

■ About us

Since 1974, Schmits Chemical Solutions creates, develops, manufactures and delivers chemical solutions. With our talented team, own R&D department and multi-purpose pilot plant, combined with a high dosage of knowledge and expertise, we are your partner for all your needs in the field of chemistry. We are able to present a standardized product portfolio, but we can also provide tailor-made products based on customer specific requests.

Because of our craftsmanship and high-quality products, we know how to help our customers. For the international textile and non-woven industry, we offer an extensive product portfolio with six product groups to create distinguishing effects to textile substrates. Furthermore, our craftsmanship and highly efficient operating procedure makes us the ideal partner for toll-manufacturing, which includes manufacturing, research and development, packing and repacking, sourcing, and logistical services - all under strict confidentiality. In addition, we have an extensive range of professional cleaning agents that are being used in industrial environments and by end users

such as cleaning companies, specialised maintenance contractor and industrial environments.

Relying on skills acquired over the years and the continuous pursuit to perfect products, combined and personalized to the requirements of our customers, is what brought us to where we stand nowadays. We like to work for & with our customers towards innovative chemical solutions that creates a strategic cooperation on the long-term. One of our main strengths is the ability of providing flexibility. Due to our own fully certified production facility and quality laboratory, we are able to handle your demands quickly and flexible. However, never compromising on reliability, we always work with a customer-oriented way as a fundamental.

All our products are environmentally friendly, add more value to your products and give you the advantage you need in today's competitive market. **NATURALLY, ADDED VALUE, TO STAY AHEAD!**

TOLL-MANUFACTURING

■ Schmits toll-manufacturing

When you have an idea or formula but you lack the proper means of production facilities or sufficient capacity, or you would prefer to focus on your core business, we can certainly be of assistance. Because of the combination of our knowledge & expertise in the chemical and industrial sector, our extensive production facilities, own warehouse management and a very efficient way of working, we are your ideal partner for toll manufacturing. Under strict confidentiality, we are able to manufacture (semi-)finished chemical products according to your formula and specifications. Additionally, we can also help you with purchasing raw materials, packaging and/or fill your product, documentation, quality control, and/or storage and transportation. We are extremely flexible and not afraid to take on challenges, but we do not compromise on quality or reliability and we are fully up-to-date in terms of legislation and regulations.

PRODUCTION

The raw materials are mixed and stirred in a mixing tank with specific stir technology. The proportions of the raw materials and the order in which they are added is linked to the proper stirring technique and the optimal temperature. Finished products are only released if they pass the presubscribed quality check.

R & D

PRODUCTION PREPARATION

FILLING/PACKAGING

LOGISTICS

R & D

At our R&D department with its own laboratory, we test whether it is production-technically possible for us to manufacture your formula. If desired, we could apply our knowledge, experience and expertise in manufacturing to explore ways to optimise your existing formula. We focus on the following three questions: Can this be done more efficient? Can this be done more environmentally friendly? Can this be done better?

PRODUCTION PREPARATION

We make sure that all required raw materials and desired packaging are available, so that we can schedule the manufacturing process. If your product or formula requires special wishes, we make sure to completely tailor the process to your specific needs.

FILLING/PACKAGING

After the product is approved and released, it can be packaged. The desired packaging can be selected from our standard assortment or a specific requested packaging for your product. .

LOGISTICS

Subsequently, the finalized product can be prepared for pick-up in our shipping area or we can organize transport to a specified address.
