1/64" (0,016) 0,4mm
1/128" (0,008) 0,2mm
1/256" (0,004) 0,1mm

105 - L. Gold glitter

147 - Green glitter

1kg-5kg-25kg packaging

Available colors:

1/25" - 1 color (silver) for scatter
1/32" - 1 color (silver) for scatter
1/64" - 3 colors for scatter
1/128" - 28 colors for mixing glue
1/256" - 2 colors for mixing glue

Conformity

Water base adhesive should be used onto any kind of fabric.
21T and bigger hole mesh is adviced.
Cotton Polyester fabrics
Elastic fabrics
Knitted or woven fabrics

Application Method

For scattering, patterned glue is fixed by a serigraphy stencil before caviar transfer.
Caviars must be scattered onto semi-wet adhesive
145-150C temperature must be applied to fix the glue.

For mix into adhesive, 21T or less size mesh should be used not to block holes.
After serigraphy print fixation must be done proper to adhesive properties. Excess heat can cause color loss.

For was resistance, correct glue should be choosen.
Silicone treated fabrics are not useful for any print.
