

CUSTO² POL[®]

COMPANY PRESENTATION

**A European Leader
Car Mats Manufacturer**

Since 1998

INTRODUCTION:

Founded in 1998 , we are a textile & PVC Car Mats Manufacturer, based at Wykroty (South-Western of Poland).

Thanks to our two decades of experience, we are the main car mats producer among Europe.

OUR BUSINESS CORE

TEXTILE MATS

PVC MATS

DISTRIBUTION OF CAR ACCESSORIES

As a Producer, we are capable to manufacture universal, semi-tailored and custom-made mats

WE ARE PART OF THE GTI INVESTMENT GROUP

Custo Pol: PVC and Textile car mats manufacturer. The company has a 10.000 m² area (production, warehouse and office). This area allows us to supply more than 210.000 car mats each month.

We are also the main supplier in Central & Eastern Europe and to car manufacturers (OEM).

This activity is part of the GTI Investment group which includes:

GTI Sodifac: Distributor of car accessories (seat cover, steering wheel over cushions, pillows).

JMB: Distributor of car accessories, car caring articles and tools.

Our French Group

Founded during the 80', Sodifac was firstly specialized in manufacturing car mats and car covers.

Over the years, Sodifac became GTI Sodifac and decided to focus into the automotive aftermarket dealing with car comfort & protection.

Nowadays, GTI Sodifac has 45 employees and is based in Northern France (59223 Roncq).

