

We are a leading manufacturer of car parts in Poland. We offer engine parts for diesel and gasoline injection systems, such as: fuel pipes, leak off pipes, gaskets, sealings, repair and mounting kits for injectors for cars and light commercial vehicles - the current production program is constantly expanded. We have several hundred of the most popular references in offer.

Our many years of experience in sales and knowledge of internal combustion engines enable us to quickly adapt our offer to the needs of the market. The main feature of the company is the continuous improvement of the quality of our goods and services.
