The
ECO bubble
factory

ALWAYS RECYCLE...
For a sustainable future.
made with + 80% recycled plastic

R3D is producer of bubble products, being the car sunshade one of our best selling product. Located in Portugal, 90% of our production is destined to export. For that reason, we ship not only to Europe, but world-wide.

Being the European market leader in bubble products, we are proud of our environmental awareness, since we produce 100% recyclable products made from over 80% recycled materials. All the production stages are made by us, nothing is outsourced. We use "clean" energy all along the production process also, since we have our own solar energy unit. Sustainable development should be the primary criteria for all industries, because the future of all of us depends on the decisions that are made today.

See how **it's made**

The
ECO bubble
factory

Own production of solar energy

5.000 m2 of instaled solar panels
produce energy for all of our
production processes.

We do our own recycling process.
We collect packaging waste from other
industries like food packaging and
transform it into main component to
make our bubble material!

BECAUSE WE CARE
ABOUT THE FUTURE...
