**YATU COMPANY
PROFILE**

Every drop makes quality paint

Speech from CEO

A company cannot succeed without innovation of operation and technology, and it is exactly the power of innovation that drives YATU to rise up in China automotive paint industry. Innovation is our corporate culture which guides us to work hard and maintain a sustainable development. YATU culture is not words on the paper, but the wisdom crystallization from years of development.

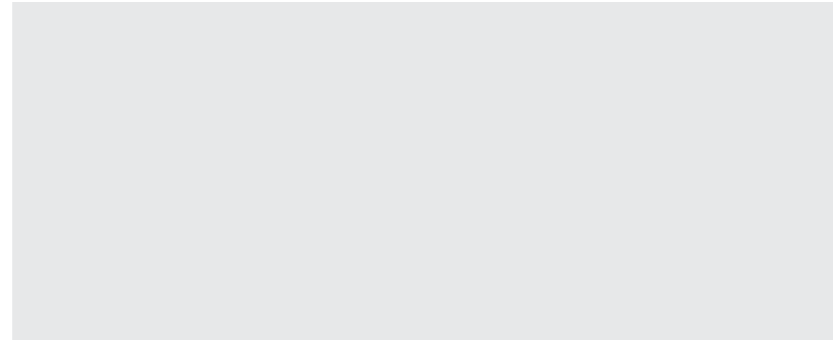

Years' of challenges and difficulties forge our ambition to make YATU a world-known Chinese brand. YATU must realize that the world is changing dramatically, the market is developing rapidly and we need to keep ourselves improving and upgrading. Only in this way can we overcome the difficulties and go from strength to strength.

On the way ahead, YATU needs to learn from Chinese traditional culture and combine it with modern time spirit. I firmly believe that by the spirit of science and hard-working, YATU people will create a brighter future.

