

## COMPANY PROFILE

---

Starting engines  
around the world

# Introduction

Greek Industry of Accumulators RECOR is a starter batteries manufacturer in Greece since 1964. With a production capacity of 500.000 batteries, we export our batteries in 4 continents.

# About us

## We manufacture starter batteries since 1964

The **Greek Industry of Accumulators RECOR**, is the fastest growing company and the sole producer of vehicle starter batteries in Greece.

It was established in 1964 by the SAKKOS family, in Athens and in 1998, following the technological developments in the constantly evolving worldwide market,

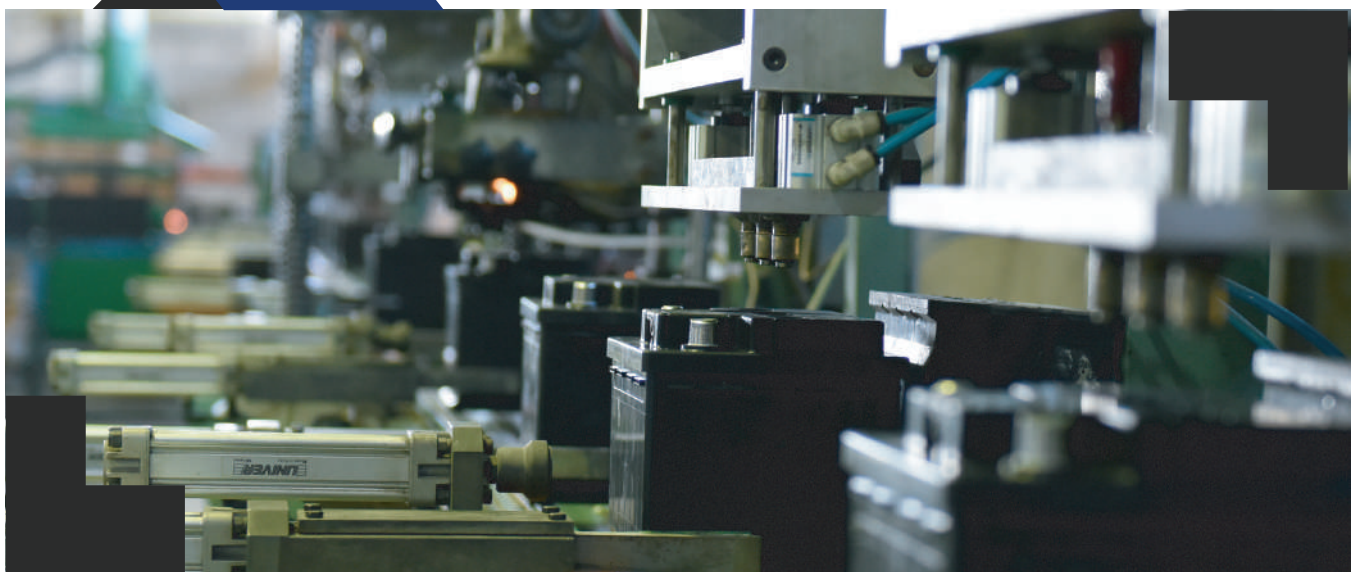

Taking advantage of six decades of experience in the production of batteries, and our continued presence in the industry since 1964, we produce high-quality batteries that are available in more than 600 locations in Greece and on 4 continents worldwide.

With a capacity of 500,000 batteries, designed and manufactured in Europe using the latest Ca+/Ca- technology, our batteries are available for a comprehensive range of automotive, commercial, and heavy equipment applications.

As a result of the above, we can, and do produce batteries of unmatched quality, offered at competitive factory prices, trusted by thousands of satisfied consumers.

# Exports

Our range of batteries is exported worldwide, to four continents in:  
Northern & Central Europe, Balkans & South Europe, Middle East & GCC, North - Subsaharan  
& South Africa, Australia, South-East Asia, Northern & Central America.

**European quality, Made in Greece.  
Close to you, Made for you.**

## Our vision

### Added Value Made in Greece

We envision Greece to be included in the countries that have a reliable manufacturer of batteries, and RECOR Batteries to be the partner of choice who provides premium product quality at competitive prices.

# Why us

## Your reliable partner

### Differentiation through selective distribution

We distribute our brands selectively, offering you the advantage to choose your distinctive pricing policy and the opportunity to stand out from the mass competition, with a "made in Europe" brand.

### Made in EU

Our customers based in the European Union, by importing our products which are produced in the E.U., can benefit from the intra-EU trading advantages.

### Based in Greece

Very quick delivery times and freight shipping efficiencies, both for road and sea transport.

### Flexible & customized production

Product specifications aligned according to customers' needs.

## BENEFITS

### Enhanced Technology Range

#### AGM Line

The ideal solution for vehicles with advanced Start & Stop technology. Special advanced glass mat separators provide significant improvement in all performance criteria including cycling ability, charge acceptance, and cranking power.

#### EFB Line

Intended for vehicles with entry level Start & Stop function, RECOR EFB battery offers superior durability in intense driving conditions and reliable power for latest generation vehicles with entry level Start & Stop technology. Additionally, RECOR EFB battery is the ideal solution for cars without a start-stop system, as it provides significant performance advantages and extended service life over a conventional battery.

#### EFB Truck Line

Commercial RECOR EFB technology, Ca+/Ca- sealed MF, serves the increased requirements of HOTEL FACILITIES TRUCKS, offering electric facilities to operators that demand cycling ability and vibration resistance.

### All Rounder Range

#### COMMANDER Line

Selective range – covering the extra power needs of the higher end car parc. Designed to deliver the cold-start performance and the superior power which is needed to meet the demands of the latest generation of premium cars with high load electrical requirements.

#### MASTER Line

Extensive/Versatile/Allrounder range – covering most of today's standard/middle end car parc. Designed to provide durable and reliable power in all performance criteria. RECOR MASTER is your truly allrounder delivering a balanced approach to cranking and longevity for the vast majority of vehicles with standard electrical loads.

#### MASTER TRUCK Line

Commercial RECOR Master batteries, Ca+/Ca- sealed or standard MF, are intended for older truck fleets with less electric facilities but still with a high demand for power and longevity.

### Value Range

#### DEFENDER Line

Honest & Reliable product, excellent for those on a limited budget serving the older/lower end car parc