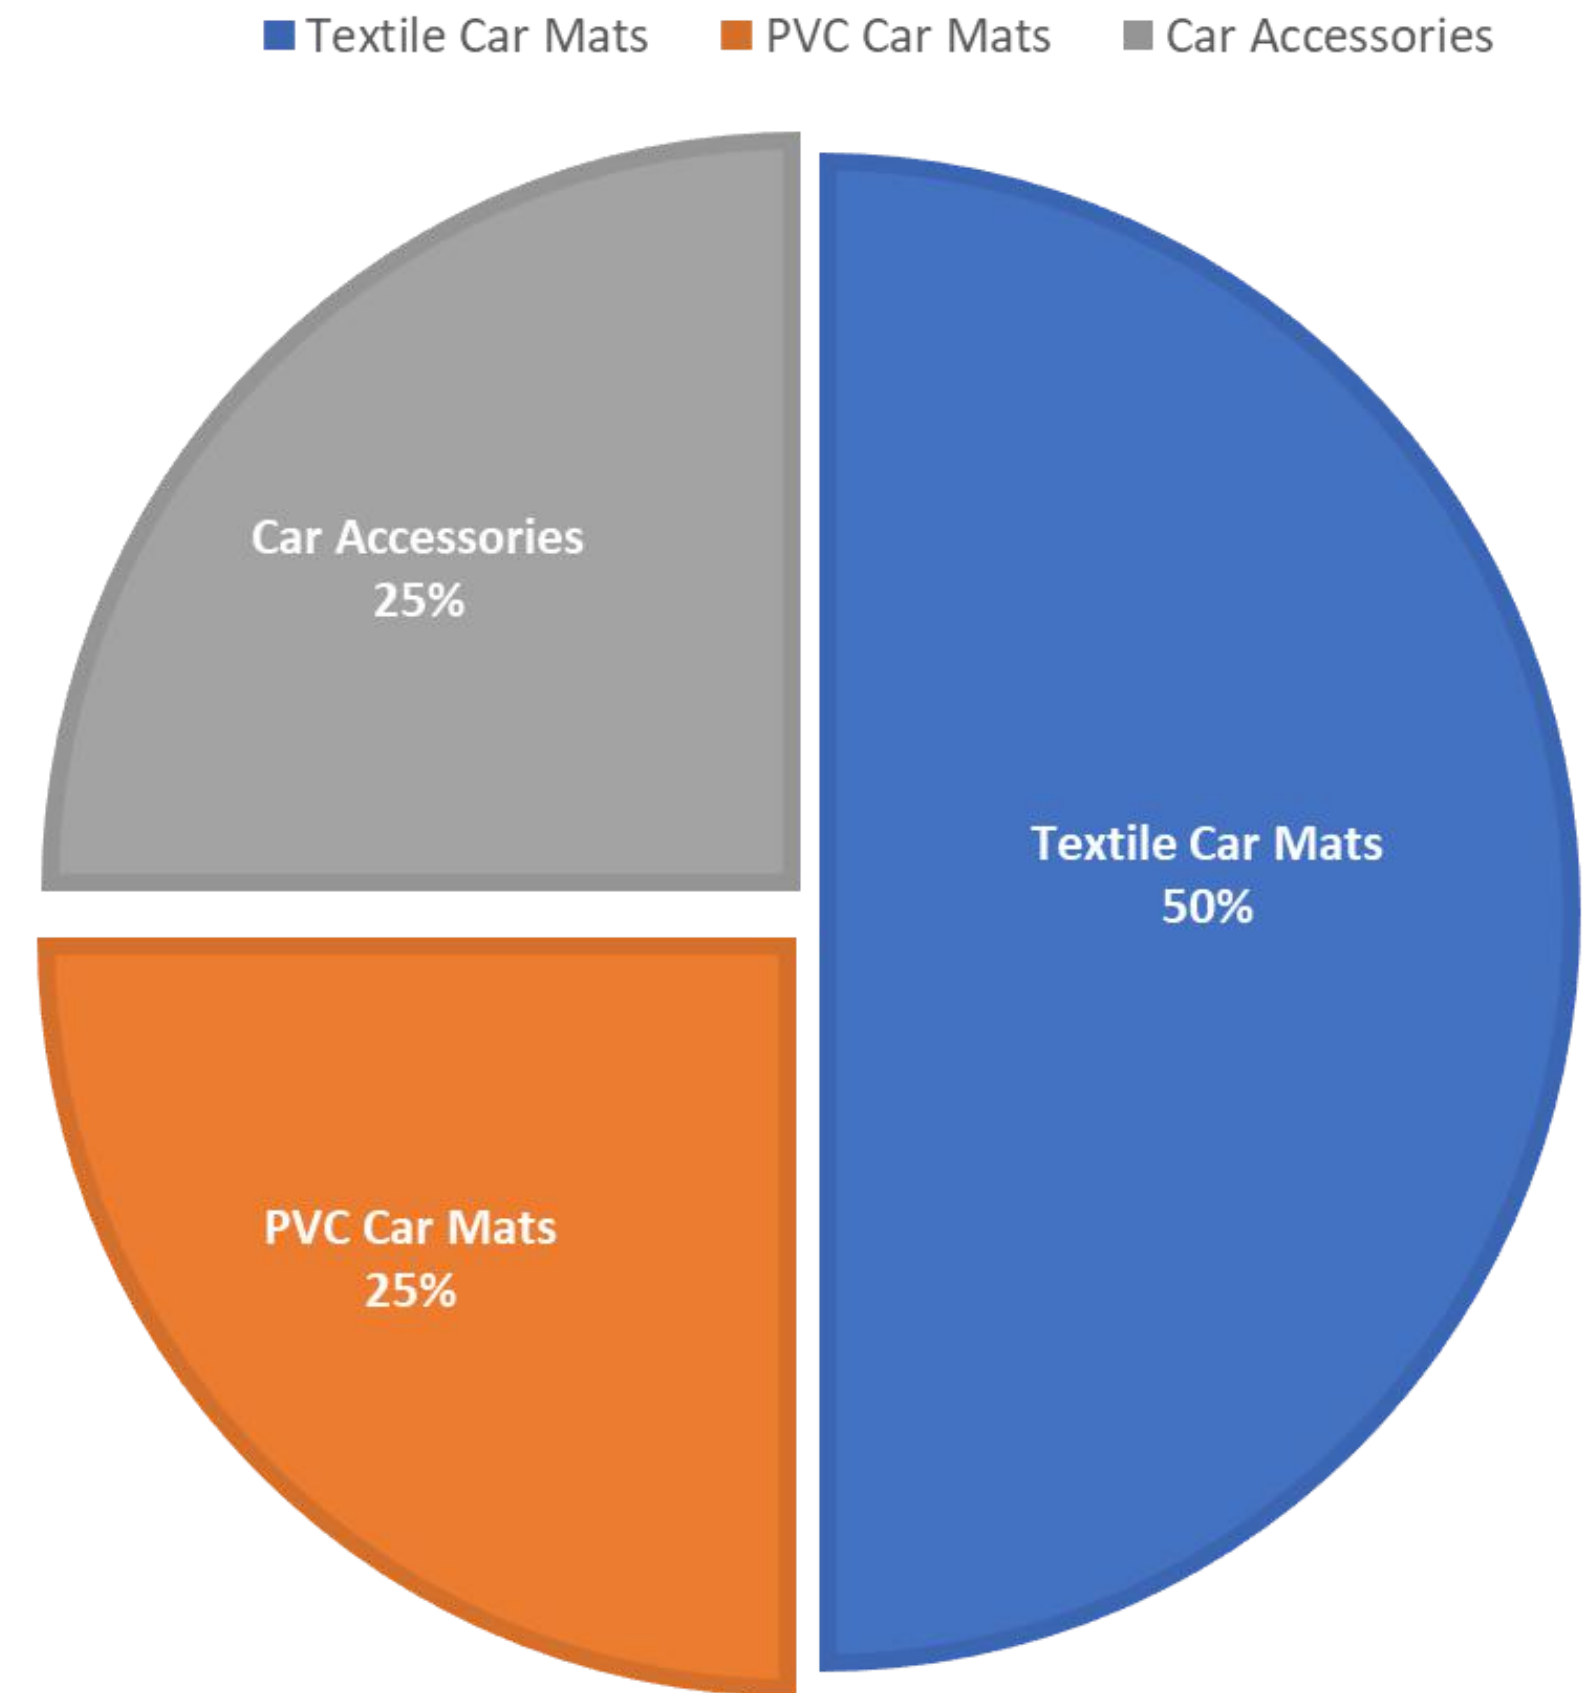

Then, we have JMB Distribution. Also settled in France, this distributor focuses its activity in selling car accessories, car caring & tools items.

OUR MAIN VALUES:

To develop a sustainable activity we strive to be reactive, dynamic. To improve our know-how, aftersale service and logistic support.