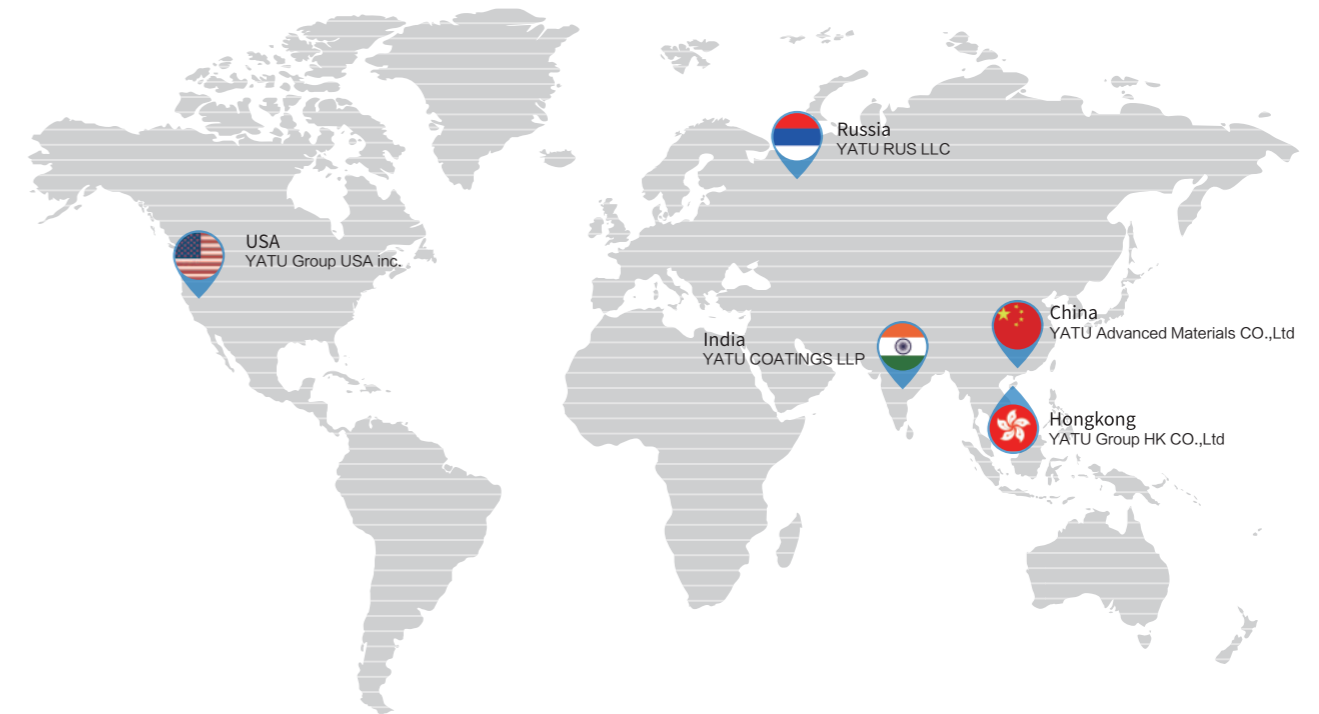

CEO, Mr. Feng Zhaojun

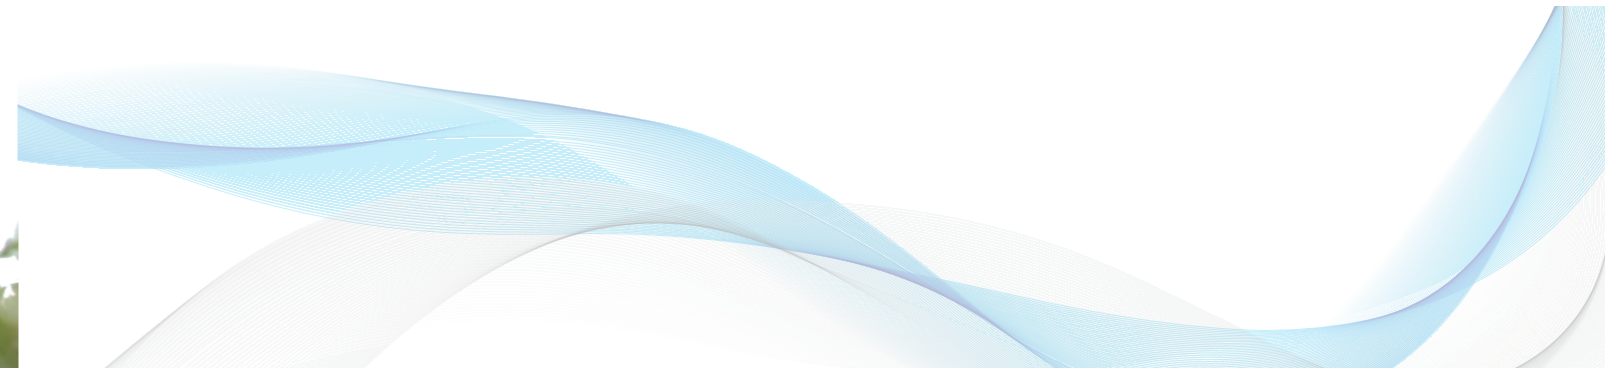

01 ABOUT YATU

Founded in 1995, YATU Advanced Materials Co. Ltd. is a high-tech enterprise comprehensively dealing with R&D and manufacturing, brand operation, professional technical service and skill training, and also a manufacturer of waterbased automotive coating and high-end industrial coating. We specialize in development of new energy vehicle paints, automotive refinishes and high-end industrial coatings. The establishment of YATU branches around the world are the target to support the further growth ambition of YATU in overseas market.

YATU applies the lean green and intelligent production mode. With the advanced waterbased paint-making equipment and the environment-friendly production processes, its production base performs production and manufacturing with the aid of automatic control, fully-sealed pipeline environment-friendly conveying, and intelligent big-data metering and analysis system; and applies TPS lean production mode in its production process, YATU owns the strong capability to meet the globe marketing needs. YATU fully implements the ISO 9001 international quality management system and ISO 14001 international environmental management system. And take the lead in passing the IATF 16949 certification. With good brand image, competitive price and quality technical service system, YATU won business cooperation with many paint dealers and famed manufacturers from automotive aftermarket, NEV OEM project, high-speed train and other top-line industry field. The products also are exported to approximate 100 countries.

