

FAST PULLER

360° PULLER SYSTEM WITHOUT SUPPORTS

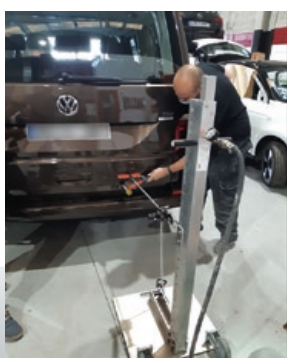

What is it? : chain traction system with a force of 250 kg which is fixed to the floor by means of a vacuum system that fixes the L or stretcher.

Who?: its base is sealed by means of a rubber that adheres to the floor and withstands up to 2,250 kg and a working pressure of 4 bar.

Patent No. (EPO) 22382091.

Why?: thanks to its mobility, lightness, small size and stability, it allows 360° repairs without the need for repairs 360° without the need for supports.

Who is it for?: it is ideal for express repairs that require quick repairs on all types of panels: wings, doors, running boards, gates, etc... In this way, we reduce repair times and the time required for the transfer of courtesy vehicles.