Repartition of Products

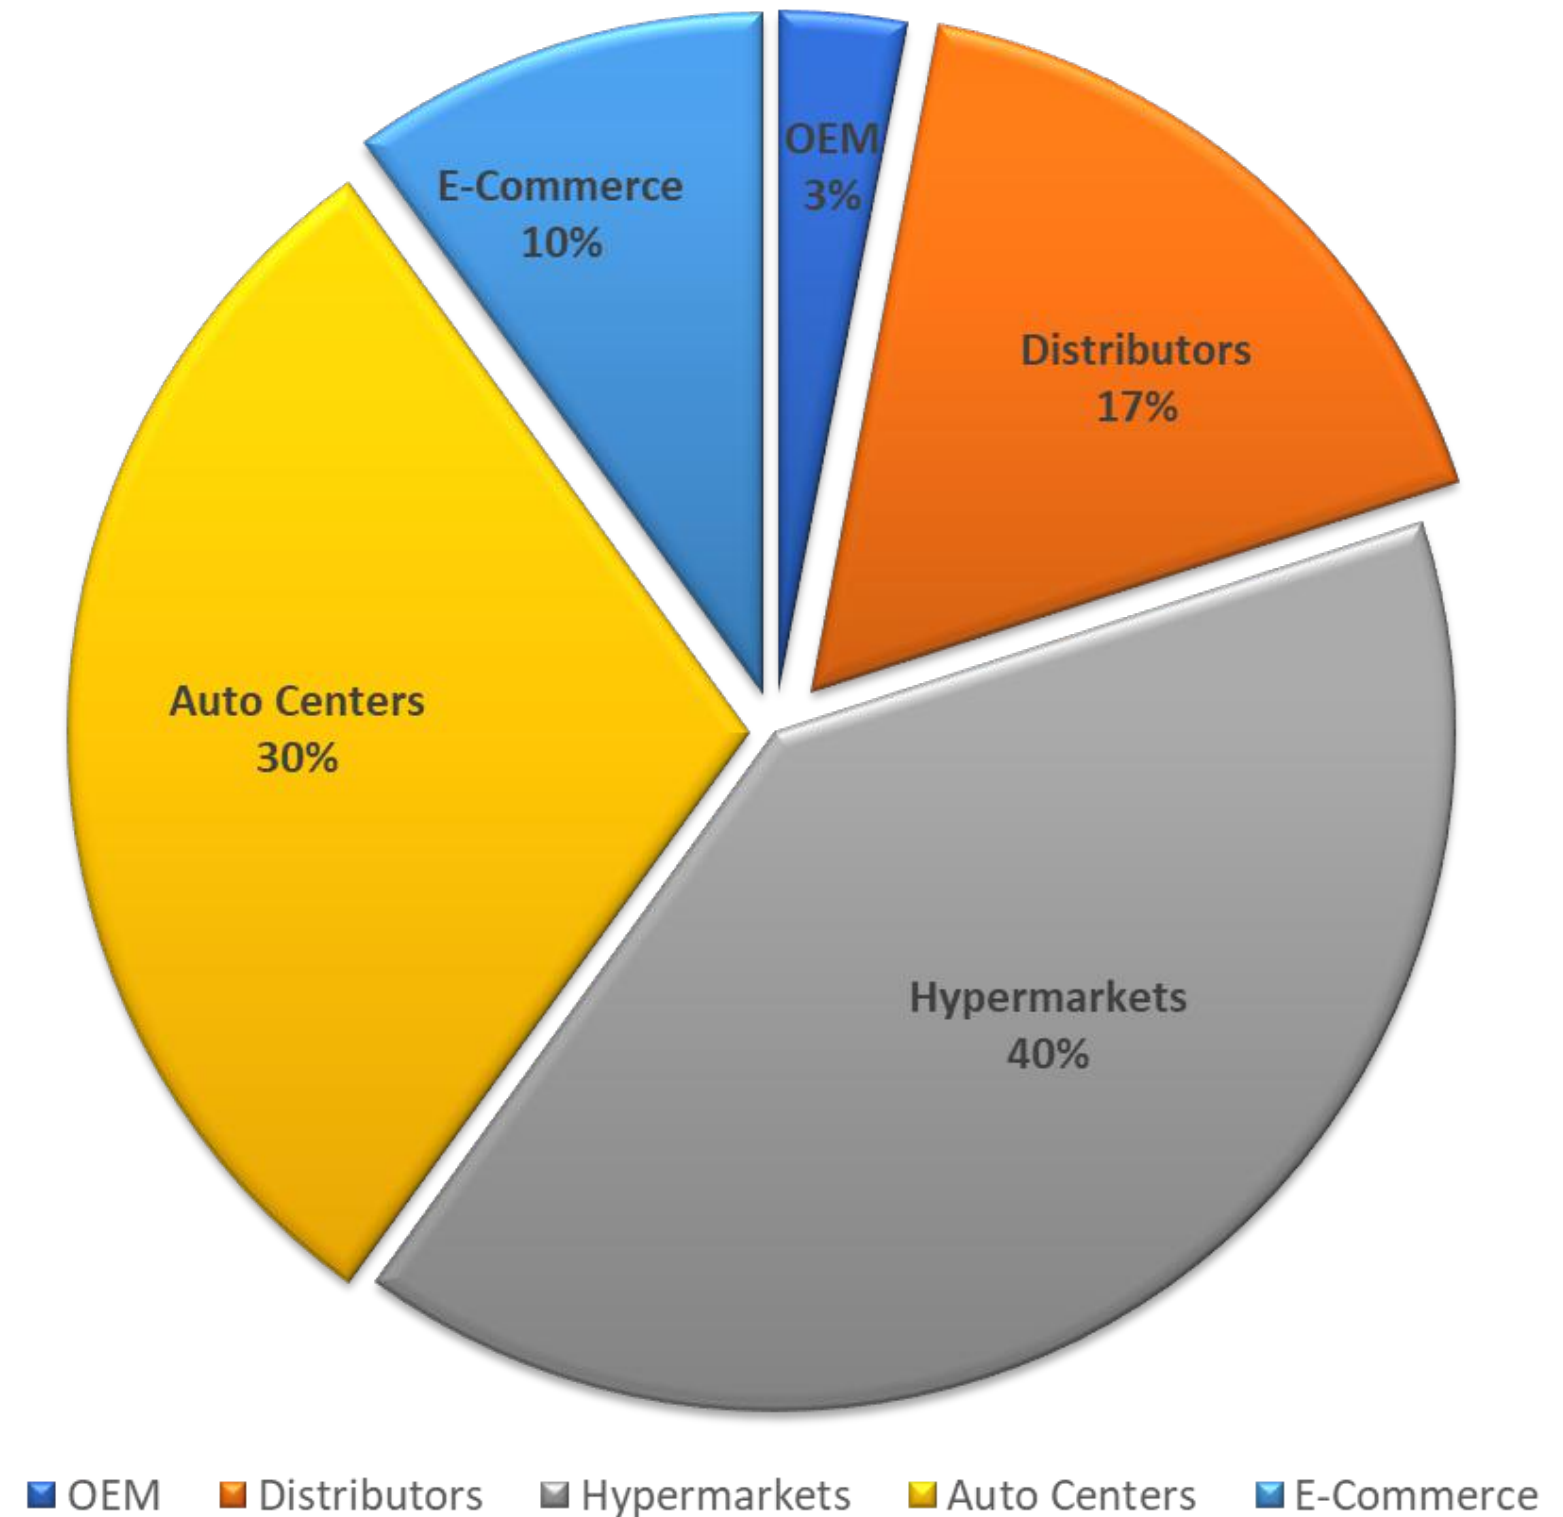

Our Main Clients

Our flexibility allows us to work with European retailers & Distributors from the West to the East.

Our Sales Chart

OUR TEXTILE MATS PRODUCTION

Production of Textile & PVC Car Mats. We have more than 2400 dimensions in our database.

Product Quality: **REACH QUALITY & IATF 16949**

To cut our shapes, we are using digital automatic machines (cutting plotters). This enable us to cut any shape of mat.

We are using several types of trimming and techniques to finish off the edges of the car mats: leather, nubuck, textile piping, overlock. We are using industrial sewing machines.

Welding the heel pads. Thanks to High Frequency Welding Machine. High current frequency causes elements of machine to heat up and combine heel pad and car mats together.

OUR PVC MATS PRODUCTION

To produce PVC Car Mats, we are using hydraulic injection molding machines. The plastic mass formed from the molten granulates is injected into appropriate shaped molds.

When plastic mass cools down and coagulates, molds are open.