Enterprise Vision – Leading Chinese Automotive Paints, Contending World Class Brands

“Leading Chinese Automotive Paints, Contending World Class Brands” is the strategic target of YATU. Located in Heshan City, Guangdong Province, developing from a small size company to a large scale enterprise, YATU has established its position as market leader and has national influence in automotive refinish industry gradually. With rich experience and continuous innovation, YATU would forge ahead to be industry leader and achieve the strategic target in near future. This vision is the grand of goal and driving force of YATU, encouraging YATU people to make progress and renew their know-how from time to time.

Enterprise Spirit – Innovation and Dedication

Innovation: We require all YATU people to be innovated, tactical, dared to confront challenges and overcome obstacles.
Dedication: We require all YATU people to be dedicated and rigorous and always be pursuing perfection, no matter in products, work or personal life. YATU people should be honest, responsible and sincere to our career.

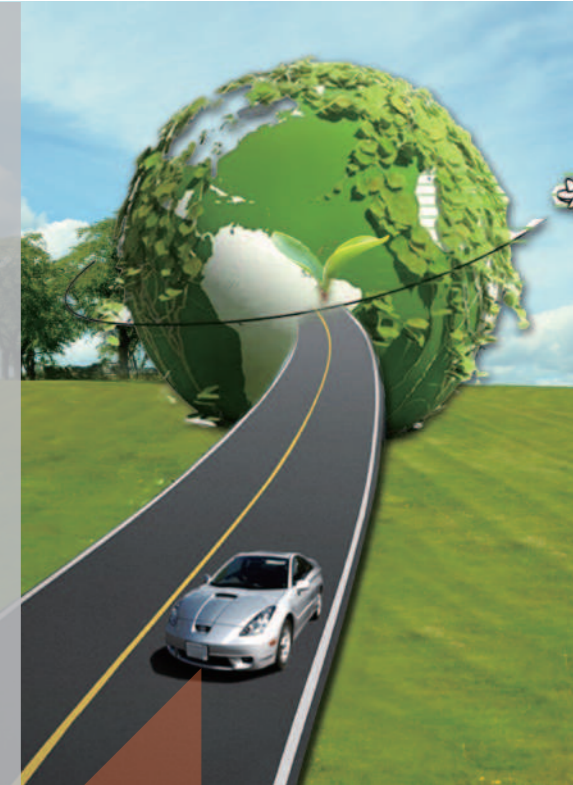

Enterprise Mission – Making your automobile more colorful and your life more wonderful

Automobile shine because of YATU paint, and YATU is known from the shining cars. The two benefit mutually. Automobile become colorful because of YATU paint, and people’s life become colorful and wonderful since they own it. YATU’s mission is to protect your beloved automobile and make your life colorful and wonderful.

Sustainable Development– Green Lights Up Our Future

YATU sticks to the Scientific Development Concept in accordance with current and long-term interests of the enterprise and pursues a sustainable development based on green economy. We research and develop environmental-friendly waterborne paints, build and promote green paint brand under the principles of Low Consumption, Low Emission and Low Carbon.

Every Drop Makes Quality Paint

- Ethical and Environmentally sustainable
- Full traceability back to the raw material supplying
- Transparency in supply chain
- Samples testing in Lab
- Testing the samples in the market to verify the product performances
- Proceeding order production and quality inspection for each order
- Packing and delivery

04

Research & Development Center

- > More than 40 R&D staff
- > The 6-floor R&D Center building has a total floor area of 10,000 square meters
- > Well-equipped with precise devices and be configured as a walk-in temperature and humidity chamber to simulate various natural environments
- > Painting robot is working under constant temperature and humidity to simulate the actual production process in OEM automobile factories
- > Independent devices for pilot test of polymer synthesis, waterbased and solvent products
- > Full-equipped testing and analysis facilities
- > Cooperation with universities to facilitate the industrialization of technology patents and cultivate talents for the industry

05

Paint Production Facilities

- > Investment a big mount to establish the production facilities
- > The main production building is a 4-floor production building with an area of 12,800 square meters
- > Strong annual production capability to meet the global marketing needs
- > High-automatic and state-of-the-art the production program design

06 Training Center

07 Showroom

- Presenting the latest car paint colors
- Presenting the production line in various application fields
- Company history presentation

