About PETROVÖLL GmbH

Petrovöll GmbH specializes in the development, production and distribution of advanced high performance lubricants for automotive, industrial and marine applications. It was established in 1999 in Bochum, Germany and is a wholly owned subsidiary of the Haliburg Group of Companies.

High quality products, short delivery times and competitive prices make the company, which is ISO 9001:2008 and ISO 14001 certified, a recognized brand and trusted trade partner both at home and abroad.

Petrovöll's main export trade markets include the Middle East, Africa, South America, Asia- Pacific and CIS countries. At present, the company supplies to customers in over a dozen countries around the world, with a distribution network expanding rapidly.

Quality management is applied to all areas of Petrovöll's operations. Detailed descriptions of production and operation procedures guarantee a consistently high standard of product quality and regular customer surveys allow weak points to be quickly discovered and addressed appropriately.

About HALIBURG GROUP of Companies

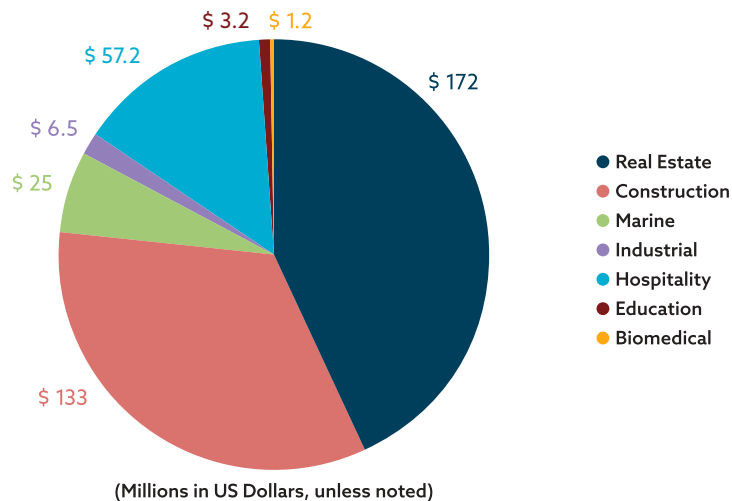

Haliburg Group Of Companies is a multinational conglomerate composed of a vast number of brands and of offices that covers a highly diverse range of industries.

With offices in Europe, Asia, Africa and the Middle East, Haliburg has rapidly built a reputation for delivering reliable, high-quality services and innovative products. The Group's passion for discovering progressive solutions combined with the practice of employing highly skilled professionals who are considered to be experts in their chosen fields, ensure that any project they undertake is handled efficiently using only the best industry practices.

Excellence. Innovation. Performance.

Guided by these core values, Haliburg's goal is to equip all its offices across the globe, with the strength and support that the Group's combined expertise and resources can provide.

Our CERTIFICATIONS

Petrovöll has successfully completed the certification process of both API and SAE soon after being awarded with the ISO 9001, ISO 14001 and OHSAS 18001:2007 accreditations. The decisive criterion for this certification was our business process-integrated quality management system which organizes the workflows and interfaces to customers, suppliers and other business partners.

Strategic control tools introduced for the individual workflows enhance the effectiveness and quality of the business processes throughout the company, and focuses on the prevention of non-conformities. Furthermore, the company's front liners conduct regular customer interviews to help identify actual and perceived weak points and ensure that these issues are addressed and eliminated straight away.

The Petrovöll team is particularly proud of the company's well-earned certifications and its globally recognized TS (Technical Specification), effectively consolidates the requirements of numerous international automotive manufacturers. Through our OEM certifications with car manufacturers like Caterpillar, BMW, Volvo, Renault, MAN, D. Chrysler, VW and Mercedes, we aim to further boost our competitiveness while strengthening employee motivation and securing jobs.

Our PRODUCTION FACILITY

While Petrovöll's main R&D site is located in Bochum, Germany, the company also owns and operates a state-of-the-art production and blending plant, which has a capacity of 50,000 MT/pa, within the Abu Dhabi Industrial Zone in the UAE. Within these sites, the company strives to do everything possible to remain true to its vision of creating only the highest quality products that meet or even exceed the world's strictest requirements and API standards.

Petrovöll utilizes only the latest technologies and is equipped with a fully automated blending system made in Germany. Advanced logistics also provide the company's production team with unlimited growth opportunities. These advantages allow Petrovöll to deliver only the best quality products, achieve full customer satisfaction and remain committed to achieving full compliance in all aspects of the business.

