- India office:** 1st floor at MFar Silverline Tech Park, Plot No 180, EPIP Zone, Whitefield, Bangalore 560 066

OUR Company summary

Datatex was formed in 1987 by two separate companies that brought their unique expertise and skillsets together, one **a group of textile and apparel consultants** and the other **a software house specialized in ERP** (Enterprise Resource Planning) solutions.

The initial mission was **to create an ERP for apparel and textile industries that can adapt to the organization of every company**, rather than requiring the company to adapt to the software package.

Soon a customer service model was realized far beyond the simple provision of a software package: **a long-term commitment to provide software solutions that are valid over the years and evolve with the customers' business.**

Fundamental to the excellence of a Datatex software solution is a rigorous approach

to the design and implementation at each customer installation.

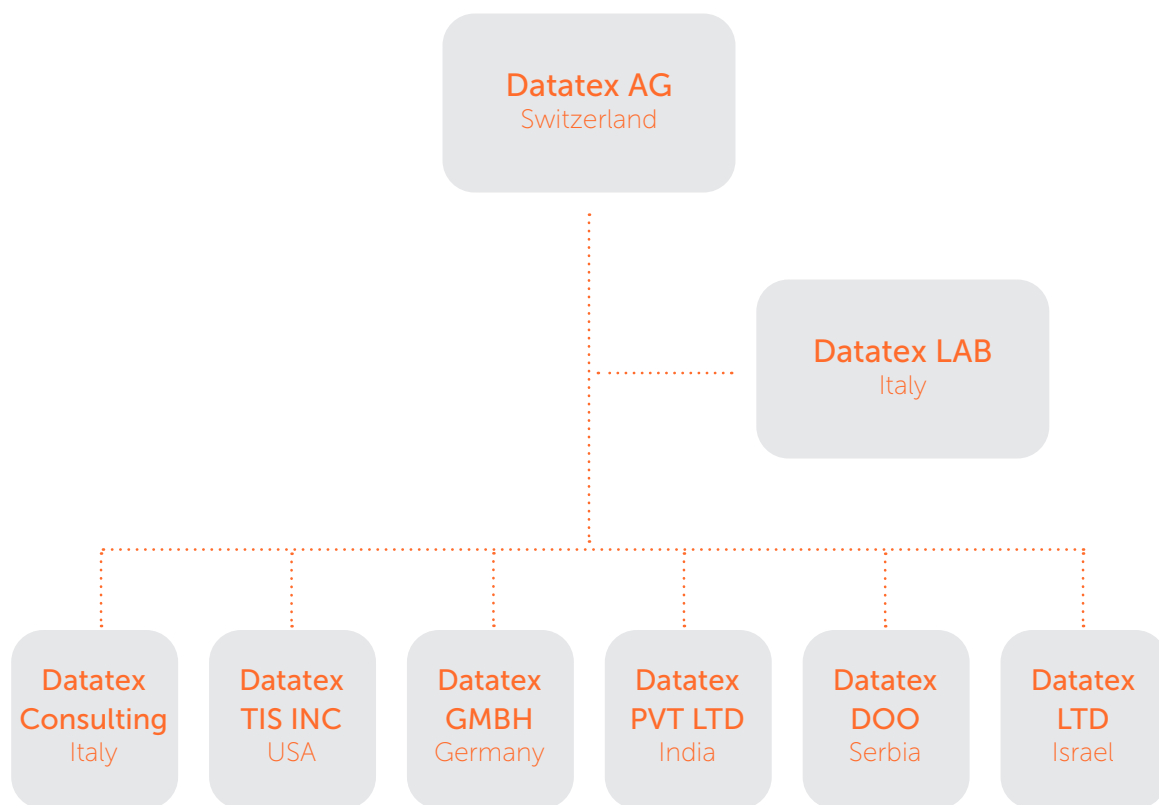

The process begins with a **careful analysis** of the customer's organizational structure. For customers who want to adopt a new ERP system as an opportunity to optimize their business processes, Datatex works with specialized consultants and other partners, providing specific expertise on **business process transformation.**

Once the analysis is complete and the functional specification has been drawn up, installation begins. Depending on the customer's IT resources, the project management approach may range from turnkey software solutions, with minimal involvement of customer personnel, to installations carried out largely in-house under the guidance of Datatex technical staff and partners.

