Company Profile

Zenith Industries is one of the world's foremost manufacturer, supplier and exporter of Engine Glow Plugs, Speedometers, Automotive Rubber Parts and Auto Components. Established in 1993, the entire business operations are led by Mr. Pritam Singh under his superior and expert guidance. Having a strong presence in the markets of entire Europe, USA, Australia, New Zealand, Russia, Middle East, East Asia, South Africa and Indian subcontinent, Zenith has transformed the lives of people through its wide assortment of glow plugs and auto components. Besides manufacturing engine glow plugs, we have 46 more other automobile products under our brand name 'Zenith'. The glorious journey of two decades, since its inception, is enough to describe the success story of the organization.

One of the most widely admired company and led by truly professionals, Zenith has successfully expanded its business across the globe. The successful voyage of business expansion tells a lot about the organization. Within a very short span of time, Zenith has become the expert in manufacturing and supplying diesel engine glow plugs. Believing – or even just hoping – that we can deliver something different or something of highest quality have been the mantra for Zenith Industries.

We are thriving to improve the quality of products at every level by complying the latest quality standards existing in the market. We are recognized as the pioneer and trustworthy name in the global market with quality engine glow plugs and auto components. With an aim to focus on international market we had already target several countries with quality products.

Oftentimes, you might heard customers asking could there be a more perfect product? After all, the whole point of manufacturing quality product is not what is being manufactured, but it should serve the purpose of customers. That's where we are strong as a manufacturing unit!

Tagline: Two decades of rich experience!

Infrastructure!

The state-of-the art infrastructure of Zenith Industries continuously inspires the organization to manufacture quality products that meets the international standards. We have been supplying high end and efficient engine glow plugs and automobile components from last two decades in the both national and international markets. This couldn't be possible without an efficient and effective supply chain and we have the most efficient logistics department to supply our products in nooks and corners of the globe. Manufacturing companies with a competent logistics department always have an upper hand as it maximizes the feasibility of their product among masses.

In the arena of infrastructure development, Zenith has proved its strength with Roorkee manufacturing unit in compliance with the advanced industry standards. There are two catches to the infrastructure development of a manufacturing organization. The first is that producing goods that are exceptionally high in quality and apparently meet all the quality standards made by global bodies.

Here at Zenith, you would find a tremendous campus that enables us to go beyond the excellence. It's true in all senses that without a vibrant infrastructure a company can't grow to its full extent. We understand and impart the continuous changes in the manufacturing industry so that our products remain on the top. We take care of all environmental aspects while manufacturing our products that keeps us maintain greenery in the surroundings.

A team of 50 highly focused and experienced professionals is another key factor that enable us to offer quality assured products to our customers. Furthermore, our logistics staff rigorously work round the clock to ensure timely delivery of the products to the end users. We are not only concerned about the infrastructure developments, in fact our approach is continuously stay update with the robust Information Technology (IT) system. There is always a need to potentially update the infrastructure and that's what define Zenith Industries as leader in the market.

Tagline: Bridging the gap between manufacturing and infrastructure
