SW that, thanks to its graphic icons, leaves the customer no longer doubts

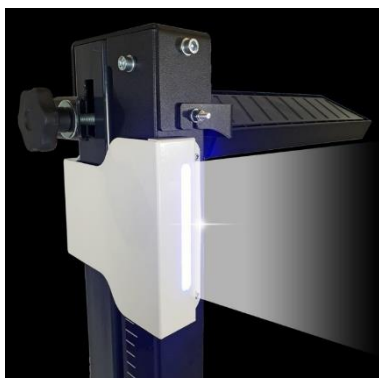

WiFi module

HBA40Touch can be equipped with Wi-Fi module. In addition to the remote control via smartphone or PC, it is also possible to save data on a PC and receive remote technical assistance thanks to our Customer Support by simply connecting the device to internet.

Status lights

Thanks to the high visibility RGB LED strip on the column, the operator can immediately understand if the headlight is aligned correctly or not.
Depending on the colour he will be able to understand the status:

Green: Headlight is aligned perfectly

Blue: Standby

Red: Headlight is not aligned
