

## What makes the 718 stand out

- Completely new design and stand concept enables for the first time a user-friendly flatbed machine with a large work surface.
- Stepper motor controlled plunger module with 1/100mm accurate adjustability for **extremely precise** and repeatable stitch depth.
- Equipped with new drive from Dürkopp Adler. The DAC Classic control box and the DA432 drive are used together with the OP-1000 control panel. This package ensures more user-friendly operation.
- 2nd thread tension can be individually programmed to ensure a uniform stitch pattern with different stitch depths.
- 6 quickly programmable memory locations for individual stitch depth values and machine speeds that can be changed during the sewing process.
- Teach-in mode for precise stitch depth selection.
- Easy on/off switching of the seam lock.
- Maintenance-friendly, oil-free design.
- Large clearance of 420mm x 150mm.
- Reduced running noise due to new bearings and head hood design.
- New ergonomic placement of the hand wheel.

Options available on request:
