

BETTER, FASTER SMARTER

Winding Solutions

For more than 70 years, Maxcess builds winding systems under its Tidland brand that are durable, designed for ease-of-use and engineered for reliable, long-lasting operation.

Tension Control Solutions

MAGPOWR tension control solutions provide controller, tension readouts, tension sensors, amplifiers and torque devices to get the job done right. No matter if customers are converting or printing, working with paper, film or wire.

Load cells Controller & readouts

Magnetic particle clutches & brakes
Pneumatic brakes

Hysteresis clutches & brakes

Precision Roll Solutions

Maxcess combines the best technology from the brands of Webex, Valley Roller and Componex to offer a comprehensive portfolio: from idler rolls and rubber coverings to high-performance heat transfer and vacuum rolls with up to same day production.

Rubber Coverings WINertia Aluminium Idlers Idle Rolls Heat Transfer & Chill Rolls Vacuum Rolls

Maxcess Vision Systems

With state-of-the-art Industry 4.0 technology, the operator-friendly vision system solutions from Maxcess allow to automate workflows, reduce waste, improve quality and yields. 100% Inspection. Finding defects before they become costly.

Less Scrap No Returns or Rework Reduce Downtime and Waste Automated Smart Converting

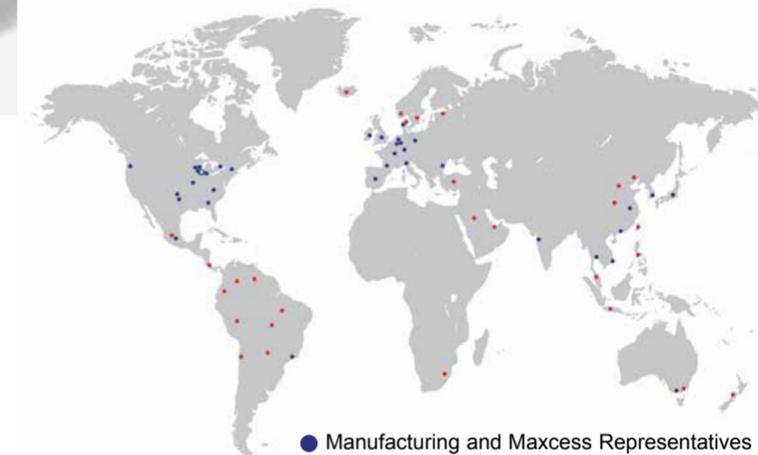

Web Handling Solutions

Maxcess is a global leader in the manufacturing of industrial automation systems and components for handling a wide variety of web materials, e.g. paper, plastic, non-woven, or metal.

The Maxcess Way

Maximizing our customers' benefits includes Maxcess being the ONE partner offering comprehensive solutions worldwide – automated converting line solutions to run better, faster, and smarter.

Maxcess customers appreciate the combination of over 80 years' experience, state-of-the-art technological know-how, the holistic approach and the wide product portfolio of renowned brands like Componex, Fife, MAGPOWR, RotoMetrics, Tidland, Valley Roller, and Webex.

With 2,200 staff and through its international locations and manufacturing sites plus its extended network of partners, Maxcess offers its customers sustainable distribution and service support in more than 90 countries worldwide.

Rotary Dies and Support Tooling Solutions

For more than 65 years, the Maxcess product brand RotoMetrics has been the worldwide leader in precision rotary tooling. RotoMetrics enables the efficient conversion of substrates into individual labels and parts, through customized cutting solutions.

Flexible Dies
Solid Dies
Magnetic and Print Cylinders
Non-stick RotoRepel™
Anvils

Guiding Solutions

In 1939, Irwin Fife invented the first web guide in his garage in Oklahoma City, solving the challenge of keeping paper aligned in a high-speed newspaper press. Today, Maxcess delivers under its Fife brand a full range of advanced web guiding systems and products to reduce downtime and increase throughput.

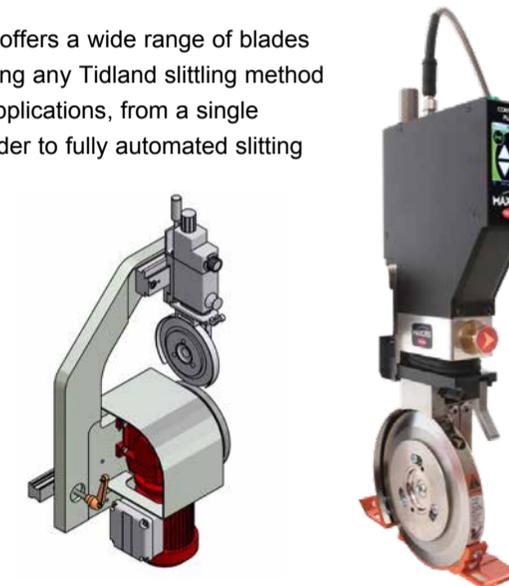

Web Guiding Systems
Sensors Offset Pivot Guides
Metals / Strip **Steering Guides**
Actuators

Slitting Solutions

Tidland offers a wide range of blades supporting any Tidland slitting method for all applications, from a single knifeholder to fully automated slitting system.
