DISCOVER WHAT WE HAVE TO OFFER

We are a team of experienced professionals dedicated to delivering excellent textile solutions. We specialize in fabric and foam moulding, lamination and custom bra cups.

Preformatex is a leading textile solutions provider with two decades of experience. For over 20 years, we have been crafting top-of-the-line bra cups for manufacturers and retailers, representing the pinnacle of comfort, style, and craftsmanship.

At Preformatex, sustainability and innovation are at the core of our business philosophy. We actively invest in research and development, exploring new ways to apply materials and create eco-friendly innovations.

MOULDING IN THE INDUSTRY

since 2002

Our company has been proudly and steadily growing since 2002 when it was formed by our CEO Jose Luis Ruiz. Since then, the company has grown to 35 employees that work to deliver the best products to our clients.

With a global presence, with clients in over 35 countries, we actively participate in prominent fashion events like MarediModa, Modtissimo and Interfilière, showcasing our exquisite collections and networking with industry experts.

Elevate your creations with the help of our experts on textile solutions!

Based in BARCELONA trusted worldwide

Our dedication to sustainable and ethical practices is evident in our product offerings, which reflect our commitment to responsible production.

At Preformatex, our values fuel our mission. We stand for equality in the workforce, empowering women and fostering an inclusive environment. We're dedicated to creating a workplace that upholds optimal work conditions, in compliance with the highest ethical standards. Our commitment drives us to inspire positive change, shaping a better future for all humans and the planet.

Latest products **OUR NEW CUPS!**

All of our products are certified with the Oeko-Tex Standard 100, ensuring that they have undergone rigorous testing for harmful substances.

This certification reflects our commitment to providing you with textiles that meet high safety and environmental standards, allowing you to enjoy our products with confidence and peace of mind.

Trust our CERTIFIED PRODUCTS

Clear to wear / INDITEX

Our products are certified by one of the world's best-known labels for textiles **tested for harmful substances.** It stands for customer confidence and high product safety.

O.C.I.A - Organic

Our oncological hats produced with seaweed fabric are certified organic products by **O.C.I.A International**, qualified as an exemplary certifier.

REACH Compliance

This regulation ensures the products with this certified are **safe for human health and the environment**, from the risks that can be posed by chemicals.

Product development WE GIVE SHAPE TO YOUR IDEAS

3D Prototyping

Revolutionize your design process with our **3D prototyping services** at Preformatex. From concept to reality, we transform ideas into tangible prototypes, providing a **visual preview for perfecting designs before production**.

Our advanced technology bridges the gap between imagination and reality, creating highly detailed three-dimensional models. Whether in early product development or refining existing designs, our 3D prototyping brings clarity and precision. Rapid prototype production facilitates a dynamic, iterative design process, accelerating time-to-market and ensuring your final textile product meets top standards. Trust us as your partner in transforming concepts into tangible, market-ready solutions.

3D Printing

Elevate prototyping with our cutting-edge **3D printing services,** specifically utilizing a high-performance **resin 3D printer.** Achieve unparalleled precision and intricate detailing, ensuring your prototypes are true representations of your envisioned product.

Our resin 3D printing excels in producing complex structures, ideal for intricate designs and **high-resolution prototypes.**

This advanced technique brings a level of realism to your prototypes that is crucial for **accurate testing and evaluation**. Whether you are in product development, engineering, or design, our resin 3D printing services provide the fidelity you need to make informed decisions and move seamlessly from concept to production.

Mould fabrication (CNC)

Precision meets craftsmanship in our mould fabrication process. Meticulously **designed to exact specifications**, our moulds come to life through the artistry of our skilled team and **cutting-edge CNC machines**. Crafted from **high-quality aluminium**, each mould is a testament to our commitment to excellence and innovation.

Our CNC machining capabilities translate designs into reality with **unmatched accuracy**, ensuring the reproducibility of your products and contributing to the durability of the manufacturing process. This dedication to quality in mould fabrication is a cornerstone of our commitment to delivering superior solutions to our clients. Trust us for your mould fabrication needs and experience the transformative difference precision makes in every detail of your project.

Product Manufacturing

We redefine **personalized manufacturing** in the textile sector by seamlessly blending **precision** with unparalleled **quality**. Our commitment to crafting bespoke solutions is embodied in our ability to produce entirely **custom products** with meticulous attention to detail.

Specializing in the textile industry, we harness cutting-edge technology to ensure the utmost accuracy in every aspect of production. From concept to creation, our skilled team is dedicated to delivering tailor-made products that not only meet but exceed your expectations. This commitment to precision manufacturing extends to every facet of our process, allowing us to create unique, **high-quality textile products that align seamlessly with your vision**.

