DESCRIPTION:

In 1973, our company was established in Denizli, Turkey under Karaca Security Technology and Automotive Co. Ltd.

We supply the power window switch, turn light switch, wiper switch, hazard switch, headlight switch, mirror switch, brake switch, sensors, keyless control system, window closer module, rain sensor, signal switches, stoplight, automatic steps, and more.

We also have mold production along with the plastic injection process, electronic cards production, and software design.

We are the main supplier for many companies in more than 40 different countries' national and international automotive spare parts markets.

With our business model, importer companies in this area are supplied directly from Turkey and we offer secure delivery with fast service according to our stocks.

Our purpose is to provide a variety of products at the lowest cost to our clients. For us, products and service quality are very important.