Our BLENDING and FILLING FACILITY

Blending & Filling Capacity

- ⇒ 6,000 MT total Base Oil storage capacity
- ⇒ 100 MT lubricants blending per day. (1 working shift)
- ⇒ 50,000 annual blending capacity
- ⇒ Fully automated blending process
- ⇒ 4 fully automated filling lines:
 - ▶ 4 x Fully automated filling lines for 1L, 4L, and 5L bottles capacity of 3000-6000 bhp.
 - ▶ 4 x semi automatic drum, IBC and Flexi tank filling lines.
- ⇒ Ability to deliver in multiple packs
- ⇒ Equipped with special agitators for viscose media and heating system, provided by ViscoJet, Germany.
- ⇒ All tanks are tested and Certified in accordance with API 650, ASTM A36 by TÜV SÜD Germany.
- ⇒ Thermic oil heating boiler system supplied by Alitaliya. 1162 Kw
- ⇒ Base Oil Offloading pumps x 6. Supplied by Netzsch/Germany 8KW, 70m3/h with Multi Bag Filters 10 bar.
- ⇒ Base Oil Feeding pump x 6. Supplied by Vikings/USA, 22kw, 70m3/h with Multi Bag Filters 10 bar.
- ⇒ Additive offloading pumps x 5. Supplied by Vikings/USA, 11Kw, 45m3/h
- ⇒ Additive feeding pumps x 5. Supplied by Bradford/UK 7.5Kw, 25m3/h
- ⇒ Fully automated SCADA system based on Siemens S7/Germany with central process visualization provided by Siemens WinCC, commissioned by Rienhoff/Germany.
- ⇒ 240 electronic sensors installed
- ⇒ 120 Tons fully automated weight bridge, to monitor & control product weight at both entry & exit points of the production facility.

PRODUCTION CAPABILITIES

- ▶ Automotive Engine Oils
- ▶ Automotive Gear Oils
- ▶ Automotive Transmission Fluids
- ▶ Marine Specialty Oils
- ▶ Industrial Oils
- ▶ Rail Road Engine Oils
- ▶ Hydraulic Oils
- ▶ Turbine Oils
- ▶ Compressor Oils

- ▶ Gear Oils
- ▶ Special Application
- ▶ Automotive & Industrial Greases

Production facilities include the following:

- ▶ Lube Blending for various grades
- ▶ Small Package Filling
- ▶ Lubricants Testing Laboratory
- ▶ Drum & Pail Filling

SLIDE OILS

SLIDE OIL 32, 68, 220

PRODUCTION QUALITY CONTROL

We are dedicated to maintaining the quality in the manufacture and supply of all of our probiotic formulations and are totally committed to the principles and application of Quality Assurance and Quality Management Systems.

By ensuring we have the facilities, procedures, quality systems and suitably trained and qualified personnel to carry out the manufacture of our products, we are able to meet customer requirements and control product performance, dispatch and transport, technical and sales support and all aspects of administration.

All Petrovöll products manufactured in our facilities are subject to our stringent quality control procedures and we guarantee that the products manufactured will be of the highest quality.

We strictly maintain that all raw materials used in our products come from quality

assured and approved international certified suppliers, and implement systems, which are designed to conform to OEM'S Quality Standards.

Quality control is implemented and maintained by our own in-house team at our well-equipped laboratory, which carry out the analysis of raw material and finished products. After which, Production Certificates of Analysis are kept for every batch of products and are made available on request. Independent laboratories may also be called upon to back our testing operations as required in some testing cases.

We strictly maintain fully documented Quality Assurance, MSDS Material Safety Data Sheet, Data Sheets - Technical Specifications and HACCP (Hazard Analysis and Critical Control Points), which form the basis of all our procedures and operations.

CLIENT MARKETING SUPPORT

- We strive to provide our customers with products and services that meet and even exceed their expectations.
- We are committed to continuous improvement and strictly follow a Quality Management System, which provides a framework for measuring and improving our products and performance.
- We continuously strive to deliver optimal products that meet customer expectations as well as provide services to improve the data for these products.
- We work to ensure the best in services and products for a worldwide coverage of the best maps in the market.
- We make sure that we provide our customers with the best products, delivered on time and with the right quality, through regular reviews (both internally and externally) of our internal procedures.
- We strive to maintain our standards in every stage and we believe that by promoting economic developments, we can play an essential role in enabling a range of global industries and consumer activities and help support economic growth and social development worldwide.
- We support our clients, both locally and in foreign countries, by creating business opportunities and by supporting our customers to grow further with promotions, advertisements, media, publicity and marketing tools/plans.
