Goizper Group

Growing through cooperation

The origins of GOIZPER S. Coop. go back to 1959 in Spain.

Goizper has undergone a significant growth over the years, making it a group structured around different business activities:

► Goizper Industrial

International technology leader in the design, manufacturing and marketing of power transmission solutions and automation for various industries: machinery, presses, packaging, automotive ...

► Goizper Biotechnology

Experts in research, development and formulation of sustainable solutions for crop protection, environmental and food safety being environmentally friendly.

► Goizper Spraying

Experts in the design, manufacturing and marketing of manual sprayers and dusters for agriculture, gardening, industry, construction, automotive, professional cleaning and disinfection, public health, vector control and animal health treatments among others.

Our slogan **"Your partner for accurate spraying"** responds to our extensive experience of more than half of century in the market and the high degree of knowledge and expertise in the manufacturing of sprayers.

The concept of **Innovation**, is one of the pillars of the strategy of **Goizper** when designing sprayers which incorporate new features and improvements to make easier the work of the user maintaining the **efficiency and effectiveness chemical applications**.

When developing our products, the experience of the users and the search in finding ergonomic, functional and safe solutions, are a priority.

It is our customer's satisfaction which backs us up and the reason why we continue working for continuous improvement.

Goizper is the only Spanish manufacturer and homologated supplier participating in the International Committee in charge of setting manual sprayers regulations and standards for global organisations such as FAO, WHO or ISO/TC23.

Goizper has its own Technology Centre for Research, Development and Innovation - Olaker - where value is generated through technological research and efficient and sustainable innovation is undertaken to find integrated solutions and product improvement.

We develop technological solutions which ensure the quality of the products rationalising the use and minimising the impact of the chemical products and being environmentally friendly.

INTERNATIONAL PRESENCE

Goizper's international leadership is based on a powerful commercial network having 14 subsidiaries and own local sales offices as well as an extensive distribution network in over 100 countries on the 5 continents. This ensures a personalised and professional attention according to the characteristics and needs of each market.

CONCRETE & INDUSTRY, CLEANING & DISINFECTION, PEST CONTROL, CAR WASH & DETAILING

MULTI & MULTI PRO

Range of sprayers equipped with the highest performance in terms of safety and ease of use. Designed for professional use with the most aggressive chemicals in various sectors. Particularly resistant to acids.

- Professional cleaning and disinfection.
- Construction.
- Automotive and all industrial workshops.

FOAM & FOAM PRO

Sprayers specifically manufactured for the generation of dry and long lasting foam. Designed for use with chemical agents with surfactant properties (surface active).

- Cleaning and disinfection of different surfaces.
- Care and cleaning of vehicles.
- Cleaning of upholstery, carpets and rugs.
- Condenser coil and contaminant removers (HVAC).

HC

Industrial sprayers especially manufactured with highly resistant materials for use with animal and vegetable oils, hydrocarbon-based solvents, lubricants and petroleum products.

- Brake cleaning, tar removal from vehicle bodies and tools, machinery and motor cleaning...
- Lubricant application; cleaning of car interior, degreasing...
- Wood treatments, waterproofing and dewaxing fluids etc.

METAL/ STAINLESS STEEL

Sprayers especially manufactured with maximum resistance materials to be used with mineral and vegetable oils, curing agents and neutral cleaners. Can be similarly used with hydrocarbon based solvents, lubricants and petroleum derivatives.

- Construction (concrete sealing, foam release agents, curing components, waterproofing agents...).
- Professional cleaning.
- Pest control.
- Wood treatment.

IK ALK

The ideal partner for cleaning and disinfection tasks. Best suited for alkaline, alcohol and acetone substances.

- Cleaning and disinfection in Food processing companies.
- Removal of: Animal, mineral and vegetable fats, proteins, blood, eggs, lubricants, mineral oils, etc.
- Construction (Acetone Dyes).

WATER SUPPLY TANK

The ideal tool for the supply of pressurised water in cutting and grinding machines used in the construction industry.

IK e 15BS

Battery-operated knapsack sprayer, manufactured under high standards of quality, robustness, reliability and safety. Its easy handling, simple maintenance and battery life make it ideal for applying the chemicals most commonly sprayed in sectors such as cleaning and disinfection, and the control of viruses, epidemics and plagues.

CHEMICAL PRODUCTS TABLE.

The following table shows several examples of the most frequently used aggressive substances and the model recommended for each use. Follow the specified maximum percentages.

The sprayers are not suitable for working with many halogenated solvents.

Given the wide variety of products on the market, Goizper does not warrant the universal validity of its products. Always use caution when working and follow the instructions of the chemical manufacturer.

MAINTENANCE AND SAFETY RULES.

CLEANING AND MAINTENANCE OF THE SPRAYER

- After each use depressurize the sprayer and clean it.
- If the nozzle becomes blocked, clean it with water and do not use metallic objects.
- If the filter of the handle is clogged, remove it and clean it with water.
- Store the sprayer under cover, avoiding freezing temperatures and extreme heat (between 86° and 39°F).
- To prolong the life of the seals, regularly apply grease to the moving parts of the sprayer.
- Make sure there is no chemical rest between the tank and the shut off assembly

SAFETY RULES

- To avoid any consumption of the product, do not eat, drink or smoke while preparing and spraying.
- Do not use the sprayer on persons, animals, or electric installations.
- Do not spray with high winds or extreme heat.
- In the event of poisoning, see your doctor, taking the chemical product packaging with you.
- Never dispose of waste product or cleaning residues near water courses, wells, etc.
- Do not spray on open flames, fire or other sources of ignition.
- Use the sprayer only with substances which are compatible (scope of application).
- Use suitable protective equipment, masks, goggles, gloves, footwear, etc., to avoid contact of the chemical products with skin, eyes and mouth.