Services FOAM & FABRIC LAMINATION & MOULDING

Fabric & Foam Lamination

We specialize in the **seamless fusion of foam and fabric** through our advanced **lamination** services. Elevating textile solutions to new heights, our expertise lies in creating a harmonious **bond between diverse materials,** resulting in products that embody both comfort and durability.

Our foam and fabric lamination process is a testament to precision and innovation. Whether you're in need of enhanced padding for activewear or seeking to elevate the aesthetics of your product, our skilled team ensures that each lamination is executed with meticulous care. This technique not only **enhances the structural integrity** of the materials but also introduces a layer of versatility, making our laminated products ideal for a wide range of applications.

Choosing us for your large-scale production, we will bring you a level of expertise and dedication to quality that ensures your final product is a testament to the artistry and precision of our lamination services. Being able to choose from our stock laminated foams or create a completely custom roll with your own fabric or personalized colour.

Fabric & Foam Moulding

Our fabric & foam moulding service offers a seamless integration of materials, resulting in products that are not only visually appealing but also highly durable.

Whether you require intricate patterns, specific shapes, or customized designs, our state-of-the-art technology and skilled craftsmen ensure precision and quality in every mould.

Premium products often require tailored-made solutions like fabric and foam moulding to achieve the best finishes, we provide expertise in the area with more than 20 years of experience, helping you along the way to get an optimal result.

Bra cups for LINGERIE

Introducing our exquisite line of bra cups, specifically designed for the lingerie industry. Our precision-crafted bra cups are tailor-made to meet the needs of lingerie manufacturers, ensuring the perfect blend of style and support for their intimate apparel creations. Explore our collection and experience the pinnacle of lingerie craftsmanship, designed exclusively for B2B excellence.

We've developed a versatile line to encompass a diverse range of lingerie applications, offering an extensive selection of shapes that can bring any design concept to life. Additionally, we've developed options tailored for smaller manufacturers who prioritize hand-crafted, artisanal products.

Bra cups for SPORT & ATHLEISURE

Engineered for comfort, support, and performance, our bra cups are crafted with innovative materials like spacer fabric to ensure a secure fit during any activity with maximum breathability.

We have a collection of specifically designed bra cups for sports, ranging from monocups to removable triangle pads for adaptability.

If you need a specific design developed for you, our engineering team is ready to create a custom shape that precisely aligns with your unique needs.

Bra cups for **SWIMWEAR**

Dive into style with our versatile swimwear collection, featuring a wide range of shapes designed to suit every taste, from timeless classics to the latest trends.

Elevating your swimwear experience, we offer these designs in spacer fabric—an innovative 3D fabric, it's breathable, lightweight, and quick-drying alternative, ensuring you make a splash with comfort and elegance.

BENEFITS OF USING SPACER FABRIC

Soft and comfortable

Regulates temperature

Very breathable

Holds its shape

Lab Tested for Harmful Chemicals

This regulation ensures the products with this certified are **safe for human health and the environment**, from the risks that can be posed by chemicals.

The Future of Athleisure Swimwear

AquaCup is a revolutionary eco-friendly cup for active lifestyles, ideal for sport and swimwear. This solution is a certified* recyclable cup (TPE). The high durability and comfortable design provide great support and breathability when wearing it, making it an excellent sustainable alternative to traditional foam cups. Its unique construction allows it to hold its shape while

giving adaptability to the shape of the body and its movement.

> To develop AquaCup we tested multiple methods and materials to create the best solution that offers a reliable product with great qualities and durability.

Thanks to the polar charge of the material, it can withstand contact with products like sunscreen or creams without any damage. We believe in creating a sustainable future, making it our priority to achieve a long-lasting change and positive impact in the world. This is why we innovate and create sustainable alternatives to facilitate a green transition for textile brands and manufacturers.

How to MEASURE CUPS

Correctly measuring cups is essential for obtaining accurate measurements and comparison between bra cups.

To measure this object that has different volumes and sides, we have to follow this steps below:

Keep in mind: Don't stretch the material!

1. First, align both cups facing each other, with the outsides facing inwards.

2. Choose a corner as a starting point. Locate the same corner on both cups and align them until they match perfectly.

3. Carefully move your fingers from the previous corner to the next one on the right, following the edges with your fingers, keeping them close together on both cups as you move.

4. Repeat this step along the entire perimeter of the cups until you reach the starting corner.

Scan the QR code for a Visual demonstration

How to MEASURE A BRA SIZE

1. Begin by measuring the band. Opt for a lightly lined bra, avoiding push-up styles to ensure the breasts are in their natural state. Position a measuring tape snugly underneath the breasts, ensuring it runs parallel to the base of the bra band.

2. Next, it's time to measure the bust. Position the tape measure at the fullest point of the bust, ensuring it remains parallel to the band, just like before.

3. To determine the cup size, simply compare both measurements with a size chart to find the correct size. You can refer to our chart below for guidance.
