Donzee Enterprise Ltd.

RIDOF® Wipes Introduction:

RIDOF® Wipes are industrial cleaning wipes that can effectively remove heavy-duty grease and grime like silicone, oil, tar, paint, adhesive, sealant, resin and more.

Exclusive lemon oil formula helps loosen the connection between surface and oil easily with soft non-woven wipes that gently reach the gaps and surfaces to perform a thorough cleaning.

Stop hurting human and the environment by using natural ingredients such as olive oil, lanolin and mineral oil to replace harsh chemicals like petrochemical solvents or corrosive alkali.

These water-based oil ingredients accomplish an irreversible cleaning result, the grease and grime will not go back to the cleaned spot or any other surfaces once they are wiped onto the wipes.

The cleaning process RIDOF® Wipes perform is rather a physical change than a chemical reaction, and thus the industrial messes would not change color on the wipes and the wipes can remove all kinds of oil-based messes.

Using wipes instead of cleaning methods with water involved to prevent wasting time running back and forth to the sink and save the resource of water. Reduce the pollution of the waterway by stopping discharging huge amount of water mixed with industrial wastes and cleaning chemicals.

Wipes would also be a better cleaning solution in a place with lower temperature and limited access to the water.

RIDOF® Wipes are assessed by SGS and Intertek that contain no toxic solvents and no harmful substances or harsh chemicals listed on EU REACH SVHC list and California 65 Proposition list.

With anti-bacterial properties that can help the user to remain a clean and safe working area.

This product is Ideal for many industries including machinery, automotive, construction, hardware, gardening, DIY, workshops and more.

Perfectly safe to use on valuable human skin, such as hands, arms, neck, face, and even hair, or precious possessions, such as tools, machines, and all surfaces.