Our PVC Car Mats will fit perfectly your car. They will be waterproof and will keep dirt. Very easy to clean it.

Finally, most important, they are made to last.

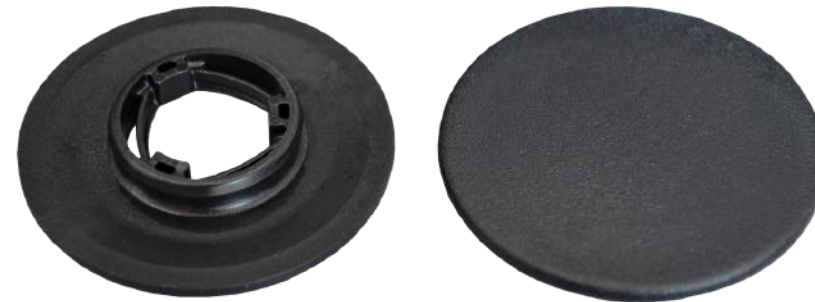

Fixation Mounting

Fixations are mounted in specially constructed press machine that uses pneumatic cylinders actuated with pressure up to 6-10 BARS.

In some cases, fixations are mounted manually.

EXPORT PACKAGING & TRANSPORT

**Completed and labelled sets are put in proper bags and carton boxes according to the previous agreement with the customer.
Everything is secured with stretch foil before shipment**

A location close to you:

- 20 mins by truck from the German border**
- 40 mins by truck from the Czech border**

We provide logistics documents such as Invoices, Packing List, CMR and Delivery Note.

We can organize the transport or the client can pick up the order.

We are capable to deliver directly in Central Warehouses

**We regularly exhibit to Automechanika Frankfurt
and will be there on September 2022**

MARKETING SUPPORT