OUR Fashion industry challenges

Strong need to innovate

- Aware of new technologies with disruptive potential
- Evaluate business sense prior to adoption

Intense competitive pressure

- Greater variety
- Short lead-times
- Higher level of service

Rapid responsiveness

- Planning and control
- Drill down from general to detail
- Take informed decisions

OUR NOW: MRP Planning

1. Multiple Planning Methods

- 1.1. Planning Per Sales Order
- 1.2. Planning by Availability (Inventory Policy, Safety Stock, Reorder Levels etc.)
- 1.3. Mix Model (Certain levels by Sales Order and others by Availability)
- 1.4. Planning by Project (where a project can be a customer order or a collection/season or..... a user definable entity)

2. Auto Generate Production Demands and Purchase Requests by Planning Run

3. Automatic Netting of Stock and already running work orders or purchase orders

4. Batch Size, Optimum Batch Calculation, Scheduled Planning Run, Netting,

5. Impact of Sales Order changes (Change of Dates, Quantity etc.)

6. Forecast, Open & Normal Order

7. Firm & Non-firm Demands

OUR NOW: Inventory & Warehouse

1. Single Click Inventory for Multiple Location / Warehouses (Division, Warehouse, Availability Group, Physical Warehouse)
2. Balance and Availability Definitions
3. Zone/Row/Rack/Bin.... Definitions and Controls
4. Container & Container Element
5. Counter (Lot, Element, Container Element)
6. Multiple Quality levels with same product code
7. Easy search/filter during stock transactions
8. Multiple products can be transacted in one-go
9. Ease of Integration with Bar Codes, RFIDs
10. Integration possible with Weighing Bridge, Readers, Shipping Approvals, Conveyor Belts etc.
11. Provisional And Confirmed Warehouse Movements at all levels
12. Internal Order can be used for Inter-Warehouse and Intra-warehouse transfers

OUR Business Partners

Datatex has a global presence, both through its own offices and through its worldwide network of leading software houses that provide timely and highly qualified customer service with product competency at a local level. 7 offices, 4 development centers, 7 competency centers, **25 Business Partners**, real-world solutions in 14 languages. No matter where your organization is located, **Datatex global and local presence can help you reach your strategic objectives.** Datatex customers relocating plants to foreign, even remote, countries are assured of full support. **The local Business Partners, selected for the quality of their service, contribute with their knowledge of regional requirements and languages.**

“The pride in carrying out a project that is fully satisfying the expectations of both companies is mutual. BBV Group and Datatex have grasped the key to the success of the project from the very first meeting, in approaching each other in a position of listening, respect and transparent availability. A profound context of mutual trust and collaboration was born and developed which allows us to solve all the problems we are called to face.”

Mr Giovanni Valli | Founding Partner of BVV Group.

“The seamless integration and connectivity of all operations has resulted in precisely monitoring customer service and stock levels. This has led to an overall reduction in inventory levels and customer satisfaction. Customer orders can now be tracked from the shop floor to warehouses and shipping details. There is a great improvement in customer satisfaction.”

Mr S P Oswal | Chairman & Managing Director, Vardhman Group.

“The Datatex solution was our choice because it was the best ERP solution we found that we believed could evolve with the technological changes of the textile industry.” “Its modular and table-driven approach allowed us to install it in different departments with minimal changes. We asked for a solution that could be implemented on time and on budget and Datatex delivered.”

Mr Jeff Robson | PFG's Project Manager