- professional trainee team
- With an area of 15,000 square meters
- Setting a combination model of sound Panel Repair System and independent Spraying line, which is a high simulation of repair process in 4S shop
- Advanced infrared heating system is equipped in each Spray booth
- Central Dust Collecting Intelligent Dry Sanding System from Germany
- One-stop training: color matching, substrate treatment, topcoat spraying, topcoat maintenances and theory lectures
- Welcomed by automobile manufacturers to do trainings for its technicians, 2000 technicians be trained annually

08

YATU Business Fields

>> **AutoREFINISH**

Development of waterbased and solvent lines, YATU 's auto refinish system offers a complete range of products including topcoat, basecoat, single stage urethane, urethane clear coats, urethane primers, plastic primers, specialty additives and more. The basecoat and single stage systems offer state-of-the-art color matching supported by an easy to use color formula retrieval system, variant color chips, spectrometer. Easy to use, great results, and the best overall value deserve the investments on it.

>> **IndustrialPaint**

YATU Industrial Paint is an advanced product system which consists of both waterbased and solven lines. Both systems offer products from epoxy primer, primers, topcoat, clear coats and specialty additives. With all made from environment friendly pigments, minor odor and extremely low VOC content, the waterbased line has the same application advantage as solvent, high quality and efficiency. The whole Industrial Paint system is widely applied in various vehicles such as coaches, high speed trains, New Energy Vehicles and parts, construction machinery, heavy duties, and advertisement sign board etc.

09

YATU COLOR SOLUTIONS – ALL FOR YOUR ONE-STOP SERVICE

>YATU ColorPlus – Variant Color Chips

Car color retrieval has now become much easier with the newest YATU ColorPlus. A QR code has been added at the back of each color chip. The service is free of charge to YATU customers 24/7.

- Formula – 120, 000+, convenient to find the right color quickly
- Color – 7403 colors, update yearly
- Classification – Classified by color group, red, yellow, blue, green, black, violet, etc.
- QR Code – Scan the QR code to get the formula and choose the quantity you want to mix

>Color Mixing & Retrieval System

- Full support retrieval via cell phone, computer, pad, Android Box
- 120, 000+ formulas retrievable
- The state-of-the-art color matching supported by easy using color formula retrieval system.
- Traceable quality control system

>Automatic Automotive Refinish Mixing Machine & Classic Mixing Machine

Benefit of Automatic Machine:

- Save labor Cost
- Increase Efficiency
- Eliminate mis-tints
- High profits

Features of Auto Machine:

- Automatic stirring – To prevent sedimentation of the toners
- Repeatable accuracy – Down to 0.015ml with one-time calibration
- Heating (optional) – Keep toners in an environment of 8–15 °C
- Toners last long – Single direction valve + sealing ring effectively prevent toners from volatilizing
- Low maintenance nozzle – Inventive patent 100% recirculation technology purge free and residue free
- Clean tinting area – No more paint spillage

>Spectrometer – YATU PerfeMatch™

- Small size, easy handling
- Touch screen, USB charging
- Self-calibration, automatic correction
- Wireless Wi-Fi connectivity
- Full support by automatic mixing machine

Awards and Accreditations

- ★ REACH Certificate for Raw materials
- ★ ISO 9001 International Quality Management System Certificate
- ★ ISO 14001 International Environmental Management System Certificate
- ★ IATF 16949 International Quality Management System for Automotive Industry Certificate
- ★ Intellectual Property Management System Certificate
- ★ Member of China Association of Environmental Protection Industry
- ★ Member of Guangdong Association of Environmental Protection Industry
- ★ Member of Chinese Society for Environmental Sciences
- ★ Famed Chinese Waterbased Paint Brand
- ★ Rated High-tech Enterprise
- ★ Guangdong Famed Brand
- ★ Guangdong Top Brand Product
- ★ Guangdong Auto Refinish Research Center
- ★ National Auto Refinish Standard Development Organization
- ★ Specific Implementation Organization for Guangdong Major Scientific Projects
- ★ Most Influential & Innovative Chinese Brand in Auto Paint Industry
- ★ YATU-South China University Auto Refinish Engineering R&D Center

Remark:
We already applied REACH certifications and have it through our customers of high quality raw materials.
