THE HOUSE OF TIME

mufflers for vintage and classic cars

The House of Time

2,500 part numbers, more than 25 years old

The House of Time is in a class by itself, globally. Only a leader in the aftermarket sector like IMASAF could accumulate decades of history with an in-house inventory of more than 2,500 part numbers that are more than 25 years old. It is a real treasure-trove for today's enthusiasts, like the Young-Timers movement or, classic car buffs in general. Our specialization and insights allow us to meet the needs of a clientele with which we often find ourselves modeling our passion by constructing real, true collectors' items. We reconstruct history, driven by our love for classic cars.

Handmade passion

It all began with a great talent -- the ability to entirely rebuild or restore classic and vintage car exhaust systems, thanks to the unique sensitivity of authentic artisan mechanics and their absolute fidelity to the original designs.

Each piece is one-of-a-kind, crafted with such skill that its qualitative level is superior to that of the original.

We model our passion through the construction of real, true collector's items.
