DOGA

Our target is to produce a range of gas springs with complete European coverage and Asian parks, keeping a high storage for high and not such high rotation pieces.

All DOGA gas springs are supplied with the exact end fittings for each vehicle and strictly following the specifications of each manufacturer, DOGA gas springs offer the exact newtons for each application.

OEM QUALITY

Our gas springs are made of high quality seamless tubes, treated with phosphate to increase protection against corrosion and adhesion of the paint to the gas springs.

The diameters of the rods are checked with laser to detect imperfections and fluctuations in diameter to meet the OEM specifications.

DOGA gas springs are manufactured in accordance with the quality standards TS 16949 e ISO 9001.
